Just as children are not little adults, the discipline of paediatric surgery is not equivalent to surgery for adults. Differences in anatomy, diseases affecting children and the appropriate therapies make the surgical care of children confusing and tense. Even within paediatric care, the extensive changes children undergo as they develop from neonates to adolescents causes different care to be required at different stages. Full-size texts are available for comprehensive review of paediatric surgery when one has the luxury to sit and study at a desk, but no pocket-sized guide specific to paediatric surgery is available. This book will fulfil the need for rapid, clear, concise guidance in the immediate bedside evaluation and treatment of children suffering surgical disease. It will provide assistance to surgical and paediatric providers alike; anyone who has a hand in the urgent care of children requiring a surgeon. The book is also a convenient focused board review guide for trainees and active practitioners taking board examinations. The editors are busy paediatric surgeons at a teaching hospital, performing operations on children every day, as well as training students and residents. The contributors are drawn from the broad spectrum of paediatric specialists encompassing the disciplines necessary to staff a tertiary children's hospital.

The 2017 National Book Critics Circle (NBCC) Finalist, International Bestseller, and a Kirkus Best Nonfiction Book of 2017! “Marsh has retired, which means he's taking a thorough inventory of his life. His reflections and recollections make Admissions an even more introspective memoir than his first, if such a thing is possible.” —The New York Times “Consistently entertainingHonesty is abundantly apparent here--a

quality as rare and commendable in elite surgeons as one suspects it is in memoirists." —The Guardian "Disarmingly frank storytellinghis reflections on death and dying equal those in Atul Gawande's excellent Being Mortal." —The Economist Henry Marsh has spent a lifetime operating on the surgical frontline. There have been exhilarating highs and devastating lows, but his love for the practice of neurosurgery has never wavered. Following the publication of his celebrated New York Times bestseller Do No Harm, Marsh retired from his full-time job in England to work pro bono in Ukraine and Nepal. In Admissions he describes the difficulties of working in these troubled, impoverished countries and the further insights it has given him into the practice of medicine. Marsh also faces up to the burden of responsibility that can come with trying to reduce human suffering. Unearthing memories of his early days as a medical student, and the experiences that shaped him as a young surgeon, he explores the difficulties of a profession that deals in probabilities rather than certainties, and where the overwhelming urge to prolong life can come at a tragic cost for patients and those who love them. Reflecting on what forty years of handling the human brain has taught him, Marsh finds a different purpose in life as he approaches the end of his professional career and a fresh understanding of what matters to us all in the end.
