Intercultural Communication

'Intercultural Communication' introduces the key theories of intercultural communication and explores ways in which people communicate within and across social groups.

Basic Concepts of Intercultural Communication

Books on intercultural communication are rarely written with an intercultural readership in mind. In contrast, this multinational team of authors has put together an introduction to communicating across cultures that uses examples and case studies from around the world. The book further covers essential new topics, including international conflict, social networking, migration, and the effects technology and mass media play in the globalization of communication. Written to be accessible for international students too, this text situates communication theory in a truly global perspective. Each chapter brings to life the links between theory and practice and between the global and the local, introducing key theories and their practical applications. Along the way, you will be supported with first-rate learning resources, including: • theory corners with concise, boxed-out digests of key theoretical concepts • case illustrations putting the main points of each chapter into context • learning objectives, discussion questions, key terms and further reading framing each chapter and stimulating further discussion • a companion website containing resources for instructors, including multiple choice questions, presentation slides, exercises and activities, and teaching notes. This book will not merely guide you to success in your studies, but will teach you to become a more critical consumer of information and understand the influence of your own culture on how you view yourself and others.

Introducing Intercultural Communication

This newly revised volume is both a lively introduction and practical guide to the main concepts and problems of intercultural communication. Viewed from within the framework of interactive sociolinguistics associated with Tannen, Gumperz, and others, the authors focus in particular on the discourse of westerners and of Asians, the discourse of men and women, corporate discourse and the discourse of professional organizations, and intergenerational discourse. Views intercultural communication from within the framework of interactive sociolinguistics, with an emphasis on discourse

analysis Numerous examples demonstrate the relationship between culture and communication Outlines the methodology of ethnography, and shows how it is used for new research in intercultural communication Illustrates the value of ethnographic research for conducting training and consultation programs.

Globalizing Intercultural Communication

Written to encourage deeper understanding of and an active role in intercultural justice, *Intercultural Communication: A Critical Perspective* provides students with an in-depth examination of contemporary intercultural communication through the lens of power. Through this unique perspective, the book demonstrates how micro communication acts, encounters, and relationships between and within cultural groups can influence and be influenced by macro structures, organizations, and forces - and vice versa. The book begins by introducing the concept of intercultural communication and demonstrating how ubiquitous it is in our everyday lives. Subsequent chapters address the ties between culture, power, and intercultural communication; how powerful ideologies develop from cultural views and ways of life; and the interplay of cultural representation and speaking for or about a cultural group. Readers learn the ways in which individuals and structures of power shape identity, how different structures and groups remember and forget the past, and how racialization relates to intercultural communication. The final chapters explore power dynamics with regard to globalization, intercultural relationships and desire, and our roles in intercultural communication. Rona Tamiko Halualani is a professor of intercultural communication at San José State University. Dr. Halualani is the author of *In the Name of Hawaiians: Native Identities and Cultural Politics*, the co-editor (with Dr. Thomas K. Nakayama) of the *Handbook of Critical Intercultural Communication*, and the former editor-in-chief of the *Journal of International and Intercultural Communication*. She teaches courses on intercultural communication, critical intercultural communication, globalized intercultural communication, and culture and gender identity.

Each chapter focuses on one context and explores the combination of factors within that context, including setting, situation, and circumstances. Highlighting values, ethnicity, physical geography, and attitudes, the book examines means of interaction, including body language, eye contact, and exchange of words, as well as the stages of relationships, cross-cultural management, intercultural conflict, and culture shock.

Experiential Activities for Intercultural Learning

The need for new approaches, methods, and techniques in cross-cultural training and intercultural education are virtually insatiable, especially for experiential activities. The emphasis in this book is on activities that foster the development of intercultural awareness and cross-cultural sensitivity, helping learners understand some of the principal dimensions of intercultural communication, cross-cultural human relations, and cultural diversity. The selections include simulations, case studies, role plays, critical incidents, and individual and group exercises. A number address relatively complex workplace issues; others focus on intercultural dynamics in educational contexts. Some are printed here for the first time; others are culled from less accessible sources. They range from basic introductory activities to those that facilitate the exploration of intercultural issues in significant depth. In an introductory essay, Sheila Ramsey, an experienced scholar and trainer, examines the nature of intercultural training and lays out a conceptual framework for assessing its effectiveness. The rest of the book is made up of activities organized around six facets of intercultural contact: cultural differences for beginners, understanding oneself as a cultural person, the intercultural perspective, working across cultures, cross-cultural "foul-ups," and returning home. Each section opens with an introduction, followed by activities. Each activity includes, at a minimum, objectives, audience, materials required, setting, time required, and procedure for facilitation. Many of the activities include handouts or illustrations. This book will be especially valuable for trainers and educators who want to further ground their work in a solid theoretical base and at the same time augment their resources to expand their repertoire.

Handbook of Intercultural Communication and Cooperation

In 1980, SAGE published Geert Hofstede's Culture's Consequences. It opens with a quote from Blaise Pascal: "There are truths on this side of the Pyrenees that are falsehoods on the other." The book became a classic—one of the most cited sources in the Social Science Citation Index—and subsequently appeared in a second edition in 2001. This new SAGE Encyclopedia of Intercultural Competence picks up on themes explored in that book. Cultural competence refers to the set of attitudes, practices, and policies that enables a person or agency to work well with people from differing cultural groups. Other related terms include cultural sensitivity, transcultural skills, diversity competence, and multicultural expertise. What defines a culture? What barriers might block successful communication between individuals or agencies of differing cultures? How can those barriers be understood and navigated to enhance intercultural communication and understanding? These questions and more are explained within the pages of this new reference work. Key Features: 300 to 350 entries organized in A-to-Z fashion in two volumes Signed entries that conclude with Cross-References and Suggestions for Further Readings Thematic "Reader's Guide" in the front matter grouping related entries by broad topic areas Chronology that provides a historical perspective of the development of cultural competence as a discrete field of study Resources appendix and a comprehensive Index The SAGE Encyclopedia of Intercultural Competence is an authoritative and rigorous source on intercultural competence and related issues, making it a must-have reference for all academic libraries.

Introducing Language and Intercultural Communication

Translating Theory into Practice Globalizing Intercultural Communication: A Reader introduces students to intercultural communication within the global context, and equips them with the knowledge and understanding to grapple with the dynamic, interconnected and complex nature of intercultural relations in the world today. This reader is organized around foundational and contemporary themes of intercultural communication. Each of the 14 chapters pairs an original research article explicating key topics, theories, or concepts with a first-person narrative that brings the chapter content alive and invites students to develop and apply their knowledge of intercultural communication. Each chapter's pair of readings is framed by an introduction highlighting important issues presented in the readings that are relevant to the study and practice of intercultural communication and end-of-chapter pedagogical features including key terms and discussion questions. In addition to illuminating concepts, theories, and issues, authors/editors Kathryn Sorrells and Sachi Sekimoto focus particular attention on grounding theory in everyday experience and translating theory into practice and actions that can be taken to promote social responsibility and social justice.

Intercultural Learning

With the number of international migrants globally reaching an estimated 272 million (United Nations report, September 2019), the need for intercultural training is stronger than ever. and boosting the economic developments of the countries mostly affected by migration. This handbook builds and expands on the previous editions by presenting the rational and scientific foundations of intercultural training and focuses on unique approaches, theories, and areas of the world. In doing so, it gives students, managers, and other professionals undertaking international assignments a theoretical foundation and practical suggestions for improving intercultural training programs.

The use of English as a lingua franca (ELF) on a global scale forces a reassessment of our understanding of the relationships between language, culture and identity in intercultural communication.
