If you are thinking of starting up a business — whether online or in a pushcart or a small café — you need to look into your branding. (how does it work, anyway?), brace yourself…According to Jacky Tai, you should start your branding exercise as early as possible. Brand Zero distils the author's wealth of

experience in grappling with branding strategies in the real world into a practical and easy-to-understand guide anyone. About the Authors For a decade, Jacky Tai headed the marking departments for several companies in the United States and Singapore before he joined International Enterprise Singapore. Heading its branding initiatives, Tai developed revolutionary training programmes that helped various companies — from innovative start-ups to established players — to better understand branding strategies. Jacky is currently Principal Consultant in StrategiCom, a B2B branding specialist

# Brand Zero: The complete branding guide for start -ups

Manufacturers are increasingly, under pressure from their major stakeholders to integrate environmental issues in the design and management of their products. These stakeholders include customer, regulators, employees, communities, and interest groups who have a common stake in protecting the earth from pollution and in limiting the exploitation of earth's limited natural resources. Manufacturers recognize that being environmentally responsible also offers competitive advantage to the firm. Hence the Handbook of Environmentally Conscious Manufacturing is written as a state-of-the-art reference to environmentally conscious manufacturing (ECM). The chapter authors were carefully selected. All the chapter authors have done extensive research and / or practice work in the field of ECM. The Handbook covers all the major topics in

Environmentally Conscious Manufacturing. There are specific chapters to deal with sustainable manufacturing, recycling, eco-labelling, life cycle assessment, and ISO 14000 series of standards, as well as decision-making aspects of Environmentally Conscious Manufacturing. Decision-oriented topics on supply chain, decision models, quality initiative, environmental costing and decision support systems are also covered. The influence of ECM on marketing imperative is also covered. The Handbook is the most comprehensive treatment of Environmentally Conscious Manufacturing available to-date. It is the definitive, state-of-the-art reference to ECM and its applications to today's manufacturing firms.
