The history of Dinky Toys, Corgi Toys and other makers of diecast metal cars has been covered in great detail in many books and magazine articles; by contrast, information on plastic toy cars is much harder to come by. Yet collectors are taking an increasing interest in plastic cars, particularly as the rise in the value of early diecast and tinplate models has put many of these out of reach of the average enthusiast. For the first time, this book aims to provide a systematic introduction to the vast number of plastic cars made during the 1950s and 1960s. Years of research have enabled the author to uncover many fascinating facts about the companies who made these toys. Some were major players in the toy industry, like Tri-ang and Brimtoy in the UK, Norev

and Minialuxe in France, Gama and Siku in Germany and Ingap in Italy. Many others, though, were more obscure, and some only modeled one car before disappearing without trace. More than 250 photographs of these toys are included, with the emphasis being on the most colorful and realistic examples, all of them based on real vehicles of the period. In many cases, the toy is pictured alongside its original box, the presence of which can often double the value of the item to a collector. Readers will also find a handy glossary listing the names of many of the companies who were active in this field in the 1950s and 1960s, together with some evocative period advertisements and catalogue illustrations. If you thought that a model car had to be made of diecast metal to be worth collecting, this book might change your mind . . . With 250 color photos, extensive appendices and identification aids this is a must have for any collector or dealer.

After 20 years of glorious 'failure', the best-loved team in Formula One is consigned to the history books, and it deserves one of its own. Minardi had a successful time in Formula Two until the tiny Italian outfit was ready to hit the big time in 1985. It somehow survived in F1's shark-infested waters as

bigger teams (Lotus, Arrows, Tyrrell) were dragged under. They have a truly international fan-base and are the 'second team' of most F1 devotees. Minardi is held in such affection as everyone loves the plucky underdog - Minardi's annual budget would have lasted one month at the other Italian team up the road. Yet, from its plant in Faenza near Bologna, Minardi has produced cars that qualify, sometimes score points and often lead the way in their technology. Gian Carlo Minardi also developed a reputation as a fabulous talent-spotter - Fisichella, Trulli, Webber and the youngest ever World Champion Alonso all started their F1 careers with Minardi. For the last five years, Minardi was owned by controversial Australian tycoon Paul Stoddart. Cast as David against the Goliath of F1's governing body, Stoddart constantly hit the headlines as he tried to get a more equal share of the sport's billions. Ultimately, he failed and Red Bull has now bought the team. Despite a petition of 15,000 names, the Minardi name has vanished from the F1 grid and true motorheads miss it. This is the one and only inside account, with exclusive, comprehensive interviews with bosses, drivers and engineers. 140 unique photos complete this revelatory tale.

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.
