Here Is A Preview Of What Inside The Book: Stock market day trading is a great means of making money with a little of gambling. You have to have some strategy to follow when participating in stock market day trading. The secret of stock market day trading, or any trading for that matter, is to always buy stocks low to sell high. Getting a stock market picker which focuses on penny stocks is especially profitable because no other stock than a penny stock is able to quickly jump and double or triple in value over a very short period. A day trading strategy is not merely a set of rules.

It is a concept of how the market works and how traders react to price movements. One of the worst mistakes a trader can make is to chase a stock. By the time the stock looks like a 'sure bet', it is usually gearing up for a consolidation or a price reversal. Take Action Today and Learn Day Trading In No Time! 2020 Updated Version Very few careers can offer you the freedom, flexibility and income that active trading does. As a trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You may only answer to yourself. That is the life of a successful day trader; but it is not easy to achieve and very few succeed. In the book, I describe the fundamentals of day trading, explain how day trading is different from other styles of trading and investment, and elaborate on important trading strategies that many traders use every day. I've kept the book short so you can actually finish reading it and not get bored by the middle. For beginner traders, this book gives you an understanding of where to start, how to start, what to expect from day trading, and how to develop your strategy. Simply reading this book, however, will not make you a profitable trader. Profit in trading does not come with reading a book or two or browsing online. It comes with practice, the right tools and software and appropriate ongoing education. Intermediate traders may benefit from the book's extensive overview of some of the classic strategies that the majority of retail traders regularly use with proven success. If you think you are beyond the stage of a novice trader, then you may want to jump ahead and start reading from Chapter 7 for an overview of the most important day trading strategies: Day trading is not gambling or a hobby. You must approach trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. ABCD Pattern Trading Bull Flag Momentum Trading Top Reversal Trading Bottom Reversal Trading Moving Average Trend Trading VWAP Trading Support and Resistance Trading For each strategy, I explain: How to find the Stock in Play for trade What indicators I am using on my charts When I enter the trade When I exit the trade (profit taking) What is my stop loss Day trading is

not gambling. It's not an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. That's How to Day Trade for a Living.
