### The Creative Digital Darkroom

“If the world of gardening has rock stars, Piet Oudolf qualifies as Mick Jagger, David Bowie, and Prince rolled into one.”  
—Gardenista  
The original publication of Planting the Natural Garden ushered in a revolution in landscape design: the New Perennial Movement. Spearheaded by internationally renowned designer Piet Oudolf, and incisively articulated by the late

plantsman and designer Henk Gerritsen, it transformed private and public spaces with its emotionally resonant, naturalistic use of hardy perennials and grasses. Now this classic has been expanded and updated to include scores of new plants and combinations. Packed with practical information and visual inspiration, *Planting the Natural Garden* zeroes in on the New Perennial Movement's power to move us, making its distinctive plant palette available to all. For enthusiasts of these vibrant landscapes, it is an essential text; for gardeners who love the dreamy moods and colors that Oudolf and Gerritsen celebrate, it's the key to a magic kingdom of garden beauty.

La comunicazione digitale ha regole e logiche proprie: si può pescare dal mondo della pubblicità e del copywriting, dalla negoziazione e dalla persuasione, addirittura della psicologia e dalla neurologia, dalle scienze comportamentali e dalla fotografia, ma occorre calibrare tutto per canali e pubblici specifici. Questo libro racconta genesi, applicazione ed esempi riguardanti il metodo O.P.E.R.A. (ideato dall'autore Gianluigi Bonanomi), pensato per dare un modello facilmente replicabile a chi vuole creare contenuti online, sui social media in particolare. Ogni capitolo sviscera una delle lettere dell'acronimo O.P.E.R.A.: (O) si parla di obiettivi della comunicazione, (P) di come individuare il perché - il problema o il pain - dei lettori, (E) della parte emozionale e (R) di quella razionale della comunicazione - che conta per il 95% - (A) per concludere con un'efficace chiamata all'azione. Il testo è sostenuto da evidenze scientifiche prese dal mondo del neuromarketing e completato da decine di esempi.

Sebastião Salgado's photographs have been shown around the world. In *From my land to the Planet* the photographer tells us the story of his most famous reportages: from the black and white portraits of unknown men and women, workers or refugees, to the more recent Genesis project, a portrait of the most uncontaminated places of our planet. With a kindness and a disarming simplicity, Salgado rebuilds his path, exposes his beliefs, makes us witnesses of his emotions. In this volume his talent as a storyteller and the authenticity of a man who knows how to combine activism and professionalism, talent and generosity, clearly emerge. The reader will discover fascinating stories of every corner of the world, both near and remote, from Africa to the Americas, and then again the birth of the Instituto Terra, of the Genesis project, of Magnum Photos and Amazonas Images.

The selection is made and introduced by Geoff Dyer, author of the award-winning *The Ongoing Moment*. How do we see the world around us? This is one of a number of pivotal works by creative thinkers whose writings on art, design and the media have changed our vision for ever. *Understanding a Photograph* John Berger Edited and introduced by Geoff Dyer

### **American Independent Cinema**

This volume investigates the ways in which Italian women writers, filmmakers, and performers have represented female identity across genres from the immediate post-World War II period to the turn of the twenty-first century. Considering genres such as prose, poetry, drama, and film, these essays examine the vision of female agency and self-actualization arising from women artists' critique of female identity. This dual approach reveals unique interpretations of womanhood in

Italy spanning more than fifty years, while also providing a deep investigation of the manipulation of canvases historically centered on the male subject. With its unique coupling of generic and thematic concerns, the volume contributes to the ever expanding female artistic legacy, and to our understanding of postwar Italian women's evolving relationship to the narration of history, gender roles, and these artists' use and revision of generic convention to communicate their vision.

The American independent sector has attracted much attention in recent years, an upsurge of academic work on the subject being accompanied by wider public debate. But many questions remain about how exactly independence should be defined and how its relationship might be understood with other parts of the cinematic landscape, most notably the Hollywood studios. Edited and written by leading authors in the field, *American Independent Cinema: indie, indiewood and beyond* offers an examination of the field through four sections that range in focus from broad definitions to close focus on particular manifestations of independence. A wide variety of examples are included but within a framework that offers insights into how these are related to one another. More specifically this collection offers: an account of recent developments as well as reviewing, reassessing and revising a number of central positions, approaches and arguments relating to various parts of the independent and/or indie sector. Individual case studies that range from the distinctive qualities of the work of established 'quality' filmmakers such as Wes Anderson, Steven Soderbergh and Rebecca Miller to studies of horror genre production at the more 'disreputable' end of the independent spectrum. Examples of the limits of independence available in some cases within Hollywood, including studies of the work of Stanley Kubrick and Hal Ashby. Case studies of under-researched areas in the margins of American independent cinema, including the Disney nature films and Christian evangelical filmmaking. A number of wider overview chapters that examine contemporary American independent cinema from a number of perspectives. Together, the chapters in the collection offer a unique contribution to the study of independent film in the United States. Contributors: Warren Buckland, Philip Drake, Mark Gallagher, Geoff King, Peter Krämer, Novotny Lawrence, James MacDowell, Claire Molloy, Michael Z. Newman, Alisa Perren, James Russell, Thomas Schatz, Michele Schreiber, Janet Staiger, Yannis Tzioumakis, Sarah Wharton

## **The Wind Book for Rifle Shooters**

The Wind Book for Rifle Shooters contains straightforward guidance on the simple thought process they use to read the wind, the techniques and tactics they use to win matches, and the underlying skills that support both. Let these champions show you how to put together a simple wind-reading toolbox for calculating wind speed, direction, deflection, and drift. Then learn how to use these tools to read flags and mirage, record and interpret your observations, and time your shots to compensate for wind. Other topics covered include: Analyzing shot placement Recording and record keeping Confidence and following your hunches And much more! The essential wind-reading basics taught in this book will absolutely improve your shooting skills, whether you're a target shooter, a plinker, a hunter or a shooting professional.

## **Creating Digital Animations**

Presenting an alternative to the formal, corporate-style poses of yesteryear, this book offers a modern, vibrant approach that aims to capture a moment in the lifestyle of the person or persons in the picture. Clear, concise text discusses the essential technical aspects of photography from choosing a camera and equipment to an appreciation of exposure, aperture, metering, shutter speed, depth of field and white balance settings, in addition to how natural light, color and movement affect a photograph. A guide to posing helps to ensure dynamic and arresting images. Along with advice on setting up a small studio at home, choice of backgrounds and using artificial light, there are hints and tips on pre-shoot preparations such as make-up, hair styling and suitable clothing for the subject of the portrait. Post-production techniques include skin retouching and color correction, plus a guide to printing options and presentation.

## **Understanding a Photograph**

This is not a book about the fundamentals of shutter speed or how your camera works; it is a book that will teach photographers of all levels how to work with their cameras to capture moments whether they are occurring quickly or unfolding over many hours. Capturing the Moment is about a gesture, an expression, a ball in the net, a whale breaching, like Marilyn Monroe's skirt flying up or Alfred Eisenstaedt's image of a kiss between a soldier and nurse in Times Square. Moments in all forms are the true core of photography, and this book will explain how to anticipate them, recognise them, choose them, and capture them, through the eyes and wisdom of award-winning photographer and celebrated author Michael Freeman.
