Students of professional qualifications often work in the dark. Many take no formal tuition and are often left to learn off the page. Many students learn the theory but are unable to identify what the question requires. They miss marks they could, and should have picked up for material they have spent precious time studying. They fail exams they have the ability to pass. This book spotlights what examiners look for and helps you ask, and answer, this key question - What exactly does the examiner want? The book covers exam techniques, how to approach different styles of question (such as CBA, essays, case studies) how to lay out your work, etc. Written in a straightforward manner, this study buddy gets the point across clearly without dumbing down important messages. Cartoons, illustrations and mind-maps show you how you should be thinking, and what you should be doing in order to work smarter, not harder. ### **Management Accounting Case Study**

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

By chance they are caught up in the diamond dealings, elephant and rhino poaching operations run by a notoriously ruthless individual, Jan Van Zyl. Their involvement leads to a series of exciting and dangerous adventures, as they chase across Africa and the Indian Ocean islands in their endeavour to help bring the man to justice.
