This book examines the state of print and electronic media in the United States of America, Europe, and China. The latest mass communication advances demonstrate that we live in an increasingly media-centric world. The chapters include theoretical and empirical studies that shed light on the meaning of this development. The trajectory of people's move to electronic communication is a global phenomenon affecting their daily life. Does this trend aid or impede democracy? Is there an emerging digital divide contributing to an increasing gap between the rich and poor people and nations? The four parts of this book explore various aspects of political socialization and its relationship with different media, including print, broadcasting, and the Internet.

This master-class-in-a-book is designed to guide teachers of mindfulness-based interventions (MBI) in continuing to develop more competence while raising global standards of practice and pedagogy. Starting with the central yet elusive concept of stewardship, it then expands upon the core components of MBI pedagogy. A series of reflective essays by MBI teachers from around the world foregrounds differences and challenges in meeting participants "where they are." Such reflections are both inspiring and thought-provoking for teachers —wherever they are. The book also provides practical guidance and tools for adjusting teaching style and content for special populations, from chronic pain patients to trauma survivors, from health care professionals to clergy, and including many others. Detailed scripts and practices, ready to adopt and adapt, offer opportunities to

explore new directions in the classroom, and to continue the life-long development of the teacher. Included in the coverage: Deepening teachers' skills of guidance of meditation practices Insights into the essential practice of inquiry and dialogue with participants New practices that allow participants to explore mindfulness together in a spoken encounter How to keep up with, review, and make clear to participants the range of scientific evidence supporting the MBIs The breadth of practical insights and hands-on strategies makes Resources for Teaching Mindfulness a unique developmental asset for a wide range of practitioners around the world. Among those who will benefit are physicians and other medical practitioners, health and clinical psychologists, marriage and family therapists, nurses, clinical social workers, physical and occupational therapists, health educators, and organizational development specialists.

An authoritative, self-contained introduction to the subject for students who have had no prior coursework in syntactic theory. English Syntax is an authoritative, self-contained introduction to the subject for students who have had no prior coursework in syntactic theory. The detailed revisions throughout this new edition are aimed at increasing its clarity and usefulness. There are changes in almost every chapter, including a large number of new exercises and several new subsections. In addition there are two new appendixes, the first sketching the relation of English syntax to the wider field of generative syntactic theory, the second summarizing the basic syntactic structures discussed in the body of the text. Specific changes include a fuller discussion, at the beginning of chapter 3, of the difference between complements and modifiers; a more systematic introduction to tree diagrams and what they express, at the end of chapter 3; a

new subsection in chapter 4 on how to analyze complex structures; a new discussion of the general nature of missing-phrase constructions in chapter 9; a significant revision of the discussion of comparative clauses in chapter 12; a new discussion of the scope of negation in chapter 15; and, in chapter 16, a new discussion of practical strategies for analyzing conjoined structures.

## **Personal Finance**

Essentials of Managerial Finance is the classic that started the First in Finance franchise. Now in its Thirteenth Edition, this best-selling text is renowned for its excellent blend of theoretical and applied material, comprehensive support package, and applicable real-world examples. In addition to its continued coverage of such hot topics as multinational finance, ethical dilemma discussions are incorporated throughout the text. Formerly known as "Weston/Besley/Brigham", Scott Besley is now the primary author.

## **Digital Science**

This best-selling text, GENERAL CHEMISTRY by Whitten/Davis/Peck/Stanley, is best summarized by "classic text, modern presentation." This simple phrase underlies its strong emphasis is on fundamental skills and concepts. As in previous editions, clearly explained problem-solving strategies continue to be the strength of this student-friendly text. This revision builds on the highly praised style and applications to everyday life that have earned this text a reputation as the voice of authority in general chemistry. Whitten always has been viewed as one of the few truly "traditional" general chemistry texts. Examples of this are that the text covers Thermodynamics, normally a topic split into two parts and covered in two different semesters, in one chapter and begins the second half of the course. GENERAL CHEMISTRY, Seventh Edition also follows a standard narrative-example-problem format, has a solid traditional writing style, and promotes problem solving. However, the authors have added some new elements over the years to reflect changes in chemical education. These include adding in conceptual questions in the problem sets, adding features like the Chemistry In Use boxes to show how chemistry is used in daily life, and further promoting problem solving by including hints and checks for students.

The modern electronic testing has a forty year history. Test professionals hold some fairly large conferences and numerous workshops, have a journal, and there are over one hundred books on testing. Still, a full course on testing is offered only at a few universities, mostly by professors who have a research interest in this area. Apparently, most professors would not have taken a course on electronic testing when they were students. Other than the computer engineering curriculum being too crowded, the major reason cited for the absence of a course on electronic testing is the lack of a suitable textbook. For VLSI the foundation was

provided by semiconductor device technology, circuit design, and electronic testing. In a computer engineering curriculum, therefore, it is necessary that foundations should be taught before applications. The field of VLSI has expanded to systems-on-a-chip, which include digital, memory, and mixed-signal subsystems. To our knowledge this is the first textbook to cover all three types of electronic circuits. We have written this textbook for an undergraduate "foundations" course on electronic testing. Obviously, it is too voluminous for a one-semester course and a teacher will have to select from the topics. We did not restrict such freedom because the selection may depend upon the individual expertise and interests. Besides, there is merit in having a larger book that will retain its usefulness for the owner even after the completion of the course. With equal tenacity, we address the needs of three other groups of readers.

The Earth-Sheltered Solar Greenhouse Book is the first to promote the benefits of both passive solar energy and earth sheltering in greenhouse design. This combination results in greenhouses which need no additional heating. The captured sun's energy and that which is stored in the earth is enough for successful year round harvest. It takes you step by step through the construction of an inexpensive greenhouse which may be built with either newly purchased or salvaged building materials for pennies on the dollar. It explains the author's unique Post/Shoring/Polyethylene construction methods and design techniques. The Earth-Sheltered Solar Greenhouse Book has 230 pages with nearly 200 illustrations, photos, diagrams, lists, charts and drawings. It contains all the information you need to free you from the pesticide, herbicide, fungicide, waxed, and E-coli laden, genetically modified and irradiated supermarket produce.
