### **When Sophie Gets Angry--Really, Really Angry**

The Teaching Pyramid Infant-Toddler Observation Scale (TPITOS(TM)) is an assessment instrument designed to measure the fidelity of implementation of practices associated with the Pyramid Model in center-based infant and toddler care settings. The TPITOS provides a classroom snapshot of the adult behaviors and classroom environment variables associated with supporting and promoting the social-emotional development of infants and toddlers. The tool is made up of items, or categories, of teacher behavior. The three types of items are a) Observational Items, b) Interview Items, and c) Red Flag Items.

Fully revised with new chapters that focus on promoting your child's social, emotional, and language development as well as ability to persist and be successful in school. All children misbehave sometimes! Some children are temperamentally more difficult to parent because they are impulsive, hyperactive, inattentive, or delayed in some aspect of their development. This invaluable handbook use the Incredible Years® Parenting Pyramid® as the architectural or construction plan for specific parenting tools that help prevent behavior problems from occurring and promote children's social, emotional, and academic competence, and healthy life styles. The book helps parents to build a strong positive relationship foundation before using respectful discipline tools to reduce target behavior problems. The book also focuses on tools for building family relationships and support networks as well as problem solving methods and self-regulation skills to manage stress.

### **The Peaceful Classroom**

This authoritative handbook reviews the breadth of current knowledge about developmental disabilities: neuroscientific and genetic foundations; the impact on health, learning, and behavior; and effective educational and clinical practices. Leading authorities analyze what works in intervening with diverse children and families, from infancy through the school years and the transition to adulthood. Chapters present established and emerging approaches to promoting

### **My Many Colored Days**

This book explores the importance of compassion and empathy within educational contexts. While compassion and empathy are widely recognised as key to living a happy and healthy life, there is little written about how these qualities can be taught to children and young people, or how teachers can model these traits in their own practice. This book shares several models of compassion and empathy that can be implemented in schooling contexts, also examining how these qualities are presented in children's picture books, films and games. The editors and contributors share personal insights and practical approaches to improve both awareness and use of compassionate and empathetic approaches to others. This book will be of interest and value to all those interested in promoting compassion and empathy within education.

Why do children do the things they do? What can teachers do to manage it all? While there is not a simple method for understanding and managing all behaviors or all children, teachers can give young children the social and emotional tools needed to grow and thrive on their own. Developed and tested in the classroom, Beyond Behavior Management, is a strength-based approach to guiding and managing young children's behavior by helping them build and use essential life skills—attachment, collaboration, self-regulation, adaptability, contribution, and

belonging—into the daily life of the early childhood classroom. As a result, children will learn to exhibit more pro-social behaviors, work better as a community, and become excited and active learners. This edition includes two new chapters and content reflecting early learning standards, new research, cultural diversity, and strategies to strengthen the home-school connection. Discussion and reflection questions, exercises, journal assignments, child profile templates, a planning worksheet, and sample scripts are also included. Jenna Bilmes is an early childhood consultant and an instructional designer for WestEd Child and Family Services. She is a frequent presenter to teachers, administrators, and counselors nationally and internationally.

Everyone gets angry, so it's never too early for children to learn to recognize feelings of anger, express them, and build skills for coping with anger in helpful, appropriate ways. Children learn that it is okay to feel angry—but not okay to hurt anyone with actions or words. They discover concrete skills for working through anger: self-calming, thinking, getting help from a trusted person, talking and listening, apologizing, being patient, and viewing others positively. Reassuring and

supportive, the book helps preschool and primary-age children see that when they cool down and work through anger, they can feel peaceful again.

### **Compassion and Empathy in Educational Contexts**

Who knows the best way to be mad? Bear stomps. Hare hops. Bobcat screams. Mouse? He just can't get it right. But when he finds the way that works for him--still and quiet--he discovers that his own way might be the best of all. Linda Urban's story about self-expression is both sweet and sly, and Henry Cole's cast of animal friends is simply irresistible.

### **The Grouchy Ladybug**

In this groundbreaking book, nationally recognized leaders in education and psychology examine the relationships between social-emotional education and school success—specifically focusing on interventions that enhance student learning. Offering scientific evidence and practical examples, this volume points out the many benefits of social emotional learning programs, including: building skills linked to cognitive development, encouraging student focus and motivation, improving relationships between students and teachers, creating school-family partnerships to help students achieve, and increasing student confidence and

success.

The idea for this story came to me as I was standing in line at a local gift store. I overheard someone talking about the recent turtle watch, where people go down to the beach where a sea turtle has laid her eggs in the sand, to watch the babies hatch. The woman said she had heard that many of the little ones don't reach the ocean because they are grabbed by seagulls as they run down to the sea. The woman she was talking to remarked that it was lucky that turtles have shells; otherwise, many predators would be able to have them for lunch. And that was it. Enjoy. Murray Rivette

### **Building Academic Success on Social and Emotional Learning**

This book is for teachers of children aged four-eight years. It shows how teachers can collaborate with parents in addressing children's educational and emotional needs. The author presents a variety of classroom management strategies, which teachers can choose from to strengthen children's social and academic competence. She believes that children's emotional literacy is as important as academic literacy. The book shows how teachers can set up individualized programmes which address the special social and emotional needs of children at particular risk with social and academic problems, because of problems such as learning difficulties, hyperactivity, impulsivity, attention deficit disorder, language and reading delays and aggressive behaviour. The author shows how teachers can integrate individualized interventions for such children in the mainstream

classroom, while enhancing the social competence of all their students. Teachers understand that just as a child's cognitive competence is important for their ability to learn so too does a child's social competence and emotional security affect their ability to learn. This book will support teachers in developing social competence and emotional well-being in all children. Based on the empirically validated "Dinosaur Social Skills and Problem-solving Curriculum," this book emphasizes the management of hyperactive, inattentive and aggressive children. It includes practical scripts, games, activities, pictures and circle time role-plays and plans for use with children 4-8 years. Carolyn Webster-Stratton is an educational psychologist who for twenty years has been developing and evaluating interventions to help children with behaviour problems. She is the author of the well-known parent book: *The Incredible Years: A Trouble-Shooting Guide for Parents fo Young Children (Ages 3-8 Years)*.

Lessons: A total of 77 lessons, each with an easy-to-follow teacher script, guide children's learning of essential ICPS vocabulary and concepts and problem-solving skills (alternative solutions, consequences, solution-consequence pairs, means-end thinking). Interaction in the Classroom: Teachers and students learn a whole new way to communicate, using ICPS dialoging, a special technique of problem-solving talk. The result is an improved classroom climate with less conflict and more cooperation. Integration into the Curriculum: Children practice ICPS problem-solving concepts as they work on math, reading, science, social studies, and other academic subjects. Lessons speak to children on their own level, using games, stories, puppets, illustrations, and role-plays. A key program principle is that the child, not the teacher, must solve the problem at hand. In other words, ICPS teaches children how to think, not what to think.

Zach and his family go to the beach, but Zach is having a lousy day. First, he dropped his toothbrush in the toilet. Then his best friend went to someone else's birthday party instead of joining him. But most frustrating of all, he can't get his kite to fly! Zach kicks sand, yells angry words, and asks his dad if they can just go home now. Instead, his dad teaches him a simple, three-step approach to get a handle on frustration and find a way to enjoy himself even when things aren't going his way: 1) name it (why are you frustrated?); 2) tame it (self-regulation exercises such as deep breathing or visualization); 3) reframe it (change your thoughts to change your feelings). The three-point strategy is presented as the three corners of a triangle and is illustrated as the corners of Zach's kite. Easy to understand and easy to remember. Zach Rules Series Zach struggles with social issues like getting along, handling frustrations, making mistakes, and other everyday problems typical of young kids. Each book in the Zach Rules series presents a single, simple storyline involving one such problem. As each story develops, Zach and readers learn straightforward tools for coping with their struggles and building stronger relationships now and in the future.

### **I Can Problem Solve: Intermediate elementary grades**

A flexible, ready-to-use program to help special students in grades K-5 learn appropriate ways to behave among others The revised and updated second edition of this bestselling resourcebook provides ready-to-use lessons--complete with reproducible worksheets--to help children become aware of acceptable social behavior and develop proficiency in acquiring basic social skills. The book is organized around three core areas crucial to social development in the primary grades: Accepting Rules and Authority at School, Relating to Peers, and Developing Positive Social Skills. Each lesson places a specific skill within the context of real-life situations, giving teachers a means to guide students to think about why the social skill is important. The hands-on activity that accompanies each lesson helps students to work through, think about, discuss, and practice the skill in or outside of the classroom.
