Ideas, Concepts, Doctrine

New Frontiers in High Performance Computing and Big Data

While many facets of electronic projects construction have waxed and waned over the years, musical effects units have remained as popular as can be home constructed for much less than the cost of an equivalent ready-made product. Also, some of the more weird and wonderful effects units for the home constructor have no true commercial equivalents.

Free Country

Has opening new skills and units been enough to create equal opportunities for women in the U.S. military? Success has been mixed, in part because of the circumstances of individual occupations, and some issues affect men as much as they do women. Among the authors' recommendations are that career counseling include both opportunities and potential drawbacks and that longer-term studies on specific issues are merited.

Advances in Big Data Analytics

The Status of Gender Integration in the Military

Proceedings of the 2019 International Conference on Image Processing, Computer Vision, and Pattern Recognition (IPCV'19) held July 29th - August 1st, 2019 in Las Vegas, Nevada.

Parallel and Distributed Processing Techniques and Applications

Ozu

Married life: its shadows and sunshine

Graph Paper Composition Book

This volume contains the proceedings of the 2017 International Conference on Parallel and Distributed Processing Techniques and Applications (PDPTA'17).

The Insolent Chariots

Has opening new skills and units been enough to create equal opportunities for women in the U.S. military? Success has been mixed, in part because of the circumstances of individual occupations, and some issues affect men as much as they do women. This volume supplies supporting data for the analysis presented in the companion volume, MR-1380-OSD.

EMMC2

Argues that video and computer games prepare today's children for success by teaching such critical skills as collaboration, prudent risk taking, strategy formulation, and ethical decision-making.

Hacking

This title contains the proceedings of the 2013 5th International Conference on Advanced Computer Control, held in Singapore. The topics covered include: Modern and advanced control strategies; human-machine systems; multimedia and communication systems; database systems; robotics and automation; and much more.

New Opportunities for Military Women

Discusses the role of women in every military conflict since the Vietnam War, the significant advances made by women in the Armed Forces during the 1980s, and subsequent resistance to these reforms

Night Dogs

Autonomic Computing

The complexity of modern computer networks and systems, combined with the extremely dynamic environments in which they operate, is beginning to outpace our ability to manage them. Taking yet another page from the biomimetics playbook, the autonomic computing paradigm mimics the human autonomic nervous system to free system developers and administrators from performing and overseeing low-level tasks. Surveying the current path toward this paradigm, *Autonomic Computing: Concepts, Infrastructure, and Applications* offers a comprehensive overview of state-of-the-art research and implementations in this emerging area. This book begins by introducing the concepts and requirements of autonomic computing and exploring the architectures required to implement such

a system. The focus then shifts to the approaches and infrastructures, including control-based and recipe-based concepts, followed by enabling systems, technologies, and services proposed for achieving a set of "self-*" properties, including self-configuration, self-healing, self-optimization, and self-protection. In the final section, examples of real-world implementations reflect the potential of emerging autonomic systems, such as dynamic server allocation and runtime reconfiguration and repair. Collecting cutting-edge work and perspectives from leading experts, *Autonomic Computing: Concepts, Infrastructure, and Applications* reveals the progress made and outlines the future challenges still facing this exciting and dynamic field.

High Fidelity News and Record Review

The United States Air Force in Korea, 1950-1953

The Status of Gender Integration in the Military

Shows how to build a preamp, ring modulator, phase shifter, and other electronic musical devices and provides a basic introduction to working with electronic

components

Electronic Projects for Musicians

This volume contains the proceedings of the 2017 International Conference on Advances in Big Data Analytics (ABDA'17).

Hi-fi News & Record Review

This text draws together a number of recent results concerning barrelled locally convex spaces, from general facts involving cardinality and dimensionality to barrelledness of some familiar vector-valued or scalar-valued normed spaces of functional analysis, and providing a study of some of these spaces. Throughout the exposition, the authors show the strong relationship between barrelledness properties and vector-valued measure theory.

Dictionary of Report Series Codes

This book presents a comprehensive review of research on applications of carbon nanotubes (CNTs) and graphene to electronic devices. As nanocarbons in general, and CNTs and graphene in particular, are becoming increasingly recognized as the

most promising materials for future generations of electronic devices, including transistors, sensors, and interconnects, a knowledge gap still exists between the basic science of nanocarbons and their feasibility for cost-effective product manufacturing. The book highlights some of the issues surrounding this missing link by providing a detailed review of the nanostructure and electronic properties, materials, and device fabrication and of the structure–property–application relationships.

Advanced Computer Control

Be a Hacker with Ethics

Nanocarbon Electronics

This book contains the proceedings of the 2018 International Conference on Information and Knowledge Engineering (IKE'18). IKE is an international conference that serves researchers, scholars, professionals, students, and academicians who are looking to both foster working relationships and gain access to the latest research results.

Textbook Of Operational Transconductance Amplifier And

Analog Integrated Circuits

This text, aimed at the clinical cardiologist, covers the planning of and participation in a clinical trial. It interprets the importance of past clinical trials in current clinical practice.

Information and Knowledge Engineering

"Substantially the book that devotees of the director have been waiting for: a full-length critical work about Ozu's life, career and working methods, buttressed with reproductions of pages from his notebooks and shooting scripts, numerous quotes from co-workers and Japanese critics, a great many stills and an unusually detailed filmography."—Sight and Sound Yasujiro Ozu, the man whom his kinsmen consider the most Japanese for all film directors, had but one major subject, the Japanese family, and but one major theme, its dissolution. The Japanese family in dissolution figures in every one of his fifty-three films. In his later pictures, the whole world exists in one family, the characters are family members rather than members of a society, and the ends of the earth seem no more distant than the outside of the house.

Capstone Concept for Joint Operations

In this first of a two-volume study, Dr. Futrell presents a chronological survey of the development of Air Force doctrine and thinking from the beginnings of powered flight to the onset of the space age. He outlines the struggle of early aviation enthusiasts to gain acceptance of the airplane as a weapon and win combat-arm status for the Army Air Service (later the Army Air Corps and Army Air Force). He surveys the development of airpower doctrine during the 1930s and World War II and outlines the emergence of the autonomous US Air Force in the postwar period. Futrell brings this first volume to a close with discussions of the changes in Air Force thinking and doctrine necessitated by the emergence of the intercontinental missile, the beginnings of space exploration and weapon systems, and the growing threat of limited conflicts resulting from the Communist challenge of wars of liberation. In volume two, the author traces the new directions that Air Force strategy, policies, and thinking took during the Kennedy administration, the Vietnam War, and the post-Vietnam period. Futrell outlines how the Air Force struggled with President Kennedy's redefinition of national security policy and Robert S. McNamara's managerial style as secretary of defense. He describes how the Air Force argued that airpower should be used during the war in Southeast Asia. He chronicles the evolution of doctrine and organization regarding strategic, tactical, and airlift capabilities and the impact that the aerospace environment and technology had on Air Force thinking and doctrine.

Women in the Military

For the last four decades, parallel computing platforms have increasingly formed the basis for the development of high performance systems primarily aimed at the solution of intensive computing problems, and the application of parallel computing systems has also become a major factor in furthering scientific research. But such systems also offer the possibility of solving the problems encountered in the processing of large-scale scientific data sets, as well as in the analysis of Big Data in the fields of medicine, social media, marketing, economics etc. This book presents papers from the International Research Workshop on Advanced High Performance Computing Systems, held in Cetraro, Italy, in July 2016. The workshop covered a wide range of topics and new developments related to the solution of intensive and large-scale computing problems, and the contributions included in this volume cover aspects of the evolution of parallel platforms and highlight some of the problems encountered with the development of ever more powerful computing systems. The importance of future large-scale data science applications is also discussed. The book will be of particular interest to all those involved in the development or application of parallel computing systems.

Do-it-yourself Projects for Guitarists

The Capstone Concept for Joint Operations describes in broad terms my vision for how the joint force circa 2016-2028 will operate in response to a wide variety of security challenges. It proposes that future joint force commanders will combine and subsequently adapt some combination of four basic categories of military activity -- combat, security, engagement, and relief and reconstruction -- in accordance with the unique requirements of each operational situation. The concept is informed by current strategic guidance, but because it looks to the future, it is intended to be adaptable, as it must be, to changes in that guidance.

Metrizable Barrelled Spaces

This book covers a detailed study of Operational Transconductance Amplifier (OTA) based circuits, their realizations and applications. The book is primarily concerned with the building blocks and their applications in linear and nonlinear circuit design, presented in a simplified and methodical way. The book comprises nine chapters, covers important building blocks, ideal and non-ideal component simulators.

Image Processing, Computer Vision, and Pattern Recognition

The role of women in the military has steadily been increasing since the early 1970s. The most recent changes occurred between 1992 and 1994, when both legislative and policy changes expanded opportunities for women. Congress has taken a keen interest in this process, and the House report for the Defense Authorization Act for Fiscal Year 1997 included as a special interest item a direction to the Secretary of Defense to evaluate the performance of the military services in integrating women into occupations previously closed to them. The report also asked for an assessment of the effects of this integration on readiness and morale. The study has three components. The first determines how each service implemented the guidance to open new skills and organizations to women. Each service interpreted the guidance differently, and it is important to understand those interpretations before assessing the progress in implementing the congressional guidance. The second component assesses the progress of what we refer to as gender integration. In this component, we determined the extent to which the services carried out their interpretations of the congressional direction. The third component assesses the effects of gender integration on the readiness, cohesion, and morale of units. To complete the third component, we relied on a series of visits to military units. We visited 14 units, chosen to provide the broadest possible view of the effects of the policy changes. We used three techniques during field visits to gather information about gender issues and their effects on readiness, cohesion, and morale. We interviewed commanders and other senior leaders, conducted a series of focus groups with unit personnel, and administered

a survey to focus-group participants and other unit personnel.

Practical Electronic Musical Effects Units

A wonderful, prescient diatribe on the American automobile industry and the tyranny of the automobile in our cities.

Air Force Communications Command

It is May 1969, and MI6 double agent Paul Dark stands alongside mourners at the funeral of Sir Colin Templeton; the former head of the organisation, the man he knew simply as 'Chief' -- and the man he killed in cold blood. Dark has got away with it, evading the attentions of both his fellow British spies and the KGB operatives to whom he long ago pledged loyalty. But that precarious security is about to be shattered, launching Dark back into the heart of an international conspiracy and making him a target for both exposure and assassination. Desperate to escape his predicament, Dark gambles everything on one last throw of the dice, exposing his Soviet handler to the British. But before long, he finds he has no choice but to go on the run again, taking him to the labyrinthine backstreets of Rome. The race is on to stop a deadly plot that dates back to the early years of the Cold War. The second part of the Paul Dark trilogy, and sequel to

the critically acclaimed Free Agent, Free Country is another sweat-soaked Sixties-set spy thriller in the tradition of Len Deighton and Frederick Forsyth.

Probability Theory and Mathematical Statistics

Included here are chapters on the design and application of new biosensors for direct chemical and biological analysis in laboratory or process control instruments. Contributors describe medical diagnostic assay and read-out of antibody/antigen binding information and unique sensors that measure chemical and biological moieties in the body and in the environment. They also discuss the development and use of enzyme membranes. Annotation copyrighted by Book News, Inc., Portland, OR

Don't Bother Me Mom--I'm Learning!

This graph paper composition notebook is 100 pages/50 sheets 4x4 quad ruled and measures 7.44 x 9.69 inches. Squares are 4 x 4 squares per inch and measure .25 inches. This abstract painting was inspired by the Aurora Borealis and is black, purple, yellow, green and white. Applied Biosensors

Critical Human Resource Development

Ad hoc mobile wireless networks have seen increased adaptation in a variety of disciplines because they can be deployed with simple infrastructures and virtually no central administration. In particular, the development of ad hoc wireless and sensor networks provides tremendous opportunities in areas including disaster recovery, defense, health car

Ad Hoc Mobile Wireless Networks

Abortion

Acclaimed crime writer Kent Anderson's "fiercely authentic and deeply disturbing" police novel, following a Vietnam veteran turned cop on the meanest streets of 1970s Portland, Oregon (Los Angeles Times). Two kinds of cops find their way to Portland's North Precinct: those who are sent there for punishment, and those who come for the action. Officer Hanson is the second kind, a veteran who survived the

war in Vietnam only to decide he wanted to keep fighting at home. Hanson knows war, and in this battle for the Portland streets, he fights not for the law but for his own code of justice. Yet Hanson can't outrun his memories of another, warmer battleground. A past he thought he'd left behind, that now threatens to overshadow his future. An enemy, this time close to home, is prying into his war record. Pulling down the shields that protect the darkest moments of that fevered time. Until another piece of his past surfaces, and Hanson risks his career, his sanity--even his life--for honor.

Clinical Trials in Cardiology

Focuses on organisational goals and those of other stakeholders and society at large. This book provides an insight into the potential benefits and pitfalls, expectations and concerns of advancing a critical view of HRD in practice. It is intended for lecturers, students and practitioners who are aching for a critical analysis.
