Super Mazes in Space!

CERN, the European Laboratory for particle physics, regularly makes the news. What kind of research happens at this international laboratory and how does it impact people's daily lives? Why is the discovery of the Higgs boson so important? Particle physics describes all matter found on Earth, in stars and all galaxies but it also tries to go beyond what is known to describe dark matter, a form of matter five times more prevalent than the known, regular matter. How do we know this mysterious dark matter exists and is there a chance it will be discovered soon? About sixty countries contributed to the construction of the gigantic Large Hadron Collider (LHC) at CERN and its immense detectors. Dive in to discover how international teams of researchers work together to push scientific knowledge forward. Here is a book written for every person who wishes to learn a little more about particle physics, without requiring prior scientific knowledge. It starts from the basics to build a solid understanding of current research in particle physics. A good dose of curiosity is all one will need to discover a whole world that spans from the infinitesimally small and stretches to the infinitely large, and where imminent discoveries could mark the dawn of a huge revolution in the current conception of the material world.

Practice Makes Perfect Complete French Grammar

A textbook for beginning students of French offers instruction in speaking, understanding, reading, and writing the language.

Children's Books in Print, 2007

The main objective of *   votre tour!* is to advance students to a level at which they can comfortably express themselves on a variety of French and francophone topics. Avoiding the excessive rigor of most intermediate texts, *   votre tour!* immerses students in authentic language and cultural contexts to achieve three key objectives: to build and reinforce oral and written communicative skills, to develop reading skills and cultural awareness, and to forge a strong linguistic base. New! *T  te    t  te* communicative activities require one student to use communicative skills to elicit unknown details from another student in order to complete a task, with basic vocabulary and grammar structures recycled to reinforce previously learned material. New! Integrated video correlates to the *Fran  ais Pratique* section of each unit and to corresponding video activities provided in the *Student Activities Manual*. New! Updated cultural material highlights recent cultural trends, such as prices expressed in euros, French phone numbers with appropriate area codes; reflects the current political realities; and offers many entry points for further development of cultural awareness, grammar, and lexical points. A broad introduction to French and Francophone cultures provides authentic language and cultural contexts without an intense grammar curriculum—adapted for students who might take French as a minor, rather than a major. Accessible presentation enables students with basic conversational and grammar skills to achieve success through careful pacing, cyclical review and re-entry of structures and vocabulary, and engaging conversational material. Solid grammar review builds a framework by first covering basic structures and expressions, then adding more advanced concepts to expand students' linguistic abilities.

Discovering French Workbook

In the jungle of Burma, the Zomi tribe lives modestly and peacefully. Thazama is a young, intrepid Zomi who loves hunting and playing games with his friend Moonpi. But the ensuing bloodbath of the 1988 Burmese revolution changes everything, making them hostages in their own country. Military forces impose strict rule over the people, demanding food and rations, men and women, many of whom will never return. Yet Thazama knows his destiny is to fight for freedom, and once initiated into adulthood he and Moonpi head for the great city of Mandalay, where Thazama continues on his road of no return on a harrowing journey through Southeast Asia, further and further from home.

The Book of Lieder

The Ballpoint Doodle Handbook

This unique volume contains, in parallel translation, a thousand of the most frequently performed Lieder, both piano-accompanied and orchestral. Composers are arranged alphabetically, with their songs appearing under poet in chronological order of composition - thus allowing the reader to engage in depth with a particular poet and at the same time to follow the composer's development. Richard Stokes, whose work in this field is already widely acclaimed, provides illuminating short essays on each of the fifty composers' approach to Lieder composition, as well as well as notes on all the poets who inspired the songs. The volume is notable for the accuracy and elegance of its translations, and for its fidelity to the German verse: every care has been taken to print the words of the sung text, while adhering to the versification and punctuation of the original poem. Beethoven, Schubert and Schumann, Goethe, Heine and Schiller are among the highlights of a book which illuminates one of the great musical traditions and will be an indispensable handbook for every music lover.

À votre tour!

"With a title derived literally from the explorations of the French in the Pacific and metaphorically from classroom encounters with another culture - both of which form important subsections to the volume - Explorations and Encounters in French actively seeks to unite those fields of enquiry sometimes seen as separate, namely, culture and language. The essays selected for inclusion in Explorations and Encounters in French bring together many of the current research strands in French Studies today, tapping into current pedagogical trends, analysing contemporary events in France, examining the Franco-Australian past, while reviewing teaching practice and the culture of teaching. Collectively, the essays reflect the common engagement with language, culture and society that characterizes the community of French teachers and scholars in Australia and abroad."--University of Adelaide Press webpage.

Burmese Moons

Published to accompany the 1994 exhibition at The Museum of Modern Art, New York, this book constitutes the most extensive survey of modern illustrated books to be offered in many years. Work by artists from Pierre Bonnard to Barbara Kruger and writers from Guillaume Apollinaire to Susan Sontag. An important reference for collectors and connoisseurs. Includes notable works by Marc Chagall, Henri Matisse, and Pablo Picasso.

An Oak Spring Pomona

An Oak Spring Pomona is the second in a series of catalogues describing selections of rare books and other material in the Oak Spring Garden Library, a collection formed by Mrs. Paul Mellon. The Pomona describes one hundred books and manuscripts about fruit, with illustrations taken from some of the most beautiful books on the subject as well as from original drawings and paintings. The earliest book described is Bussatos Giardino di Agricoltura of 1592, the latest The Herefordshire Pomona, an encyclopedia of apples and pears from the 1870s. In between there are fruit books large and small: La Quintinie's Instruction pour les Jardins fruitiers, Duhamel's Traite des arbres fruitiers, and many others. The book is divided into sections on fruit-growing in France and Britain, fruit elsewhere in Europe, and fruit in America, as well as citrus fruit, apples and pears, peaches and soft fruit, grapes, melons, and tropical fruit. Each description gives the background of the book and its relationship to others and is accompanied by illustrations of its contents in color and black and white. The Pomona includes not only brief bibliographical summaries of each book but also background essays that place the books in a historical setting.

Discovering French Rouge

In view of the massive change in the area of distribution of many world biota across classical biogeographical realms, and of the drastic restructuring of the biotic components of numerous ecosystems, the Scientific Committee on Problems of the Environment (SCOPE) decided at its general Assembly in Ottawa, Canada, in 1982 to launch a project on the 'Ecology of Biological Invasions'. Several regional meetings were subsequently organized within the framework of SCOPE, in order to single out the peculiarities of the invasions that took place in each region, the behaviour of their invasive species and the invasibility of their ecosystems. Most noteworthy among such workshops were one in Australia in August 1984, one concerning North America and Hawaii in October 1984, and one dealing with southern Africa in November 1985. A leitmotiv of these workshops was that most of the invasive species to those regions were emanating from Europe and the Mediterranean Basin, inadvertently or intentionally introduced by man. It was therefore considered as a timely endeavour to organize the next regional meeting in relation to this region. The workshop on 'Biological Invasions in Europe and the Mediterranean Basin' was held in Montpellier, France, 21 to 23 May 1986, thanks to the financial support of SCOPE and of the A.W. Mellon Foundation, and the logistic facilities of the Centre National de la Recherche Scientifique (C.N.R.S.).

Governance Beyond the Law

This volume explores the continuous line from informal and unrecorded practices all the way up to illegal and criminal practices, performed and reproduced by both individuals and organisations. The authors classify them as alternative, subversive forms of governance performed by marginal (and often invisible) peripheral actors. The volume studies how the informal and the extra-legal unfold transnationally and, in particular, how and why they have been/are being progressively criminalized and integrated into the construction of global and local dangerhoods; how the above-mentioned phenomena are embedded into a post-liberal security order; and whether they shape new states of exception and generate moral panic whose ultimate function is regulatory, disciplinary and one of crafting practices of political ordering.
