The odds of being hit by lightning each year are only about 1 in 750,000 in the U.S. And yet this rare phenomenon has inspired both fear and fascination for thousands of years. In this groundbreaking, brilliantly researched book, journalist John S. Friedman probes lightning's scientific, spiritual, and cultural roots. Blending vibrant history with riveting first-hand accounts of those who have clashed with lightning and lived to tell about it, *Out of the Blue* charts an extraordinary journey across the

ages that explores our awe and dread in the face of one of nature's most fearsome spectacles. Herman Melville called it "God's burning finger." The ancient Romans feared it as the wrath of God. Today we have a more scientific understanding, so why our eternal fascination with lightning? Out of the Blue attempts to understand this towering force of nature, exploring the changing perceptions of lightning from the earliest civilizations through Ben Franklin's revolutionary experiments to the hair-raising adventures of storm chasers like David Hoadley, who's been chronicling extreme weather for half a century. And Friedman describes one of the most treacherous rescues ever attempted in American mountain climbing. Friedman profiles a Virginia ranger who was struck by lightning seven times—and dubbed the human lightning rod—along with scores of others who tell astonishing tales of rescue and survival. And he charts lightning's profound, life-altering effects on the emotional and spiritual lives of its victims. Combining captivating fact with thrilling personal stories, Out of the Blue tells a remarkable true tale of fate and coincidence, discovery and divine retribution, science and superstition. As entertaining as it is informative, it is a book for outdoor adventurers, sports enthusiasts, science and weather buffs, nature lovers, and anyone who has ever been awed or frightened by the sight of lightning. From the Hardcover edition.

Here are more scathingly funny tales from the wild side! Laurie Notaro survived the debauched ride of her twenties and the bumpy road to matrimony. Now she's ready to take on the thirtysomething years . . . and almost middle age has never been more hilarious. Laurie is married, mortgaged, and now—miraculously—employed in the corporate world, discovering that bosses come in all shapes, sizes, and degrees of mental stability. After maxing out her last good credit card at Banana Republic, she's dressed for success and ready to face the jungle: surviving feral, six-foot-plus Gretchen ("Three Thousand Faces of Eve") before battling the overbearing, overstuffed (in way-too-small pants) new mom Suzzi, who ruthlessly cancels Laurie's newspaper column and learns that payback can be a bitch. Laurie also explores the backstabbing world of preschoolers at a Halloween party, the X-rated madness of a family trip to Disneyland, and the pressure from her QVC-addicted mother and the rest of the world to reproduce. But while losing more friends to babies than to booze, she realizes there's a plus side: at least for a couple of months she gets to be the thinner friend. *I Love Everybody (and Other Atrocious Lies)* is Laurie Notaro at her deliciously quirky best. Can a woman prone to what her loved ones might term "meltdowns" (she considers them "Opportunities to Enlighten") put a smile on her face and love everybody? Take a guess.

This book is about using art as an instrument of personal transformation, enabling us to move from an inherited to a chosen state of being. Peter London offers inspiration and fresh ideas to artists, art students, and art teachers—as well as to people who think they can't draw a straight line but want to explore the joys of creative expression. Inside every person, he believes, there is an original, creative self that has been covered over by secondhand ideas, borrowed beliefs, and conditioned behavior. powers of that original self. Among the topics and exercises included are: • How to increase the ability to visualize, fantasize, and dream • Obstacles to the creative encounter and what to do about them • Experimenting with art media as true mediators between imagination and expression • Making masks to reveal the hidden self • Painting with "forbidden" colors • Arranging found objects as metaphors for one's life

## **Signature Sins**

The Defeat of the Mind examines the opposition to Enlightenment thought from the eighteenth century to the present. Finkelkraut asserts that the ostensibly progressive cast of third world anticolonial and anti-Western sentiment, paradoxically, has its antecedent in Eurocentric sources - chiefly the German romantic concept of the Volksgeist, or spirit of the people. Straightforward and succinct, Finkelkraut draws a line between the idea of culture as an expression of the life of the mind and culture as an expression of national spirit. He deplores the appropriation of the concept of the Volksgeist by ethnic nationalists, who employ the notion in justification of such horrors as the Final Solution in Nazi Germany and the current waves of "ethnic cleansing." Equally worrying, he claims, are the seemingly harmless infusions of the Volksgeist into campaigns for ethnic diversity espoused by some social scientists and third world intellectuals. The Defeat of the Mind questions notions of cultural relativism espoused by such intellectual and political leaders as Claude Levi-Strauss and Frantz Fanon. Finkelkraut points to the United Nations and UNESCO - founded to propagate the universalist ideals of Enlightenment Europe, these organizations have co-opted the notion of cultural relativism to a fault, now speaking on behalf of every ethnic prejudice. "The objective remained the same," Finkelkraut maintains of this shift in ideology, "but to achieve its goal, it was no longer a matter of opening others to reason, but of opening ourselves to the reason of others." Defending values that seem absent from many contemporary frames of reference, the book concludes with a chapter challenging post-modernist thought, for Finkelkraut claims that it equates the value of novels by Flaubert with television movies and lacks concern for the survival of culture and reason.

## **American Star**

Finally--a safe place to talk about sin. The topic of sin in general has been safe for a while. But here, guided by psychologist Michael Mangis, we get specific by learning to know ourselves and our signature sins--the individual and specific patterns of sin in our life that affect our thoughts, actions and relationships. In these pages, the author empathetically and honestly reflects on the ways we manage our behavior to hide our sin and ignore the true poverty of our hearts. But until we deal with the root of our sin, we will be ruled and fooled by it, and miss the

freedom Christ died to bring. Exploring common forms of sin and then discovering how our own temperament, culture, family and gender affect the way those sins manifest themselves in our lives will lead us to a place of real honesty with ourselves, God and others. But the book doesn't stop there; it also shows ways to combat our sin so that we can change our hearts, not just our behavior. Sin is serious and specific, and it doesn't go away on its own. But here is serious--and safe--help for facing sin and finding freedom in Christ.

Philosophy of Social Science provides a tightly argued yet accessible introduction to the philosophical foundations of the human sciences, including economics, anthropology, sociology, political science, psychology, history, and the disciplines emerging at the intersections of these subjects with biology. Philosophy is unavoidable for social scientists because the choices they make in answering questions in their disciplines force them to take sides on philosophical matters. Conversely, the philosophy of social science is equally necessary for philosophers since the social and behavior sciences must inform their understanding of human action, norms, and social institutions. The fifth edition retains from previous editions an illuminating interpretation of the enduring relations between the social sciences and philosophy, and reflects on developments in social research over the past two decades that have informed and renewed debate in the philosophy of social science. An expanded discussion of philosophical anthropology and modern and postmodern critical theory is new for this edition.

When Harold Bell Lasseter disappeared in late 1930 it could have been the end of a mystery. Thirty-three years earlier he had staggered out of the desert, almost dead, his pockets bulging with gold, claiming to have found a 15 kilometre gold reef. The mystery deepened when he and a surveyor returned to the isolated and mysterious ranges where the reef was supposed to be located. It became legendary when the largest inland expedition since Burke and Wills was launched. In Lasseter's Gold, Warren Brown vividly recreates the drama of the search - the characters, the fights, the soaring temperatures, the impossible terrain, the plane crash, the pistol-carrying dingo-skinner who appeared out of nowhere. And just who was this man Lasseter? A one-time sailor, a bigamist, a man who claimed John Bradfield stole his plans for a single-span bridge to cross Sydney Harbour - was he also a very, very good liar? Lasseter's Gold is the gripping story of an outback legend. Is it just a myth - or is there really a massive gold reef out there, just waiting to be discovered?
