This book advances our understanding of change over time in human social conduct, and represents the first consolidated effort to reveal how micro-analytic studies of social interaction address such issues. The book presents a collection of longitudinal studies drawing on conversation analysis across a variety of settings, practices, languages and timescales, and analyses the ways in which participants produce and deal with practices changing over time. This edited collection will interest students and scholars of conversation analysis, sociolinguistics, discourse analysis, interactional linguistics and pragmatics.

In their quest to complete their study and to share a better knowledge and understanding of a part of Texas that is still somewhat a frontier, authors Louise S.

O'Connor and Cecilia Thompson reveal the first volume of their book *Marfa and Presidio County, Texas: A Social, Economic, and Cultural Study 1937 to 2008 Volume One, 1937-1989*. In a book that offers a closer look at the past and the present, readers will see how a place known as a tourist area and a center of contemporary art came to be. It returns to the pre-historic era of Far West Texas and bring readers up to the present with yearly reports on the region as well as extensive formal research and personal interviews with present day people who live in Presidio County. A case study worth reading, this book is an eye-opener for a better understanding of how this small yet historically rich land is what it is now. Packed with the economic, social, and cultural history of Presidio County; this book gives readers, both lay and the historians, a clear and complete picture of the events that lead to the preservation, industrialization, and the improvement of one of the frontiers of the United States of America.

Best known for his surreal camera obscura pictures and luminous black-and-white photographs of books, photographer Abelardo Morell now turns his transformative lens to one of the most common of artistic subjects, the flower. The concept for *Flowers for Lisa* emerged when Morell gave his wife, Lisa, a photograph of flowers on her birthday. "Flowers are part of a long tradition of still life in art," writes Morell. "Precisely because flowers are such a conventional subject, I felt a strong

desire to describe them in new, inventive ways." With nods to the work of Jan Brueghel, Édouard Manet, Georgia O'Keeffe, René Magritte, and others, Morell does just that; the images are as innovative as they are arresting.

In *The Blue and the Green*, anthropologist Jack Stauder analyzes how large-scale political, social, and environmental processes have transformed ranching and rural life in the West. Focusing on the community of Blue, Arizona, Stauder details how the problems of overgrazing, erosion, and environmental stresses on the open range in the early twentieth century coincided with a push by the newly created US Forest Service to develop fenced grazing allotments on federal lands. Later in the twentieth century, with the enactment of the Endangered Species Act and other laws, the growing power of urban-based environmental groups resulted in the reduction of federal grazing leases throughout the West. The author combines historical research with oral interviews to explore the impact of these transformations on the ranchers residing in the Blue River Valley of eastern

Arizona. Stauder gives voice to these ranchers, along with Forest Service personnel, environmental activists, scientists, and others involved with issues on “the Blue,” shedding light on how the ranchers’ rural way of life has changed dramatically over the course of the past century. This is a fascinating case study of the effects of increasing government regulations and the influence of outsiders on ranching communities in the American West.

A taciturn and moody young man, Lieutenant Peter Kane, USMC finds himself thrust squarely into the center of the violence and bloodshed of a Central American communist revolution. As he soon finds out, nothing is black and white in this often confusing, often frightening, and always dangerous conflict. Follow Kane as he fights to get his inner demons under control with the same determination, strength of will, tenacity, and brute force he uses to fight his enemies in this Central American hell!

WHAT PEOPLE ARE SAYING "I couldn't put it down this book is non-stop excitement right up to the last page!" "It is a well-written, thoughtful book that reveals the author's theories on foreign policy through an excellent work of fiction. Superb!" "This is an action novel that really focuses on character development. Levy genuinely tries to tell all sides of the story. Though this book was written almost twenty years ago, the message is more pertinent now than

ever. Highly recommended reading"

The setting is 1950 in London at the height of the Cold War and Kit Fournier is ostensibly a senior diplomat at the U.S. embassy in Grosvenor Square, but he is actually CIA bureau chief in London—a spy operating under diplomatic cover. He plies his cynical trade on the spy-infested streets where suspicion turns enemies into friends and friends into enemies. This bleak but familiar literary landscape hosts a volatile cast from MI6, KGB, CIA, and top-secret nuclear researchers who play at espionage and treason by day and dangerous, sometimes fatal, sexual

games by night.
