Cambridge IGCSE™ French Student Book Third Edition

A comprehensive second edition of Cambridge IGCSE® Geography, revised for first examination from 2016. The only revision guide endorsed by Cambridge International Examinations for the 0460 syllabus. From tourism in Kenya to the summit of an active volcano in Japan, this revision guide helps students understand the processes that affect physical and human environments on a local, regional and global scale. The narrative style of the revision guide, with detailed explanations, complements the range of activities in the coursebook. Exam-style questions, international case studies and example maps, give students practice with course content in preparation for assessment. Sample answers to all the questions are in the back of the book.

Cambridge IGCSE® Biology Maths Skills Workbook

This edition of our successful series to support the Cambridge IGCSE Biology syllabus (0610) is fully updated for the revised syllabus for first examination from 2016. Mathematics is an integral part of scientific study, and one that students often find a barrier to progression in science. Students can find it difficult to apply maths knowledge to science scenarios, even if they have encountered the maths concept previously. The Maths Skills for Cambridge IGCSE Biology write-in

workbook allows students to practise their maths skills in science contexts. This resource has been written in collaboration with the Association for Science Education (ASE), based on research carried out with the Nuffield Foundation. The accompanying teacher's guide provides support for teachers to teach mathematical concepts in science lessons.

Cambridge International AS and A Level Biology

Cambridge IGCSE® Combined and Co-ordinated Sciences Coursebook with CD-ROM

Breakthrough to CLIL for Biology Age 14+ Workbook

A series of workbooks offering integrated content and language support for specific subjects. Breakthrough to CLIL for Biology, Age 14+ helps ESL/EAL students get the most out of their studies when learning subjects through the medium of English. The workbook contains exercises set within the context of core topics to consolidate understanding, embedding practice in aspects of language central to

the subject in question. It is designed to support any Biology curriculum for students aged 14-16, including UK GCSE, Cambridge IGCSE® and IB MYP. The book should be used alongside a core textbook as well as classroom instruction. Endorsed by Cambridge International Examinations for language support.

Biology

An essential textbook for any student or researcher in biology needing to design experiments, sample programs or analyse the resulting data. The text begins with a revision of estimation and hypothesis testing methods, covering both classical and Bayesian philosophies, before advancing to the analysis of linear and generalized linear models. Topics covered include linear and logistic regression, simple and complex ANOVA models (for factorial, nested, block, split-plot and repeated measures and covariance designs), and log-linear models. Multivariate techniques, including classification and ordination, are then introduced. Special emphasis is placed on checking assumptions, exploratory data analysis and presentation of results. The main analyses are illustrated with many examples from published papers and there is an extensive reference list to both the statistical and biological literature. The book is supported by a website that provides all data sets, questions for each chapter and links to software.
