This volume is published with a triple aim: to take a look back over the advances during the ten years of the Mediterranean Burns Club and mark its anniversary; to follow up and strengthen the successful twinning of burns as a clinical, individual illness problem and fires as a societal, disaster management problem; and to look ahead at the perspectives of burn care and fire prevention in the fast-approaching new century. The occasion also marks the tenth annual presentation of the prestigious G. Whitaker International Burns Prize, to which the Mediterranean Burns Club acts as the scientific fulcrum. The award is now established as the most

distinguished recognition in burns science worldwide, and it is gratifying that the contributions of many of the renowned recipients will be found in this book. This is a sequel to *The Management of Mass Burn Casualties and Fire Disasters*, which contained the Proceedings of the First International Conference on Burns and Fire Disasters. The book and the conference have fully justified the authors' initial concept that burn specialists, constantly combatting burn disease and promoting rehabilitation of the victims, especially in mass casualty situations, had for too long remained separate from that other essential sector, the fire-fighting authorities and fire prevention systems, whose aim is also the protection of the individual and the promotion of safety. This long overdue synergism has now become reality, and the present volume strengthens this desirable trend.

## **Scientific Basis for Nuclear Waste Management VI**

It's the ideal go-to reference for the clinical setting! Compact and easy to use, *Manual of Critical Care Nursing, 6th Edition* presents essential information on approximately 80 disorders and conditions, as well as concepts relevant to caring for all critically ill patients and functioning in the critical care environment. Award-winning clinical nurse specialists Marianne Baird and Sue Bethel separate the content first by body system and then by disorder, with each disorder including a brief description of pathophysiology, assessment, diagnostic testing, collaborative management, nursing diagnoses, desired outcomes, nursing interventions, and patient teaching and rehabilitation. A concise format presents the material in a way that reflects a practicing nurse's thought processes. Coverage of approximately 80 critical care conditions/disorders includes those most commonly seen in critical care units. Chapter outlines provide easy access to disorders. A portable size makes it ideal for use in the unit or bedside, and is also easy to carry on campus. Unique! Gerontology icon highlights considerations relating to the care of older adults. Unique! Research briefs in special boxes discuss selected research studies for evidence-based patient care. Unique! The latest NANDA-approved nursing diagnoses increase familiarity with NANDA terminology. Appendixes provide quick reference to information needed in the critical care setting. Revised format mirrors a practicing nurse's approach to patient care, making it easier to find information. Newly formatted care plans incorporate diagnoses, interventions, and desired outcomes in a consistent, logical organization. Patient safety alerts and high alerts call attention to issues important to a patient's safety. Unique! Diagnostic Tests tables highlight the definition, purpose, and abnormal findings for each test. Unique! Collaborative Management tables concisely summarize key points while incorporating nationally recognized guidelines. Colored tabs mark the location of each body system, making topics easier to find. Smaller trim size increases portability for use in the unit or bedside, while enhancing readability.
