ACI Manual of Concrete Practice 2004

"The ACI Manual of Concrete Practice (MCP) is the most comprehensive concrete reference set available. It contains all of the widely used ACI concrete and masonry code requirements, specifications, guides and reports. The largest, single source of concrete information in one set of books: more than 250 documents; eight parts, plus a separate index; documents in numerical order. Developed to be comprehensive. The MCP contains all of the ACI

documents you need to answer your questions about code requirements, specifications, tolerances, concrete proportions, construction methods, evaluations of test results, and many more topics. In fact, the MCP includes over 250 of the most used documents on concrete technology. It includes the 2014 version of ACI's Building Code for Structural Concrete & Commentary (318-14). An encyclopedia of concrete technology, the MCP has information needed by the engineer, architect, contractor, concrete/concrete product producer Everyone involved in the design and use of concrete. Topics Include: Design of reinforced concrete and masonry structures; Design and construction of floors on grade, pavements, and parking lots; Specification writing; Concrete mixture proportioning; Concrete mixing, transporting, and placing; Hot- and cold-weather concreting; Formwork; Inspection and testing; Construction tolerances; Repair, Renovation, and Rehabilitation; Troubleshooting"--Résumé de l'éditeur.

Specifications for Structural Concrete, ACI 301-05, with Selected ACI References

ACI Manual of Concrete Practice, 2017

The quality and testing of materials used in construction are covered by reference to the appropriate ASTM standard specifications. Welding of reinforcement is covered by reference to the appropriate AWS standard. Uses of the Code include adoption by reference in general building codes, and earlier editions have been widely used in this manner. The Code is written in a format that allows such reference without change to its language. Therefore, background details or suggestions for carrying out the requirements or intent of the Code portion cannot be included. The Commentary is provided for this purpose. Some of the considerations of the committee in developing the Code portion are discussed within

the Commentary, with emphasis given to the explanation of new or revised provisions. Much of the research data referenced in preparing the Code is cited for the user desiring to study individual questions in greater detail. Other documents that provide suggestions for carrying out the requirements of the Code are also cited.
