Aspen Plus is one of the most popular process simulation software programs used industrially and academically. Though the software is available at many corporations and universities, there are no textbooks which are dedicated to teaching the step-by-step use of the software. This book is designed to fill that need. The structure of the book is unique in that it emulates a lecture/workshop classroom environment. Each chapter starts with the equivalent of a classroom lecture followed by workshops which provide experience in the chapter's subject matter. The enclosed CD contains solutions, both in Aspen Plus and text formats, to examples imbedded in the text as well as to all the workshops. There are also notes at the end of each chapter designed to aid readers that have difficulty with the workshops. The Basics of Media Writing: A Strategic Approach helps readers develop the essential writing skills and professional habits needed to succeed in 21st-century media careers. This research-driven, strategy-based media writing textbook digs deeply into how media professionals think and write in journalism, public relations, advertising, and other forms of strategic communication. Authors Scott A. Kuehn and Andrew Lingwall have created two comprehensive writing models to help students overcome their problems in finding and developing story topics by giving them “starting points” to begin writing. The Professional Strategy Triangle model shows students how to think critically about the audience, the situation, and the message before starting a news story or persuasive piece and the FAJA four-point model asks students a series of questions about their story type (Fact, Analysis, Judgment, or Action) to guide them to the right angle or organizational structure for their message. Rooted in classical rhetorical methods, this step-by-step technique enables readers to strategically approach each writing task, no matter the format.

The Basics of Special Needs

The ambition of the Chapter 11 system is enormous. Failing businesses can file a petition in bankruptcy, give themselves some breathing room, and take a final chance to save their businesses. Large or small, desperately sliding into collapse or merely in serious trouble, a company can attempt to reorganize or, if necessary, can arrange a more orderly burial. This book is about that system. This is a small book that tours a large system, guided on the one hand by the statutory structure and on the other by how the system operates in practice. This book sacrifices coverage of every possible twist in favor of a more coherent overview that exposes some of the tensions, the contradictions, and the genius that comprise Chapter 11. Whatever else may be learned from this book, I hope these pages give a sense of just how interesting the world of business failure and rebirth can be - Elizabeth Warren.

Basics Of Electrical And Electronics Engineering

The Preface offers an overview of why this book was written and outlines mans' necessity to change his ways to keep pace with the rapid advances in the technological, biochemical, and medical fields each outpacing our legal and moral infrastructures. There are as many beliefs in how and when God's promised salvation will be attained as there denominations, independent churches, and evangelists preaching the subject. Such preaching is not Biblical unless it follows the sequence of Resurrection before Judgment, and Judgment before Salvation. Otherwise, constant Judgments would be required if souls go directly to heaven as many preach. The Bible explains only two separate Judgments. The message of the Bible is that when man, or women die, they enter 'The Sleep of Death', not to be resurrected until the day Jesus returns, Then, after receiving a favorable judgment, can salvation be attained. The book documents when and where salvation will be rewarded, and who and who not, will receive it. Since many preceded Christ Jesus on earth, the writing covers how the just and righteous amongst the ancient peoples will be treated. The where salvation will occur is presented in this writing for the first time. It is designated Cyberheavens, representing where in God's universe He will choose to house the vast numbers of the just and righteous to be awarded eternal salvation, These will be from many time frames back to the days of Able, almost 6,000 years ago. It will fulfill Gods' glory to Himself for His creation of man and the universe. God's complete Plan of Salvation is presented for the first time, historically and Biblically, in four distinct phases covering a time frame of 400 years.
