Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to:

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems
- Feed exploits through infotainment and vehicle-to-vehicle communication systems
- Override factory settings with performance-tuning techniques
- Build physical and virtual test benches to try out exploits safely

If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

French Text An icon of its era, here is the saga of the "double chevron" from its inception through 1944. This book investigates the ways in which Citroen appealed to our French (and European) grandparents, and how Citroen became a part of daily life. You can discover André Citroen's first steps in industry - his factories, advertising, and of course, his cars, from the first Type A and the 5HP to the half-tracks, trucks, and buses. Also covered are the famous "Traction," the 2CV (planned for 1939!) and the Resistance and Occupation Citroens, finished with a flourish when production resumed just after the war and Citroen experienced the immediate success of the "11." It is truly a beauty of a book, full of many unpublished photos and documents.

Lewis Cane fought with the French Resistance during the Second World War and gained a justified reputation as a tough and resourceful man. So it's no great surprise when one of his ex-Resistance comrades, now a successful lawyer in the early 1960s in Paris employs him to escort a businessman from Brittany to Liechtenstein for a crucial meeting. There are just two problems: the man's associates don't want him to get there, and the police have a warrant out for the man's arrest on a charge of rape. For Cane, it becomes a desperate race across France, fighting against resourceful and ruthless adversaries and avoiding the forces of law and order every step of the way
