A bestselling art historian and a free speech advocate explore subtle new forms of censorship in the art world and beyond. "In private, museum people have told me that self-censorship is indeed the order of the day. But it is quite rare for an official to speak about it in public. Self-censorship occurs behind closed doors. There are practically no whistle-blowers."Hans Haacke, conceptual artist known for his socially and

politically engaged art If your idea of censorship is an anonymous bureaucrat in a government office exercising prudish control over "offensive" art and speech, wake up and smell the conglomeration. Censorship today is just as likely to be the result of a market force or a bandwidth monopoly as a line edit or the covering of a nude sculpture, and the current system of new technologies and economic arrangements has subtle, built-in mechanisms for suppressing free expression as powerful as any known in other centuries. In *Censoring Culture*, the nationally known author of the *ArtSpeak* books and the head of the National Coalition Against Censorship's Arts Program bring together the latest thinking from art historians, cultural theorists, legal scholars, and psychoanalysts, as well as first-person accounts by artists and advocates, to give us a comprehensive understanding of censorship in a new century. Contributors include: J.M. Coetzee, Judy Blume, and others on self-censorship Hans Haacke on the marriage of art and money DeeDee Halleck on the military-media-industrial complex Marjorie Heins on violence and children Randall Kennedy on the risks of regulating hate speech Lawrence Lessig on creativity and copyright in the electronic age Judith Levine on shielding children from sex Diane Ravitch on sensitivity guidelines for national testing Douglas Thomas on hackers and hacking culture

profoundly new history of early modern English censorship, one that bears centrally on issues still current: the rhetoric of ideological extremism, the use of defamation to ruin political opponents, the grounding of law in theological ethics, and the terrible fragility of public spheres. Starting from the question of why no one prior to the mid-1640s argued for free speech or a free press per se, *Censorship and Cultural Sensibility* surveys the texts against which Tudor-Stuart censorship aimed its biggest guns, which turned out not to be principled dissent but libels, conspiracy fantasies, and hate speech. The book explores the laws that attempted to suppress such material, the cultural values that underwrote this regulation, and, finally, the very different framework of assumptions whose gradual adoption rendered censorship illegitimate. Virtually all substantive law on language concerned defamation, regulating what one could say about other people. Hence Tudor-Stuart laws extended protection only to the person hurt by another's words, never to their speaker. In treating transgressive language as akin to battery, English law differed fundamentally from papal censorship, which construed its target as heresy. There were thus two models of censorship operative in the early modern period, both premised on religious norms, but one concerned primarily with false accusation and libel, the other with false belief and immorality. Shuger investigates the first of these models—the dominant English one—tracing its complex origins in the Roman law of iniuria through medieval theological ethics and Continental jurisprudence to its continuities and discontinuities with current U.S. law. In so doing, she enables her reader to grasp how in certain contexts

## **The Media Monopoly**

One of Mashable's "17 books every activist should read in 2019" Twenty years after Columbine, a leading gun control activist offers a radical argument for the gun control movement our country desperately needs. Ninety-six people die from guns in America every single day. Twelve thousand Americans are murdered each year. The United States has more mass shootings, gun suicides, and nonfatal gun injuries than any other industrialized country in the world. Gun-safety advocates have tried to solve these problems with incremental changes such as background checks and banning assault style military weapons. They have fallen short. In order to significantly and permanently reduce gun deaths the United States needs a bold new approach: a drastic reduction of the 390 million guns already in circulation and a new movement dedicated to a future with fewer guns. In *Guns Down*, Igor Volsky tells the story of how he took on the NRA just by using his Twitter account, describes how he found common ground with gun enthusiasts after spending two days shooting guns in the desert, and lays out a blueprint for how citizens can push their governments to reduce the number of guns in circulation and make firearms significantly harder to get. An aggressive licensing and registration initiative, federal and state buybacks of millions of guns, and tighter regulation of the gun industry, the gun lobby, and gun sellers will

build safer communities for all. Volsky outlines a New Second Amendment Compact developed with policy experts from across the political spectrum, including bold reforms that have succeeded in reducing gun violence worldwide, and offers a road map for achieving transformative change to increase safety in our communities.

More than 115 entries clearly explain the who, what, when, and where of art since 1945. Some entries deal with concepts, such as formalism, multiculturalism, and the picture plane; some discuss specific movements, such as Abstract Expressionism and Fluxus; some describe various ways of making art, such as collage, performance, and video. Together they provide an invaluable key to the specialized, often baffling vocabulary so often used in today's art world. Complementing the entries are two additional noteworthy features. The first, a one-page ArtChart, presents the movements of the postwar years in a concise format that makes their chronological connections immediately visible. The second is a twenty-eight-page timeline - illustrated with full-color reproductions of paintings, sculptures, and installations - that chronicles events in the art world and the world at large, providing a context for the entries that follow, in addition, for this updated and revised edition, birth and death dates for the artists have been added to the index, along with their

### **Censorship in South Asia**

An examination of how the media is under fire and how to safeguard journalists and the information they seek to share with the public. Journalists are being imprisoned and killed in record numbers. Online surveillance is annihilating privacy, and the Internet can be brought under government control at any time. Joel Simon, the executive director of the Committee to Protect Journalists, warns that we can no longer assume that our global information ecosystem is stable, protected, and robust. Journalists are increasingly vulnerable to attack by authoritarian governments, militants, criminals, and terrorists, who all seek to use technology, political pressure, and violence to set the global information agenda. Reporting from Pakistan, Russia, Turkey, Egypt, and Mexico, among other hotspots, Simon finds journalists under threat from all sides. The result is a growing crisis in information—a shortage of the news we need to make sense of our globalized world and fight human rights abuses, manage conflict, and promote accountability. Drawing on his experience defending

He proposes ten key priorities, including combating the murder of journalists, ending censorship, and developing a global free-expression charter to challenge the criminal and corrupt forces that seek to manipulate the world's news. “Wise and insightful. Art is continuously subjected to insidious forms of censorship. This may be by the Church to guard against moral degeneration, by the State to promote a specific political agenda or by the art market, to elevate one artist above another. Now, and in the last century, artwork that touches on ethnic, religious, sexual, national or institutional sensitivities is liable to be destroyed or hidden away, ignored or side-lined. Drawing from new research into historical and contemporary case-studies, *Censoring Art: Silencing the Artwork* provides diverse ways of understanding the purpose and mechanisms of art censorship across distinct geopolitical and cultural contexts from Iran, Japan, and Uzbekistan to Britain, Ireland, Canada, Macedonia, Soviet Russia, and Cyprus. Its contributions uncover the impact of this silent control of the production and exhibition of art and consider

curatorship takes and offer creative strategies for negotiating curatorial integrity. This is the first book to look at pressures to self-censor and the curatorial responses to these pressures from a wide range of international perspectives. The book offers examples of the many creative strategies that curators deploy to negotiate pressures to self-censor and gives evidence of curators' political acumen, ethical sagacity and resilience over the long term. It also challenges the assumption that self-censorship is something to be avoided at all costs and suggests that a decision to self-censor may sometimes be politically and ethically imperative. *Curating Under Pressure* serves as a corrective to the assumption that censorship pressures render practitioners impotent. It demonstrates that curatorial practice under pressure offers inspiring models of agency, ingenuity and empowerment. *Curating Under Pressure* is a highly original and intellectually ambitious volume and as such will be of great interest to students and academics in the areas of museum studies, curatorial and gallery studies, art history, studio art and arts administration. The book will also be an essential tool for museum practitioners.

before. But red and blue states, secular and religious groups, liberal and conservative idealists, and Republican and Democratic representatives all have one thing in common: each believes their distinct cultures and liberties are being threatened by an escalating violent opposition. This polarized tribalism, espoused by the loudest, angriest fringe extremists on both the left and the right, dismisses dialogue as appeasement; if left unchecked, it could very well lead to secession. An engaging mix of cutting edge research and fair-minded analysis, *Divided We Fall* is an unblinking look at the true dimensions and dangers of this widening ideological gap, and what could happen if we don't take steps toward bridging it. French reveals chilling, plausible scenarios of how the United States could fracture into regions that will not only weaken the country but destabilize the world. But our future is not written in stone. By implementing James Madison's vision of pluralism—that all people have the right to form communities representing their personal values—we can prevent oppressive factions from seizing absolute power and instead maintain everyone's beliefs and identities across all fifty states. Reestablishing national unity will require the bravery to commit ourselves to embracing qualities of kindness, decency, and grace towards those we disagree with ideologically. French calls on all of us to demonstrate true tolerance so we can heal the American divide. If we want to remain united, we must learn to stand together again.

## **10 Excellent Reasons for National Health**

## Care

Public health officials and organizations around the world remain on high alert because of increasing concerns about the prospect of an influenza pandemic, which many experts believe to be inevitable. Moreover, recent problems with the availability and strain-specificity of vaccine for annual flu epidemics in some countries and the rise of pandemic strains of avian flu in disparate geographic regions have alarmed experts about the world's ability to prevent or contain a human pandemic. The workshop summary, *The Threat of Pandemic Influenza: Are We Ready?* addresses these urgent concerns. The report describes what steps the United States and other countries have taken thus far to prepare for the next outbreak of "killer flu." It also looks at gaps in readiness, including hospitals' inability to absorb a surge of patients and many nations' incapacity to monitor and detect flu outbreaks. The report points to the need for international agreements to share flu vaccine and antiviral stockpiles to ensure that the 88 percent of nations that cannot manufacture or stockpile these products have access to them. It chronicles the toll of the H5N1 strain of avian flu currently circulating among poultry in many parts of Asia, which now accounts for the culling of millions of birds and the death of at least 50 persons. And it compares the costs of preparations with the costs of illness and death that could arise during an outbreak.

thorough examination of the complex relationship between art and politics, and the many forms and approaches the engagement between them can take. The contributors - a diverse assembly of artists, activists, scholars from around the world - discuss and demonstrate ways of making art and politics legible and salient in the world. As such the 32 chapters in this volume reflect on performing and visual arts; music, film and new media; as well as covering social practice, community-based work, conceptual, interventionist and movement affiliated forms. The Companion is divided into four distinct parts: Conceptual Cartographies Institutional Materialities Modalities of Practice Making Publics Randy Martin has assembled a collection that ensures that readers will come away with a wider view of what can count as art and politics; where they might find it; and how it moves in the world. The diversity of perspectives is at once challenging and fortifying to those who might dismiss political art on the one hand as not making sufficient difference and on the other to those embracing it but seeking a means to elaborate the significance that it can make in the world. The Routledge Companion to Art and Politics brings together a range of issues and approaches and encourages critical and creative thinking about how art is produced, perceived, and received.

## **Fahrenheit 451**

Asceticism, so it is argued in this volume, is a modern category. The ubiquitous cult of the body, of fitness and diet equally evokes the ongoing success of ascetic practices and beliefs. Nostalgic memories of hardship and discipline in the army, youth movements or boarding schools remain as present as the fashionable irritation with the presumed modern-day laziness. In the very texture of contemporary culture, age-old asceticism proves to be remarkably alive. Old ascetic forms were remoulded to serve modern desires for personal authenticity, an authenticity that disconnected asceticism in the course of the nineteenth century from two traditions that had underpinned it since classical antiquity: the public, republican austerity of antiquity and the private, religious asceticism of Christianity. Exploring various aspects such as the history of the body, of aesthetics, science, and social thought in several European countries (Great Britain, France, Germany, Austria and Belgium), the authors show that modern asceticism remains a deeply ambivalent category. Apart from self-realisation, classical and religious examples continue to haunt the ascetic mind.

The internet raises novel and complex challenges to existing regulatory regimes. Efforts towards legal harmonization at the European Union, Council of Europe, and United Nations level are examined in this context and the utility of additional and alternative methods of regulation explored. This book argues that effective implementation, enforcement and harmonization of laws could substantially help to reduce the availability and dissemination of child pornography on the internet. At the same time, panic-led policies must be avoided if the wider problems of child sexual abuse and commercial sexual exploitation are to be meaningfully addressed.

### **The New Censorship**

Something is going wrong on many college campuses in the last few years. Rates of anxiety, depression, and suicide are rising. Speakers are shouted down. Students and professors say they are walking on eggshells and afraid to speak honestly. How did this happen? First Amendment expert Greg Lukianoff and social psychologist Jonathan Haidt show how the new problems on campus have their origins in three terrible ideas that have become increasingly woven into American childhood and education: what doesn't kill you makes you weaker; always trust your feelings; and life is a battle between good people and evil people. These three Great Untruths are incompatible with basic psychological principles, as well as ancient wisdom from many cultures. They interfere with healthy development. Anyone who embraces these untruths—and the resulting culture of safetyism—is less likely to become an autonomous adult able to navigate the bumpy road of life. Lukianoff and Haidt investigate the many social trends that have intersected to produce these untruths. They situate the conflicts on campus in the context of America's rapidly rising political polarization, including a rise in hate crimes and off-campus provocation. They explore changes in childhood including the rise of
