Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

A provocative, inspiring account of our neglected American ideals and the people who are living them today--and restoring our nation's dream Patriotism has become a loaded word: one that is wielded against people with whom we might disagree, or whose cultural origins don't match our own. But our founding fathers--Washington, Jefferson, Adams, and others--saw patriotism as a dynamic force: an act of service, in an evolving nation that defined its purpose by offering all people a better way of life. In *Authentic Patriotism*, author and award-winning journalist Stephen P. Kiernan explores the original ideals that have been lost in our current climate, where war and economic turmoil have eroded our sense of civic obligation. Kiernan describes "a nation adrift," out of touch with its origins--and then introduces a range of inspiring people who have revived our national purpose

If the authors' goal is to give scientists the tools to write and publish compelling, well documented, clear narratives that convey their work honestly and in proper context, they have succeeded admirably." *Veterinary Pathology*, July 2009 "[The book is] clearly written, has a logical step-by-step structure, is easy to read and contains a lot of sensible advice about how to get scientific work published in international journals. The book is a most useful addition to the literature covering scientific writing." *Aquaculture International*, April 2009 *Writing Scientific Research Articles: Strategy and Steps* guides authors in how to write, as well as what to write, to improve their chances of having their articles accepted for publication in international, peer reviewed journals. The book is designed for scientists who use English as a first or an additional language; for research students and those who teach them paper writing skills; and for early-career researchers wanting to hone their skills as authors and mentors. It provides clear processes for selecting target journals and writing each section of a manuscript, starting with the results. The stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well-written example papers. Strategies are presented for responding to referee comments, as well as ideas for developing discipline-specific English language skills for manuscript writing. The book is

"Art does not produce the visible but makes visible," wrote Paul Klee. This work examines and reinterprets this important principle-- writing does not reproduce speech, it makes it visible-- through an in-depth history of writing across the globe, from ancient civilization to the modern day. A History of Writing analyzes the role of the image in writing from three perspectives: \* Part one is devoted to the oldest, non-alphabetic methods of writing, and to the ingenious developments devised by civilizations that chose to adapt them to their language and culture: from the ancient development of cuneiform script in southern Mesopotamia, to the intricate ideographic scripts of China and Japan, or the still-to-be-deciphered rongo-rongo script of Easter Island. \* Part two focuses on the history and dissemination of alphabets, examining the origins of the Western semitic alphabet and its "sister" Arabic alphabet script, through to the lesser-known scripts of the Caucasus or of

sub-Saharan Africa. \* Part three, finally, examines the reincorporation of imagery into the Western alphabet, looking at various hand-written and printed forms, from the sumptuous illuminations of the Book of Kells to the rise of printing and of typographic forms in modern times, leading to questions over how different writing systems are now adapting in a world that is increasingly dominated by computer technology. In total, fifty-eight lavishly illustrated chapters present detailed yet accessible commentaries from a team of leading specialists in the study of writing. Together they explain and clarify the birth, evolution, and dissemination of over thirty key scripts and alphabets and their numerous derivatives. The breadth and scope of material covered, along with the detailed sources of documentation provided, make *A History of Writing* an essential and exciting new contribution to existing scholarship on this fascinating subject.
