Practical Wildlife Care

Wildlife care and rehabilitation is often on a one-to-one basis and involves a lot of time, care and skill. However, for many years, care of injured wildlife was regarded as a low priority and euthanasia was the recommended option. A lot has changed over the past twenty years and now caring for wildlife casualties is part of everyday life in many veterinary practices. Following on from the major success of the first edition, this second edition provides even more useful information on wildlife care and rehabilitation. As well as covering a whole range of species, with sections on birds, mammals, reptiles and amphibians, this edition now includes information on many 'alien' species appearing in the British countryside such as wallabies, wild boar and exotic reptiles. In this edition:

- * Essential guidance on handling, first aid, feeding and releasing, and many other disciplines not featured in veterinary or nursing training;
- * Full of helpful tips from an expert in wildlife rehabilitation who has unparalleled practical experience;
- * Expanded chapters on the care of all species - particularly casualty badgers, otters and hedgehogs - and more comprehensive guidance on rearing orphaned mammals and birds;
- * Lots more colour pictures to aid in management and care techniques and the latest information on zoonotic diseases

from around the world.

Nephrology and Urology of Small Animals

This Topical Collection of Molecules provides the most recent advancements and trends within the framework of food analysis, confirming the growing public, academic, and industrial interest in this field. The articles broach topics related to sample preparation, separation science, spectroscopic techniques, sensors and biosensors, as well as investigations dealing with the characterization of macronutrients, micronutrients, and other biomolecules. It offers the latest updates regarding alternative food sources (e.g., algae), functional foods, effects of processing, chiral or achiral bioactive compounds, contaminants, and every topic related to food science that is appealing to readers. Nowadays, the increasing awareness of the close relation among diet, health, and social development is stimulating demands for high levels of quality and safety in agro-food production, as well as new studies to fill gaps in the actual body of knowledge about food composition. For these reasons, modern research in food science and human nutrition is moving from classical methodologies to advanced instrumental platforms for comprehensive characterization. Nondestructive spectroscopic and imaging technologies are also proposed for food process monitoring and quality control in real time.

Teaching Statistics in School Mathematics-Challenges for Teaching and Teacher Education

The Second Edition of *Parliamo italiano!* instills five core language skills by pairing cultural themes with essential grammar points. Students use culture—the geography, traditions, and history of Italy—to understand and master the language. The 60-minute *Parliamo italiano!* video features stunning, on-location footage of various cities and regions throughout Italy according to a story line corresponding to each unit's theme and geographic focus.

Small animal surgery e-dition

The revolutionary Fossum e-dition offers you the convenience of a book, plus the added functionality of exclusive access to a regularly updated companion website - for the life of the 3rd edition. In addition to a fully searchable version of the book, the e-dition provides weekly updates, case studies, aftercare

instructions, abstracts of relevant articles, and video clips and animations of surgical procedures. e-dition users can also take notes, save searches, and access an extensive image collection with a lightbox function that allows the user to save images to PowerPoint presentations. The 3rd edition of the book and the e-dition website have been completely updated, offering instant access to authoritative information on all aspects of small animal surgery. Coverage includes basic procedures such as spays, castrations, and declaws, as well as more advanced surgeries that might be referred to specialists such as craniotomy, ventral slots, and lung lobectomy. Discussions of general surgical procedures include sterile technique, surgical instrumentation, suturing, preoperative care, and antibiotic use. Key sections provide clinically relevant coverage of soft tissue surgery, orthopedic surgery, and neurosurgery.

Business Networks Reloaded

Annuario statistico dell'istruzione

The aim of this project is to offer the reader a critical edition and an English translation of 139 letters that were exchanged between the victims of Mussolini's racial laws and the Jesuit Pietro Tacchi Venturi.

Statistiche dell'istruzione

Business networks are an important economic phenomenon of increasing practical importance throughout Europe. This volume examines business networks from an interdisciplinary perspective, with many contributions dealing with a certain form of business network, the so-called cooperative or non-hierarchical. With regard to this specific form of cooperation the volume presents new economic findings, proposes a definition and discusses the governance structure of those networks. Moreover, this book explores whether the research results can also be applied to hierarchical, centralized business networks. With medium-sized companies and all the more with large companies, business networks also pose the question of the compatibility with anti-trust law. This collection dedicates three contributions to this important question. They are complemented by chapters on liability of the network and its members towards third parties and contributions discussing duties of loyalty and the interpretation of agreements. Drawing on new research from Italy, Spain, Germany

and Norway, this work illustrates the European legal perspective on business networks.

Gazzetta ufficiale della Repubblica italiana. Parte prima, 1. serie speciale, Corte costituzionale

To be able to manage something, or someone, can be a spectacular experience. To nurture, lead, influence and then to let go is what managing and consulting are all about. Having the strength to let someone learn from his/her mistakes and also your teaching is, at times, like walking on a high wire. But, a good manager or consultant knows how to "be there" when needed and how to fade into the background when not. The ability to know when to be there and when not to may seem, to some, to require an innate sense. A sense that is mystical. If management was truly

mystical, there would not be as many good managers as there are. No, both management and consulting are built upon reason and rules. Reason and rules can be learned. That is what this book is about - helping you become that "mystical" manager or consultant - someone so skilled at what s/he does that others think s/he is using an innate sense and not just reasons and rules. This is the reference book that every manager or consultant needs to have! Whether you are a recreational therapist, activity professional, occupational therapist, or other type of therapist, this book provides you with hands-on instruction to excel at your job as a manager or consultant. The forty-two chapters are divided into ten sections: Introduction to Management and Consulting, Competency and Ethical Issues, Regulatory Issues, The Facility, Staffing, Adult Learning, Evaluation, Overview of Consulting, Consulting Techniques, and Managing a Consulting Business. The book contains many ready-made forms, checklists for quality assurance, and other quick reference sections to help you locate the information you need.

Parliamo Italiano!

InsurTech: A Legal and Regulatory View

Feline Cardiology is the first book dedicated to the diagnosis and treatment of heart disease in cats. Designed for use in clinical practice, this reference combines cutting-edge information with practical applications, using a consistent format for ease of use. Feline Cardiology provides detailed, species-specific information that is absent from other texts, with an emphasis on the most commonly encountered feline cardiovascular diseases. Drawing on the expertise of four internationally recognized authors, the book is packed with state-of-the-art information within the framework of daily practice. Coverage ranges from basic and advanced treatment approaches for cardiomyopathies, arrhythmias, and many other disorders to the newest information on genetic testing, circulating markers of heart disease, and more. Feline Cardiology provides a comprehensive single resource to managing cardiovascular disease in cats and is a welcome addition to any small animal practice library.

Gazzetta Ufficiale

Atlas of Small Animal Ultrasonography, Second Edition is a comprehensive reference for ultrasound techniques and findings in small animal practice, with more than 2000 high-quality sonograms and illustrations of normal structures and disorders. Provides a comprehensive collection of more than 2000 high-quality images, including both normal and abnormal ultrasound features, as well as relevant

complementary imaging modalities and histopathological images Covers both common and uncommon disorders in small animal patients Offers new chapters on practical physical concepts and artifacts and abdominal contrast sonography Includes access to a companion website with over 140 annotated video loops of the most important pathologies covered in each section of the book

Gazzetta ufficiale della Repubblica italiana. Parte prima, 4. serie speciale, Concorsi ed esami

Meticulously organized by body system for optimal readability and ease of reference, the 3rd edition of this best-selling manual provides quick, comprehensive, and practical guidance on evaluating and managing a full range of common medical and surgical conditions encountered in small animal practice. Medical chapters discuss etiology, clinical signs, diagnoses and treatment, while surgical chapters discuss anatomy, preoperative considerations, procedures and postoperative care. It also contains an entire section devoted to avian and exotic pets and a comprehensive drug formulary. A consistent outline format provides easy access to information on etiology, clinical signs, diagnosis, and treatment for each disease or disorder, as well as anatomy, preoperative conditions, techniques, and postoperative care for surgical procedures. Key Points draw attention to helpful tips and key concepts. Includes a comprehensive section covering diagnosis, treatment, and surgery for avian and exotic pets.

Features new chapters that cover key topics such as physical therapy and rehabilitation, pain management, vaccination guidelines, and syncope. Includes the latest information on drugs and clinical equipment throughout.

Giurisprudenza italiana

Reach for this book whenever a sick or injured tortoise comes into the surgery. *Essentials of Tortoise Medicine and Surgery* is designed as a concise and practical quick reference for the busy practitioner seeing chelonians as part of their caseload. Covering everything from species identification to common basic surgery for tortoises and freshwater turtles, the emphasis is on the more common and likely diagnoses. The first section of the book gives an overview of the basics of tortoise and semi-aquatic/aquatic freshwater turtle husbandry and keeping, as well as a guide to general investigation and diagnostic techniques open to clinicians. The second section provides a clinical guide based on clinical signs and differential diagnoses. Based upon the experience of authors who have been practicing with these species for several decades, this book is a useful guide to veterinarians, students, veterinary nurses and technicians new to working with these fascinating creatures. It will also serve as a useful aide memoire to more experienced clinicians.

La Chimica e l'industria

Gazzetta ufficiale della Repubblica italiana. Parte prima

Fundamentals of Italian Law

Repertorio generale della Giurisprudenza italiana

Nephrology and Urology of Small Animals provides veterinarians with the knowledge needed to effectively diagnose and treat urologic diseases in canine, feline, and exotic patients. Serving as an easy-to-use, comprehensive clinical reference, the text takes an evidence-based approach to detailed coverage of specific diseases and disorders, including etiology and prevalence, clinical signs, diagnosis, treatment, prevention, prognosis, controversies, and references. Coverage also includes practical review of anatomy and physiology of the urinary system, fundamentals of diagnostic testing and therapeutic techniques.

Chimica e l'industria

Il Consiglio di Stato

This book offers a critical edition of the petitions in their original Italian language that (Catholic) Jews residing in Italy submitted to the Fascist General

Administration for Demography and Race (Demorazza) in order either to be “discriminated,” i.e., not subjected to various provisions of Mussolini’s racial laws.

Rivista di storia del diritto italiano

This Volume of the AIDA Europe Research Series on Insurance Law and Regulation explores the key trends in InsurTech and the potential legal and regulatory issues that accompany them. There is a proliferation of ideas and concepts within InsurTech that will fundamentally change the market in the next few years. These innovations have the potential to change the way the insurance industry works and alter the relationships between customers and insurers, resulting in insurance products that are more closely aligned to individual preferences and priced more appropriately to the risk. Increasing use of technology in the insurance sector is having both a disruptive and transformative impact on areas including product development, distribution, modelling, underwriting and claims and administration practice. The result is a new industry, known as InsurTech. But while the insurance market looks to technology for greater efficiency, regulators are beginning to raise concerns about managing potential risks. The first part of the book examines technological innovations relevant for insurance, such as FinTech, InsurTech, Sharing Economy, and the Internet of Things. The second part then gathers contributions on insurance contract law in a digitalized world, while the third part focuses on cyber insurance and robots. Last but not least, the

fourth part of the book discusses legal and ethical questions regarding autonomous vehicles and transportation, including the shipping industry, as well as their impact on the insurance sector and civil liability. Written by legal scholars and practitioners, the book offers international, comparative and European perspectives. The Chapters "FinTech, InsurTech and the Regulators" by Viktoria Chatzara, "Smart Contracts in Insurance. A Law and Futurology Perspective" by Angelo Borselli and "Room for Compulsory Product Liability Insurance in the European Union for Smart Robots?" by Aysegul Bugra are available open access under a CC BY 4.0 license at link.springer.com.

Guida Monaci

This new version of Frances Barr's classic introductory text, *Diagnostic Ultrasound in the Dog and Cat*, has now been revised and expanded to cover the considerable technological and knowledge based advances since the first book was published in 1990. With contributions from leading subject experts, this new book covers both the theoretical principles behind the use of ultrasound in small animal practice and the practical approach to image interpretation. In-keeping with the user-friendly style of Frances Barr's book, the book is extensively illustrated with photographs and accompanying line drawings. Organised around body systems, each chapter covers imaging procedures, normal appearances, abnormal appearances/diseases and specific conditions. Exotic animals, such as rabbits and reptiles are also

included, as are new Doppler techniques. This practical guide is essential reading for all those involved in small animal imaging.

L'università italiana rivista dell'istruzione superiore

“Pouring Jewish Water into Fascist Wine”. Volume II

Rivista italiana di ragioneria

Teaching Statistics in School Mathematics-Challenges for Teaching and Teacher Education results from the Joint ICMI/IASE Study Teaching Statistics in School Mathematics: Challenges for Teaching and Teacher Education. Oriented to analyse the teaching of statistics in school and to recommend improvements in the training of mathematics teachers to encourage success in preparing statistically literate students, the volume provides a picture of the current situation in both the teaching of school statistics and the pre-service education of mathematics teachers. A primary goal of Teaching Statistics in School Mathematics-Challenges for Teaching and Teacher Education is to describe the essential elements of statistics, teacher's professional knowledge and their learning experiences. Moreover, a research agenda that invites new research, while building from current knowledge, is developed. Recommendations about strategies and materials, available to train

prospective teachers in university and in-service teachers who have not been adequately prepared, are also accessible to the reader.

The Professional Activity Manager and Consultant

World War II stories on Italian women in the Resistance as heroines and traitors, and the way they exploited their femininity. In Red Flag, a woman hides guns by covering them with a soiled sanitary napkin.
