Response by Toyota and NHTSA to Incidents of Sudden Unintended Acceleration

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.

Chilton's Toyota

Annotation World Bank Living Standards Measurement Study No. 112. Assesses evidence of a negative correlation between the number of children born and levels of child schooling by examining their determinants. In many developing countries, as parents have fewer children, they invest more in the health, education, and welfare of each child. This "quantity-quality tradeoff" is vividly illustrated in the recent economic development of Southeast Asia and Latin America. In Sub-Saharan Africa, however, the existence of such a tradeoff has not been established. The few studies conducted to date reveal either no correlation or a slightly positive one, whereby higher fertility rates are linked to greater schooling per child. This study examines the determinants of fertility and of child schooling in C te d'Ivoire and Ghana to assess evidence of a tradeoff, using data from three surveys conducted between 1985 and 1987. The results are mixed. In C te d'Ivoire, there is evidence of such a tradeoff in urban areas but not rural ones. In urban areas, female schooling, higher income, and improved child survival are associated with lower fertility and higher child schooling. In both rural and urban areas of Ghana, there is a tradeoff between fertility and child schooling with higher incomes, and, in rural Ghana, with increases in mothers' schooling. Also available in French ("La relation entre le nombre des enfants et de la scolarisation: Le cas de la C te d'Ivoire et du Ghana"): (ISBN 0-8213-3374-7) Stock No. 13374.

Toyota Truck & Land Cruiser Owner's Bible

Professional automobile racing has always been dominated by sanctioning bodies whose main goal was to ensure competition. That has meant seeing that cars are well matched--in body shape or chassis/engine combinations or engine size. But what about an all-out competition, in which one team's idea of the fastest race car could be pitted against another's, regardless of mechanical "parity"? This was what the International Motor Sports Association's (IMSA) Grand Touring Prototypes (GTP) race series was about. The Series ran from 1981 to 1993, and it was one of the most exhilarating racing experiences of all time. This book is the first to profile the amazing machines that resulted from the GTP's flat-out competition among different--and passionate--ideas about what might be the fastest way around a track: the V-12 with its better ground-effect tunnels but higher center of gravity (CG); the flat six with its low CG but severely-restricted ground-effect tunnels; and others that employed elaborate wings and air dams. Here are the people behind this engineering free-for-all, the culmination of almost a century of automobile racing experience. And here are eighteen of the most competitive vehicles they designed. Using photography, diagrams, drawings and first-person accounts from the men who built them,

Inside IMSA's Legendary GTP Race Cars offers a detailed look at the technology that drove some of the world's most exciting race cars, the likes of which may never be seen again.

The Authentic Leader

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

Using clear and simple exercises adapted for leadership development from the world-renowned Meisner Technique, *The Authentic Leader* will help you discover first-hand what it means to build your authentic leadership skills in a clear, technical way. This book presents a version of the Meisner technique that has been thoughtfully modified for the purposes of leadership training. It aims to train leaders to be fully authentic in their responses in the most efficient way and to let their responses be filtered by their abilities to deeply interpret and thrive within the psychological realities of the circumstances they are entering, be it their own or other people's. The exercises in this book teach that effective leadership skills are about getting the attention off of oneself and allowing for a type of interpersonal determinism to bring out a leader's truthful responses. This text breaks open the conversation on leadership and business skills in a whole new way - an established, although largely unknown method in the business world - that will help leaders engage in the values of great leadership and train their own abilities to have presence, be dynamic, be magnetic, and know how to read any situation and

thrive within it. Whether you are green in your career or at the head of a nation, an aspiring leader or an educator looking to use this material, this work develops and nourishes powerful leadership in unconventional, effective, and dynamic ways. Royce Sparks is an internationally recognised teacher of the Meisner Technique. He has taught it to both performers and members of the business world, having been one of the masterclass lecturers at University College London (UCL) on their MSc in Management. A graduate of the Royal Central School of Speech and Drama, he has presented on Meisner and other approaches to performance at international conferences. His interest in performance techniques for business and leadership development are a core element of his research. Individuals and companies within the arts he has collaborated with professionally include The Noh Theatre of Japan, Terence Stamp, Frantic Assembly, Nickolas Grace, Michael Attenborough, Complicite, Brigid Panet, and more. He received his Meisner training first under Scott Williams at the Impulse Company in London for five modular years before furthering his knowledge and receiving his certification to teach the Meisner Technique from leading world expert Larry Silverberg, with whom he later collaborated. He regularly coaches and has taught in Canada, the United Kingdom, Europe, and the United States.
