I realize when you're on the outside looking in it appears that celebrities, athletes and people with powerful careers have very exquisite and perfect lives. Exquisite may be true but not perfect definitely not for a Grammy award winning artist with his peculiar sexual fantasies, nor my clandestine meetings with a basketball star, my rendezvous with a singer/actor, my crazy escapades with superstar rappers, nor my friendship with a reality show star. Come with me as I take you from the most luxurious hotel rooms to multi-million dollar mansions. We'll go on some of the craziest escapades and reveal secrets that may make the biggest sinner cringe. As I sift through a long list, I'll spare no details when it comes to my time

spent pleasing these men in ways their wives and girlfriends weren't--all for the mighty dollar.I'll also let you deep into the mind and sensitive side of Sasha Cream, how my career as a porn star, entertainer and call-girl began, along with my personal views on life, love and sex vs money, power and respect.Delve into my worldALL FACT, no fictionexposing the industry with The Naked Truth, on page at a time. ~Sasha Cream

A First Course in Differential Equations

Rigging Modern Anchors, by Drew Frye, is possibly the most comprehensive guide ever written to demystify the subject of anchoring, especially about today's new anchors. The author, over years of systematic testing with a variety of different anchors and rigs, has produced a new benchmark for anchoring knowledge based on empirical data. Most anchoring mythology is based on anecdotal wisdom passed from one sailor to the next. Often what seems to work or doesn't work has no basis beyond the fact that it was handed down as the conventional wisdom. Finally, Frye has produced a book on anchoring that digs deeply into the how and why of anchoring. This book contains in-depth discussions of anchoring basics, loads, scope, cyclical loading and soil consolidation, discussions of bottom characteristics and holding power. There are anchor-specific observations, discussions of tandem anchors and rigging schemes, plus an extensive appendix containing data tables, test data, open source designs for bridle plate and anchor turner, Strength and toughness of different types of chain and rope, data tables on chain and line thickness, choosing connectors, extensive anchor size recommendations based on different manufacturers, and much more.Proper anchoring and anchor choice is critical to the safety of ship and crew. Instead of hoping that your anchor and rigging scheme will hold in a given situation, read Rigging Modern Anchors and be sure of it.

Though he was born and died in England, Harold Bindloss spent much of his youth traveling the world, and he was particularly enamored of the forests of Canada, where he would later set many of his Western novels. In Alton of Somasco, small-time logger Harry Alton has big plans for his land -- and the ambitions and smarts to make his dream a reality. But when a conniving British businessman shows up with some startling news, Alton's livelihood is suddenly at risk.

Ever since the late '60s, various outboard manufacturers have used a number of different electronic ignition systems. Early ignitions used battery-powered systems, with alternator powered systems later becoming more common. If like most do-it-yourselfers you've relied on a sketchy owners manual. With this guide you will gain a better understanding of the ignition components and how the ignition system operates and learn how to quickly determine if your problem is electrical or mechanical. CDI Electronics has been the leader in outboard marine ignition

technology since 1982. This technical manual is a step by step guide to your outboard ignition for the following manufacturers: General Troubleshooting Information Chrysler/Force Johnson/Evinrude Mercury Tohatsu/Nissan Yamaha Plus DVA and Resistance Charts

Boatowner's Mechanical and Electrical Manual

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the

book marks the beginning of a new epoch in the study of the mechanics of horology.

In *Effective Supervision*, Robert J. Marzano, Tony Frontier, and David Livingston show school and district-level administrators how to set the priorities and support the practices that will help all teachers become expert teachers. Their five-part framework is based on what research tells us about how expertise develops. When these five conditions are attended to in a systematic way, teachers do improve their skills:

- * A well-articulated knowledge base for teaching
- * Opportunities for teachers to practice specific strategies or behaviors and to receive feedback
- * Opportunities for teachers to observe and discuss expertise
- * Clear criteria for success and help constructing professional growth and development plans
- * Recognition of the different stages of development progressing toward expertise.

The focus is on developing a collegial atmosphere in which teachers can freely share effective practices with each other, observe one another's classrooms, and receive focused feedback on their teaching strategies. The constructive dynamics of this approach always keep in sight the aim of enhancing students' well-being and achievement. As the authors note, "The ultimate criterion for expert performance in the classroom is student achievement. Anything else misses the point."
