The contemporary workplace is ever changing. In many countries the effects of economic globalization has seen the rise in zero-hour contracts, the erosion of trade union power and income inequality. In addition, high-performance work systems, business ethics and environmental sustainability are now creating tremendous challenges in many organizations. These developments play out amongst differing national and international contexts. This fluid and diverse environment makes it even more important to understand the myriad of different theories underpinning human resource management and to explore its impact on organizations, managers and workers. This engaging textbook provides an essential introduction to both the 'how' and 'why' of human resource management; it looks at the way organizations manage human capability, but also exposes the tensions inherent in the employment relationship, encouraging the reader to reflect

The solution is shown on page 239. Rest of the book is a step-by-step logical progression to the solution. Why? Last century has seen many crisis unfold, but the learning from them had not been applied to make our system, safer and secured. According to the author, the prevailing Financial Crisis resulted from a poor quality of information, running the global financial system. The author uses the 'information asymmetry' and 'information lifecycle' to put forth his argument. As this book extracts learning from this crisis, it explains how financial sector and other businesses can apply the concept of 'High Quality of Information' to run a 'crisis-proof- business. In this book, the author constructs the global financial architecture, that can resist crises in future. So, are we more wiser, living through the current crisis? What can the non-financial sector learn from this crisis? Make an assessment for yourself, using the C(X)O checklist at the end of the book.
