This is a powerful dramatisation of Daniel Keyes's perceptive and sad novel. Charlie is a retarded adult who desperately wants to be able to read and write. He undergoes a brain operation which increases his intelligence. Yet such an operation begs many questions--can Charlie's emotional development keep pace with the intellectual? Ensure you are fully equipped to thrive and adapt in this ever-changing nursing environment with Ignatavicius, Workman, and Rebar's Medical-Surgical Nursing: Concepts for Interprofessional Collaborative Care, 9th Edition. This text not only covers all essential adult health knowledge, but also reinforces the application, conceptual thinking, and clinical judgment skills that today's nurses need to stay one step ahead in delivering exceptional patient care, no matter the environment. As with previous editions, you'll find a unique collaborative care approach to adult health nursing, a thorough integration of QSEN competencies, extensive NCLEX® Exam preparation, and a direct, reader-friendly tone throughout the text. This ninth edition incorporates two emerging and complementary trends -- the Core Competencies for Interprofessional Collaborative Practice and a more conceptual approach teaching and learning -- areas that will ground you in how to think like a nurse and how to apply the knowledge you gain from the text to clinical practice.
