Better Health Systems for India's Poor

This report focuses on health sector reform and outlines some broad measures for reform in this sector. It evaluates policy options and presents the theory and evidence to support these policy choices. This report also offers specific proposals to improve health policy and strengthen implementation across India. It is a product of extensive consultation and research undertaken by more than a dozen institutions.

The financial services industry has a dark secret, one that costs global investors about \$2.5 trillion per year. This secret quietly drains the investment portfolios and retirement accounts of almost every investor. In 1900, French mathematician, Louis Bachelier, unsuspectingly revealed this disturbing fact to the world. Since then, hundreds of academic studies have supported Bachelier's findings. This book offers overwhelming proof of this, and shows investors how to obtain their optimal rate of return by matching their risk capacity to an appropriate risk exposure. A globally diversified portfolio of index funds is the optimal way to accomplish this. Index Funds is the treatment of choice for wayward investors. Below market returns in investment portfolios and pension accounts are the result of investors

gambling with their hard earned money. This 12-Step Program will put active investors on the road to recovery. Each step is designed to bring investors closer to embracing a prudent and sound strategy of buying, holding, and rebalancing an index portfolio.

This report is WHO's thirteenth annual report on global tuberculosis (TB) control in a series that started in 1997. It presents WHO's latest assessment of the epidemiological burden of TB (numbers of cases and deaths), as well as progress towards the 2015 targets for global TB control that have been established within the context of the Millennium Development Goals (MDGs). It also includes a thorough analysis of implementation and financing of the WHO's Stop TB Strategy and the Stop TB Partnership's Global Plan to Stop TB, since in combination these have set out how TB control needs to be implemented and funded to achieve the 2015 targets. The report gives particular attention to the period 2006-2009, but selected epidemiological, implementation and financial data are presented for previous years as well. This includes epidemiological data back to 1990 and financial data back to 2002. Bringing together data reported by 196 out of 212 countries and territories in 2008, as well as data collected from these countries and territories in previous years, "Global Tuberculosis Control 2009" is the definitive source of information about the national and international response to the worldwide TB epidemic.
