The Cambridge Institute of Criminology

Known for its engaging and accessible writing style, this probing text covers the traditional areas of criminology, but also addresses questions of popular concern and policy debate, using systematic evidence to explore such topics as deterrence and incapacitation; race and social class; the rights of the accused; and domestic violence. Challenging readers to think about even the most obvious and commonsense ideas in terms of the evidence that might support or contradict it, the text delves even deeper, encouraging them to see the connection between abstract theoretical propositions and the reality they see everyday in their own lives and in the media. Using a highly perceptive, lively, and absorbing writing style to make serious ideas and evidence easily understandable to a wide range of readers, the book integrates interesting boxes throughout to bring experientially distant ideas closer and make concepts more relevant: "On Campus Boxes" highlight crime and other topical issues as they relate to campus life, and "Crime in the News Boxes" take items from newspapers to illustrate ideas and provide models for discussing current cases and issues. Reviewer Richard Wright from the University of Scranton says the text "offers insightful typologies of crime—presenting a superb comparison of the interactionist; a cultural and structural explanation of homicide; a first rate discussion of felony murder; and exemplary sections on bookmaking and loansharks." Features new to this edition include an increased number of graphs and tables to help readers get a better grasp of quantitative data; chapter key terms, chapter outlines and a thorough end-of-book glossary for better understanding; and lucid discussions on Hirschi and Gottfredson's self-control theory, community policing, and date rape. For sociologist and criminologists.

Crime and Criminology

This Book Is An Addition To The Scarce Indigenous Literature Available In The Crucial Area Of Crime. The Text Has A Sociological Orientation And Is Founded Upon Holistic Approach. It Presents The Most Recent Data Available On Crimes And Criminals And Offers Theoretical Explanations Too.

Research Methods for Criminal Justice and Criminology 3e is about how to do research and investigate various types of research questions that arise in criminology and criminal justice. A complete discussion of research ethics—including ethical issues relating to the Nuremberg Code, research sponsorship, rights of human subjects and deception — helps readers understand their ethical responsibilities as researchers. This book explores the entire criminal justice and criminology research process from beginning to end including: sampling procedures; data collection techniques; measurement, validity and reliability issues; the role of ethics in the research process; and writing and documenting research papers. Presents a practical guide for conducting research in criminal justice and criminology careers.

Rights of Accused

Interdisciplinary Problems in Criminology

Journal of Criminal Law and Criminology

In the last decade there has been a phenomenal growth in interest in crime pattern analysis. Geographic information systems are now widely used in urban police agencies throughout industrial nations. With this, scholarly interest in understanding crime patterns has grown considerably. Artificial Crime Analysis

Systems: Using Computer Simulations and Geographic Information Systems discusses leading research on the use of computer simulation of crime patterns to reveal hidden processes of urban crimes, taking an interdisciplinary approach by combining criminology, computer simulation, and geographic information systems into one comprehensive resource.

Artificial Crime Analysis Systems: Using Computer Simulations and Geographic Information Systems

Criminology

Formerly a Nelson Hall title, this text is a comprehensive introduction to the study of criminology, excluding additional chapters on the criminal justice system (police, courts, and corrections) as can be found in some texts. INTRODUCTION TO CRIMINOLOGY avoids an overly legal and crime control orientation. It concentrates on the vital core of criminological theory--theory, method, and criminal behavior. Hagan investigates all forms of criminal activity, such as occupational crime,

political crime, and environmental crime. He explains the methods of operation, the effects on society, and how various theories account for criminal behavior.

Canadian Abridgment

This is an essential introduction to undergraduate studies in criminology. Short, clear and concise, it provides a comprehensive overview of the key themes covered on your criminology course. The second edition provides: Summaries of key course content, including new sections on race and ethnicity, cybercrime, ordinary crime, state crime, global and comparative criminology, green criminology and zemiology A helpful study skills section with extensive advice on how to write essays and pass exams, including new sections on how to avoid plagiarism and how to find, read and use journal articles Recent international case studies drawn from the United Kingdom, Australia, Africa and The United States An all new companion website providing guides to further reading and links to relevant blogs, journal articles and useful websites Criminology: The Essentials is an indispensable learning tool. As well as mapping out course content in a coherent and engaging way, it offers helpful hints and tips for getting the most out of your studies.

Research Methods for Criminal Justice and Criminology

Bimonthly. Abstracts of journal articles and monographs. Covers material from psychiatric literature as well as from criminological sources. Entries arranged in classified order. Author, subject indexes.

Papers from "The Criminologist"

Criminology Skills covers both criminological study skills and research skills in one volume, giving students the skills they need to succeed in the study of criminology. A three-part structure covers finding source materials, academic skills, study skills, and research methodology, guiding students through a range of skills and methods which they will need to practise and demonstrate in their degree. Topics covered include finding and evaluating criminological resources, referencing and avoiding plagiarism, preparing for exams, planning a research project, data analysis and much more. Criminology Skills first helps students to establish a strong and comprehensive skills foundation before building to a more advanced level, increasing their competence and confidence with which to approach projects. Online resources The text is accompanied by the following online resources:
-Practical exercises
-Animated walk-throughs showing how to use online databases
-Activities to help students test their understanding of ethical considerations and of the differences between quantitative and qualitative research methods

Introduction to Criminology

Criminology, Penology, and Police Science Abstracts

Criminology

Travis Hirschi is one of the most cited criminologists of the twentieth century. His work has provoked controversy and heated debates about the causes of crime, proper research methods, and the most effective policies to prevent and control crime. Known as a spokesperson for social control theory, Hirschi always ties his ideas to the mode of investigation and the mode of investigation to substantive concerns. Theoretical contributions and research methodology have been twin driving forces throughout his career. This book contains representative selections of Hirschi's work over many years. It is remarkable how little is known about Hirschi's life and career. John H. Laub's introduction combines a discerning account of Hirschi's life and work, accompanied by an interview with the author. Laub's volume covers various topics: methodological issues; principles of casual analysis; criteria of causality; longitudinal research on crime; rules and the study of deviant behavior; correlations between crime and delinquency; control theory of delinquency; intelligence, causes, and prevention of delinquency; family structure and crime; theory of crime; crime and criminality; deviance; white collar crime; and juvenile justice systems. Now available in paperback, this is an invaluable text for courses in criminology, as well as a valuable addition to professional libraries.

The Criminologist

The new edition of this best-selling study skills book provides a practical guide for success for individuals at every level of their criminology and criminal justice degree. The new edition of this best-selling study skills book is a practical guide to success for individuals at every level of their criminology and criminal justice degree. Fully revised to reflect changes in the curriculum, the book continues to provide students with practical and relevant information for their degree, including topics on choosing modules, sourcing and researching, applying theory to practice, writing essays, presentation skills, revision, taking exams and careers after your degree. New to the second edition: a chapter on plagiarism developments in virtual learning environments and e-resources expanded coverage of internet and e-learning skills advice on moving from A-level to university. Maintaining its student-friendly approach and useful pedagogy - tips, activities, glossary, key terms and issues - Study Skills for Criminology is an essential purchase for any student of criminology or criminal justice looking to excel in their degree. John Harrison, formerly of Teesside University Mark Simpson is Dean of the School of Social Sciences and Law at Teesside University. Olwen Harrison, formerly of Teesside University. Emma Martin is Senior Lecturer in Criminology at Teesside University.

Criminology Skills

Using a non-technical approach, this book covers the full range of statistics topics—from descriptive statistical techniques to tests of significance and measures of association for two- and k- variable combinations for different measurement levels, multiple regression and multivariate analysis, collinearity, ordinary least squares regression, part and partial correlation, error, parsimony, and robustness. Chapters are filled with examples and illustrations from contemporary criminal justice and criminology literature with an emphasis on how statistics fits into the research process and how causality is established. This edition devotes a full chapter to SPSS, includes interpretive statistical tables with explanatory headnotes and footnotes, and offers step-by-step formulae to heighten the meaningfulness of statistics for criminal justice and social science majors.
