Annotation Covering both general and technical information related to PVC use, this illustrated manual discusses the properties of the material, its testing and inspection, hydraulics, design factors, pressure capacity, receiving and storage, installation, testing and maintenance, and service connections. Although intended as an aid to the design, procurement, installation, and maintenance of PVC pipe and fittings, its technical information is not directly correlated to AWAA standards. Appendices feature chemical resistance tables and flow friction loss tables. Annotation copyrighted by Book News, Inc., Portland, OR.

Ductile-Iron Pipe and Fittings

Since the late 1970s, polyvinyl chloride pipes have been used in a significant number of new water distribution systems in North America. While premature fracture failures have been reported for (unplasticized) PVC-U pipes worldwide, with good design and installation practice, current performance standards indicate that water utilities should expect a minimum 50-year service life from a PVC pipe, with expert opinion suggesting that 100 years is a conservative estimate for a properly designed and installed pipe. Quantifying the in-service life expectancy for PVC pipes will enable greater confidence in their use and, as a natural outcome, will also influence long-term asset management and replacement planning

strategies applied by water utilities. The Awwa Research Foundation and CSIRO funded this study in order to be able to outline an approach to estimating in-service lifetimes for (unplasticised) PVC-U (commonly called PVC), (modified) PVC-M, and (oriented) PVC-O pipes, as well as the influence of manufacturing and installation practices on these lifetimes.

This unique book gives approved standards for all types of public works construction - from the depth of paving on roads to the adhesive used on pavement markers. The "Greenbook" standardizes public works plans and specs to provide guidelines for both cities and contractors so they can agree on construction practices used in public works and has been adopted by over 200 cities, counties, and agencies throughout the U.S. This 2012 Edition is the 16th edition, which is updated and republished every three years. In each of the two years between publication of a new Greenbook edition, the changes which have been researched and approved by the committee during the preceding year, are published in pamphlet form as amendments to the current edition. This program maintains a "living" document in public works specifications. Stripes in the margin of each new edition point out significant changes in the text adopted since the preceding edition.

This book offers a view of Iran through politics, history and literature, showing how the three angles combine. Iran, being a revolutionary society, experienced two great revolutions within the short span of just seventy years, from the 1900s to the 1970s. Both were massive revolts of the society against the state; the main objective of the first being to establish lawful government to make modernisation possible, and the second, to overthrow the absolute and arbitrary state, though this time mainly under the banner of religion and Marxism-Leninism and anti-Westernism. Neither of them succeeded in their lofty ideals for reasons that are explained and analysed within. The author also offers a detailed description of Iran's short-term society, examining the political and intellectual lives of two of the most remarkable intellectuals-cum-politicians of the twentieth century. This book provides an overview of modern Persian literature, both poetry and prose, and discusses the works of three of the most remarkable Persian poets and writers of the period. It considers classical Persian literature through the great variety of its form and substance, and neo-classical literary developments in the nineteenth century, covering the whole history of Persian literature. This is crowned in the last chapter by the love poetry of one of the greatest Persian poets. Iran will be of interest to students and scholars of Iranian studies and Middle East Politics.
