Lincoln P. Paine's SHIPS OF THE WORLD: AN

Download Free Discovery Channel Tv Guide Philippines

HISTORICAL HISTORICAL ENCYCLOPEDIA was honored as one of the best reference books of the year by the New York Public Library, and Library Journal described it as "clearly the most fascinating book of the year." Now, in two equally fascinating new books, Paine focuses on two of the most interesting areas of maritime history: WARSHIPS OF THE WORLD TO 1900 and SHIPS OF DISCOVERY AND EXPLORATION. SHIPS OF DISCOVERY AND EXPLORATION tells the stories of 125 vessels that have played important roles in voyages of geographical exploration and scientific discovery, from early Polynesian double canoes to the most technically sophisticated submersibles. Each ship is described in a vivid short essay that captures its personality as well as its physical characteristics, construction, and history. Drawings, paintings, and photographs show the grandeur and grace of these oceangoing vessels, maps help the reader follow the routes of great seafarers and naval campaigns, and chronologies offer a perspective on underwater archaeology sites, maritime technology, exploration, and disasters at sea.

In these pathbreaking essays, Roy Rosenzweig charts the impact of new media on teaching, researching, preserving, presenting, and understanding history. Negotiating between the "cyberenthusiasts" who

champion technological breakthroughs and the "digital skeptics" who fear the end of traditional humanistic scholarship, Rosenzweig re-envisioned the practices and professional rites of academic historians while analyzing and advocating for the achievements of amateur historians. While he addresses the perils of "doing history" online, Rosenzweig eloquently identifies the promises of digital work, detailing innovative strategies for powerful searches in primary and secondary sources, the increased opportunities for dialogue and debate, and, most of all, the unprecedented access afforded by the Internet. Rosenzweig draws attention to the opening up of the historical record to new voices, the availability of documents and narratives to new audiences, and the attractions of digital technologies for new and diverse practitioners. Though he celebrates digital history's democratizing influences, Rosenzweig also argues that the future of the past in this digital age can only be ensured through the active resistance to efforts by corporations to control access and profit from the Web.

This book's unique digital investigation proposition is a combination of story-telling, tutorials, and case studies. The book explores digital investigation from multiple angles: Through the eyes of the author who has several years of experience in the subject. Through the mind of the hacker who collects massive amounts of data from multiple online sources to identify targets as well as ways to hit the targets. Through the eyes of industry leaders. This book is ideal for: Investigation professionals, forensic analysts, and CISO/CIO and other executives wanting to understand the mindset of a hacker and how seemingly harmless information can be used to target their organization. Security analysts, forensic investigators, and SOC teams looking for new approaches on digital investigations from the perspective of collecting and parsing publicly available information. Public Speaking for Criminal Justice Professionals

There are some two hundred TV markets in the country, but only one—Boston, Massachusetts—hosted a Golden Age of local programming. In this lively insider account, Terry Ann Knopf chronicles the development of Boston television, from its origins in the 1970s through its decline in the early 1990s. During TV's heyday, not only was Boston the nation's leader in locally produced news, programming, and public affairs, but it also became a model for other local stations around the country. It was a time of award-winning local newscasts, spirited talk shows, thought-provoking specials and documentaries, ambitious public service campaigns, and even originally produced TV films featuring Hollywood stars. Knopf also shows how this programming highlighted aspects of Boston's own history over two turbulent decades, including the treatment of highly charged issues of race, sex, and gender—and the stations' failure to challenge the Roman Catholic Church during its infamous sexual abuse scandal. Laced with personal insights and anecdotes, *The Golden Age of Boston Television* offers an intimate look at how Boston's television stations refracted the city's culture in unique ways, while at

Sixty years ago, four men parachuted onto a Norwegian glacier, carrying only the most basic equipment. Their mission was to prevent the Nazi regime from building an atomic bomb. Now wilderness expert Ray Mears tells the true story of this gruelling campaign, showing how these men's ability to survive in extreme conditions influenced the outcome of the Second World War. The Telemark campaign was an example of the bravery and skill of the SOE trainees. The Norwegians transformed a military disaster into a triumph. This book tells the full story for the first time.

MythBusters. Each week, hosts Savage and Hyneman, both special effects experts, use modern science to put another three urban legends to the test on their popular TV show. In this book, you'll learn how they either "busted" or confirmed fifteen myths on their show, often with spectacular results. Here are just some of the urban legends in this book: Did a Ming Dynasty astronaut launch himself into space with a rocket? Can a swallowed octopus egg grow to full size inside a person's stomach? Is the daddy longlegs the world's most venomous spider? Will a sinking ship suck you down? How many balloons are needed to lift a small child off the ground? Does a duck's quack echo? Mythbusters: Don't Try This at Home! gets to the bottom of these urban legends and more, and it lets you do your own mythbusting with fun experiments you can do safely at home.

Public Speaking for Criminal Justice Professionals: A Manner of Speaking is a one-of-a-kind public speaking guide specifically written for criminal justice professionals, written by a criminal justice professional. This book outlines the public speaking skills he has learned, used, and taught to thousands of criminal justice, forensic science,

security, and counterintelligence professionals over the years. The book can either be read from cover-to-cover--to fine tune the reader's existing oral communication skills--or read in a modular fashion, as a reference guide to focus on certain skills and techniques. A list of over 55 proven, effective presentation tools will be listed, discussed, and demonstrated throughout the book--using illustrated criminal justice and forensic sciences topic examples. Contrary to popular believe, simply knowing your subject or being an expert in the subject does not guarantee a successful presentation. Aristotle, who many recognize as the Father of Public Speaking and Forensic Debate, said it best when he declared, "It is not enough to know what to say, one must know how to say it." This guide focuses on technique and the recognition that a speaker must have of both the subject and the listener. The purpose is to improve readers' skill level and ability to engage and, thereby, inform the listener. Whether preparing to speak to one person, or one thousand people, Public Speaking for Criminal Justice Professionals provides specific techniques for professionals to speaking with confidence, and present effective engaging presentations.
