Evoking Krakauer's *Into the Wild*, Dan Schultz tells the extraordinary true story of desperado survivalists, a brutal murder, and vigilante justice set against the harsh backdrop of the Colorado wilderness. On a sunny May morning in 1998 in Cortez, Colorado, three desperados in a stolen truck opened fire on the town cop, shooting him twenty times; then they blasted their way past dozens of police cars and disappeared into 10,000 square miles of the harshest wilderness terrain on the North American continent. Self-trained survivalists, the outlaws eluded the most sophisticated law enforcement technology on the planet and a pursuit force that represented more than seventy-five local, state, and federal police agencies with dozens of SWAT teams, U.S. Army Special Forces, and more than five hundred officers from across the country. *Dead Run* is the first in-depth account of this sensational case, replete with overbearing local sheriffs, Native American trackers, posses on horseback, suspicion of vigilante justice and police cover-ups, and the blunders of the nation's most exalted crime-fighters pursuing outlaws into territory in which only they could survive.

Cuban motorcycle mechanics go to extremes to keep vintage American hogs rumbling more than a half century after the last Harley-Davidson dealership closed in socialist Cuba. Cut off from the United States, Harley riders on the island scavenge parts from battered old Soviet trucks, lawn mowers and even anti-tank guns. It's a tale of man and machine

like no other in the world. Some Harley riders in Cuba fit their machines with tractor tires so they can venture into swampy scrubland to hunt for ducks and other wildlife. Others use their motorcycles to haul everything from human bones to cinder blocks. Word of the Cubans' exploits has reached motorcycle mechanics in the U.S., including famed custom bike builder Jesse James, who sent an autographed biker magazine to one mechanic, writing, "Long live Cuba!" "Cuban Thunder" includes interviews with more than 40 Harley riders, including legendary mechanic Sergio Morales, former stunt rider Antonio Miniet and Ernesto Guevara, the Cuban son of the late revolutionary Ernesto "Che" Guevara.

This lighthearted guide to the art of cat massage identifies the precise locations of the classic "purr points" and the best ways to activate them. With the aid of humorous instructions and delightful illustrations, learn such techniques as the Inter-Whisker Sidestep, Knuckle Dusters, the Flamenco Guitar, and the Full Fluff, the application of which is said to take both subject and applicant to a new level of contentment. Each technique is rated on both the "Purr Register" for visual response, and the "Purrometer" for auditory effect ranging from a moped to a dump truck, which leaves few, if any, practitioners sitting.

What happens when a company's brand needs more than a face-lift? Author Clyde Fessler, former Harley-Davidson vice president of marketing and business development, takes you along for a ride through a complete brand overhaul. By examining the core principles of brand identity, development, and extension, Fessler shows how these ideas—paired with his unique “problems are in the office, solutions are in the field” leadership style—helped reestablish Harley as one of the most enduring and identifiable brands in the world. In *Rebuilding the Brand*, you will:

- Explore the six key components of building and maintaining a powerful brand: brand experience, brand extension, brand association, brand consistency, brand welfare, and brand team.
- Discover the power of “turning left” when the competition turns right and why breaking away from the pack will keep you at the center of customers' attention.
- Learn how the traction of turning negatives into positives will help you gain powerful marketing momentum.

This illustrated guide is packed with interesting facts and follows the history of the famous Harley-Davidson company and the development of its famous bikes, which have earned a special place in the hearts of enthusiasts everywhere. The story dates from 1903 when Bill Harley and the Davidson brothers, with no thought of fame or fortune, decided to build a motorcycle that really worked. So successful was it, that it led to the gradual formation of a company that has survived through good times and bad. Through good times and bad, losing and winning back police contracts, as well as weathering various other vicissitudes, the company has achieved lasting success. In the end, Harley-Davidson came to the ultimate decision of giving its customers what they really wanted, not by providing year-on-year innovations, but by remaining true to the Founders' original concept. The result, as everyone knows, are bikes of mythic status, imbued with a mysterious quality of their own and generating a passion in enthusiasts amounting almost to a love affair. The name has come to personify America and is up there alongside Coca-Cola, Ford and McDonald's. The bikes are described in detail, not only in mechanical terms, but also with glorious photographs, and will be of interest to everyone who loves motorbikes: even aficionados of Japanese and European bikes, who have never even ridden a Harley-Davidson, will be able to recognize the unique marriage of style and nostalgia and the fact that there are no other bikes quite like them.

Oil and coal have built our civilisation, created our wealth and enriched the lives of billions. Yet their rising costs to our security, economy, health and environment are starting to outweigh their benefits. Moreover, the tipping point where alternatives work better and compete purely on cost is not decades in the future - it is here and now. And that tipping point

has become the fulcrum of economic transformation. In *Reinventing Fire*, Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win the clean energy race - not forced by public policy but led by business for long-term advantage. This independent and rigorous account offers market-based solutions integrating transportation, buildings, industry and electricity. It maps pathways for running a 158%-bigger US economy in 2050 but needing no oil, no coal, no nuclear energy, one-third less natural gas and no new inventions. This transition would cost \$5 trillion less than business-as-usual - without counting fossil fuels' huge hidden costs. Whether you care most about profits and jobs, or national security, or environmental stewardship, climate, and health, *Reinventing Fire* makes sense. It's a story of astounding opportunities for creating the new energy era. -- Publisher description.

Branding Masculinity examines two ideologies of masculinity – one typifying rural agricultural areas and the other found in urban, business settings. Comparisons are made between these two current forms of masculinity and both similarities and differences are identified. Six product categories compose the Constellation of Masculinity for both groups. Hirschman selects a masculine prototype brand from each category and presents a detailed analysis of the images, language and marketing actions used to create the brand's masculinity over time. Using her method, marketers for other brands will be equipped to enhance the masculine status of their brands, as well. Branding Masculinity proposes that masculine brands are made, not born. Masculinity is an enduring cultural ideal which can be attached to a variety of products and brands by the appropriate use of symbols, icons and images. Scholars from various disciplines within the fields of branding, marketing, public relations and corporate identity will see this book as vital in continuing the academic discourse in the field. It will serve as a respected reference resource for researchers, academics, students and policy makers, alike.

Each subsequent model continued to strengthen that position. But how do you upgrade America's favorite sports car? Make it a special edition! Special edition Corvettes are the tip of the spear when it comes to the American auto manufacturers special models. Luminous cars such as the 1967 L88 convertible, 1969 aluminum block ZL1, and 2015 Z06 #001 have all commanded a million dollars or more. Modern dealer-tuned cars from Lingenfelter, Calloway, and Hennessey have carried the tradition of making a great Corvette even better. Extremely low mileage on 1978 Pace Cars indicate that people have thought of these cars as investments for nearly 40 years. Keith Cornett of Corvetteblogger.com compiles a murderer's row of special-edition Corvettes in this first-ever compilation on the subject. This book is an encyclopedia of information, as you will learn about some of the rarest Corvettes on the planet. It will serve as a guide if you're looking to add one of these special machines to your collection. Everything you've ever wanted to learn about collectible Corvettes is in Corvette Special Editions.

How to Restore Your Harley-Davidson

If modern automotive myth is to be believed, then America was built on the backs of a heavy-duty Mack, an International tractor, a Harley-Davidson motorcycle, and a Ford F-series pickup. This illustrated history of pickups, including Chevrolet, Dodge, Ford, GMC, and Jeep, is a perfect addition to the library of anyone who loves the American story and the history of the working people of this nation. Pickup trucks were the workhorses of an entire nation for the best part of a century—a constant presence through American history. In the 1920's, hard-working Midwestern farmers relied on their Model Ts and Chevys to coax a living from the land before loading up and fleeing to California as fields turned to dust in the 1930s. Militarized pickups helped to win the war, though by the 1950s and '60s pickups were back on the farm, on the building site, or acting as carry-alls for rapidly-expanding businesses. Until the early 1960s, pickups were working vehicles but sales rocketed through the decade as they were used to haul boats and camping trailers or transport hunters into the field. It began to dawn, as two-car families

became increasingly common, that two-seater pickups weren't quite as impractical as they seemed, and it was not unusual for the owner of a sedan or station wagon to buy a pickup as well.

When Ford rolled out the Mustang in April 1964 it was an instant hit. Even with its immense popularity it didn't stop Ford Corporate, zone managers, and dealerships from taking it an extra step further. Just two short months later, the first special-edition Mustang debuted at the Indianapolis 500 tasked with pacing the race, and it's been full throttle ever since. This book examines more than 300 special-edition Mustangs from 1964 through today. Coverage includes factory offerings such as the 2001 Bullitt and SVT Cobras, regional promotions including the Twister Special, third-party tuners such as Roush and Saleen, and factory race cars including the 1968-1/2 Cobra Jets and the 2000 Cobra-R. You may find Mustangs in this book that you had no idea even existed! Never has a volume this detailed and with this many model Mustangs been offered published. The authors have taken their decades of research and logged them into a single compilation. Each Mustang is accompanied by production numbers, key features, and photos of

F 250

This story will tell you about how two U.S. Soldiers were on a fact-finding mission for the United Nations, actually for the CIA, when a Sidewinder missile struck the side of the airplane, apparently a dud made in China, it did not explode. The smoke-filled Hercules C-130 was on fire going down and in the confusion the Air Force Crew ejected everything - including the soldiers sitting in a Hummer as required while airborne. They were ejected out the rear like garbage. Their lives seemed lost' gone forever as the aircraft disappeared into the early morning. They landed somewhere, their radio sustained fatal damage. Lost, stranded, shaken, their courage kept them alive. Shot and wounded by terrorists, they did battle with earthquakes, volcanoes, religious artifacts and beautiful girls as they tried to get home.
