New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

Minutes of Evidence Taken Before the Royal Commission on Mines

This book draws together the perceptions and experiences from a range of international professionals with specific reference to food education. It presents a variety of teaching, learning and curriculum design approaches relating to food across primary, secondary and vocational school education, undergraduate initial teacher education programs, and in-service professional development support contexts. Contributions from authors of a variety of background and countries offer insight into some of the diverse issues in food education internationally, lessons to be learned from successes and failures, including action points for the future. The book will be both scholarly and useful to teachers in primary and secondary schools.

The Get Qualified series provides clear and concise guidance for people looking to work within the electrical industry. This book outlines why the inspection and testing of electrical installations is important, and what qualifications are required in order to test, inspect and certify. All you need to know about the subject of inspection is covered in detail, making this book the ideal guide for those who are new to the subject and experienced professionals alike. There are also sections on exam preparation, revision exercises and sample questions.

Elementary Manual on Applied Mechanics

Addresses the areas highlighted as poor in the Chief Examiner's feedback of candidate performance Assists students in decoding questions found in the City and Guilds 2394 and 2395 exams Uses realistic exam questions as examples and rather than simply providing the answers, explains how the student should go about answering a question of that type. An essential guide to the City and Guilds 2394/2395 Initial Verification and Certification of Electrical Installation and Periodic

Inspection and Testing qualifications, this book addresses the areas which have resulted in a considerable failure rate, such as the technical and legal terminology used within these exams. Full coverage of technical terms is included, as is the structure of exam questions and their interpretation. By running through examples of real exam questions in a step-by-step fashion, this book explains how to decode the questions and examine the answer choices in order to get to the correct answers. This book is ideal for all electricians, regardless of their experience, who need a testing qualification in order to take the next step in their career.
