Using cases from the authors' files or from case files of other working clinicians, CASEBOOK IN ABNORMAL PSYCHOLOGY portrays the rich and arresting nature of disorders manifested in real people. Cases illustrate every major DSM-IV category, followed by a therapy outcome section that tells the rest of the story of what happened to these clients. Using an integrative approach, the authors emphasize the multiple causes of disorders and incorporate developmental and cultural issues in each case. Complex cases are presented without a diagnosis, so students can come up with a diagnosis on their own. This Fourth Edition includes a new case on

body dysmorphic disorder as well as two new cases without a diagnosis. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Social Psychology

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk.

Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books.
