Trivium Test Prep's PERT Study Guide: PERT Exam Review for the Florida Postsecondary Education Readiness Test covers: PERT Reading, PERT Mathematics, PERT Writing. And includes two PERT practice tests. About PERT Testing. The PERT is a computer adaptive test established to determine whether a student is prepared for college level coursework. If a student does not meet the minimum required score set by the state, it's an indication that the student needs more academic preparation. The high school is then required to provide postsecondary preparatory instruction. All students enrolled in public high school in the state of Florida are required to take the PERT in the eleventh grade. The PERT tests students' abilities in math, reading, and writing. The test directly tests for competence for intermediate algebra and freshman level composition. The PERT is not timed, and each section has thirty questions. Scoring. The PERT is not a test to pass or fail; it's used to determine the best academic path toward college for students. It's important for students to take the PERT seriously (even though it isn't graded) to ensure they are placed in the most appropriate classes. The PERT is scored by section in a range of 50 - 150, with "cut scores" throughout (so students will get three different scores). There are three or four tiers (depending on the section) of cut scores to determine what level students are currently at.

With nearly 30 years experience teaching in classrooms, tutoring in living rooms and developing programs for large test prep companies, Josh Covitt, the Math Whiz, and Ryan Darst, the Verbal Dude, have created a strategy-driven system of their own for the SAT and ACT. They realized that so many students at all levels - regardless of school district, neighborhood or GPA - were making the same mistakes over and over again, and those mistakes were mostly due to poor test-taking fundamentals. The core of Streamline's innovative and fresh approach is an emphasis on meta-fundamentals and a simple yet effective hub of strategies, de-emphasizing busy work and drills, which are far too common (and boring!) in today's test prep industry.
