The Annals of Sennacherib

Critical Point Theory in Global Analysis and Differential Topology

ABC Etymological Dictionary of Old Chinese

Testimonials of Astranti Courses, Study Texts and Mock Exams: "Very targeted to the exam and very professional, is every bit as good as attending a class room tuition or revision course." James Glackin "All in all it's the best thing I came across during my CIMA studies. I don't know any better way to help yourself to pass these tough exams." Grzegorz Narozanski "Just wanted to let you know that I passed all 3 exams using the textbook and your mock exams which I found really helpful, thanks!" Nneoma Nwaogu "I would also like to extend my great gratitude for such a wonderful study text; they made my understanding of CIMA P1 much easier. Once more thank you very much to the Team." Mthuthuzeli September "I received the fantastic news this morning that I have finally passed T4!! Many thanks for your support and advice in the lead up to the exam, I am certain that without the

really important tips on exam strategy you provided I would not have passed. Many thanks again!" Babak Fardaghaie "So I managed a 76% pass for E2 using your notes. They are very well structured and easy to use. Thank you so very much." Amanda Vakalisa "The Astranti method of teaching is systematic and easy to follow. I gained a lot of knowledge and regret not enrolling with Astranti for my earlier CIMA exams. After the course I was confident about my preparation. I would recommend the course to everyone sitting the T4b exam especially the MARKED mocks. Its the section by section detailed feedback from tutors that helps to improve and gain confidence." Gunjan Nagpal "I have cleared all 3 strategic level papers in my first attempt. I used the Astranti learning material during my final revision. They were short, precise and saved a great amount of time which made all the difference for me in the exam. Thank you very much." Raj The Astranti Study Texts The Astranti Study Texts have been used by thousands of CIMA Students in preparation for their management accountancy exams. They cover the entire CIMA syllabus for the 2015 exams and onwards and have been carefully written to be concise and easy to read but detailed enough to clearly guide you through the topics you must know in order to pass the exams. What are you waiting for? Download the sample of the book to see one for yourself. Prepared by our expert team of professional writers the study texts feature: Full Syllabus Coverage Clear and simple explanations for ease of understanding Carefully worked step-by-step examples Condensed and focused on likely exam content Linked with our chapter-by-chapter revision questions available to purchase on

Astranti.com Go to www.astranti.com to find out more about related CIMA videos, courses and mocks exams.

Book Of Governors

BPP Learning Media is an ACCA Approved Content Provider. Our partnership with ACCA means that our Study Texts, Practice & Revision Kits and iPass (for CBE papers only) are subject to a thorough ACCA examining team review. Our suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

Relativistic Quantum Mechanics and Field Theory

BPP Learning Media is an ACCA Approved Content Provider. Our partnership with ACCA means that our Study Texts, Practice & Revision Kits and iPass (for CBE papers only) are subject to a thorough ACCA examining team review. Our suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

ACCA Paper F1 and FIA Diploma in Accounting and Business

Foundations in Accountancy (FIA) awards are entry-level, core-skill focused qualifications from ACCA. They provide flexible options for students and employers, and as an ACCA Approved Content Provider, BPP Learning Media's suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

ACCA F5 Performance Management

Foundations in Accountancy (FIA) awards are entry-level, core-skill focused qualifications from ACCA. They provide flexible options for students and employers, and as an ACCA Approved Content Provider, BPP Learning Media's suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

CIMA F2 Advanced Financial Reporting

This is the digital version of the printed book (Copyright © 2000). Derek Hatley and Imtiaz Pirbhai—authors of *Strategies for Real-Time System Specification*—join with influential consultant Peter Hruschka to present a much anticipated update to their widely implemented Hatley/Pirbhai methods. *Process for System Architecture and Requirements Engineering* introduces a new approach that is particularly useful for

multidisciplinary system development: It applies equally well to all technologies and thereby provides a common language for developers in widely differing disciplines. The Hatley-Pirbhai-Hruschka approach (H/H/P) has another important feature: the coexistence of the requirements and architecture methods and of the corresponding models they produce. These two models are kept separate, but the approach fully records their ongoing and changing interrelationships. This feature is missing from virtually all other system and software development methods and from CASE tools that only automate the requirements model. System managers, system architects, system engineers, and managers and engineers in all of the diverse engineering technologies will benefit from this comprehensive, pragmatic text. In addition to its models of requirements and architecture and of the development process itself, the book uses in-depth case studies of a hospital monitoring system and of a multidisciplinary groundwater analysis system to illustrate the principles. Compatibility Between the H/H/P Methods and the UML: The Hatley/Pirbhai architecture and requirements methods—described in *Strategies for Real-Time System Specification*—have been widely used for almost two decades in system and software development. Now known as the Hatley/Hruschka/Pirbhai (H/H/P) methods, they have always been compatible with object-oriented software techniques, such as the UML, by defining architectural elements as classes, objects, messages, inheritance relationships, and so on. In *Process for System Architecture and Requirements Engineering*, that compatibility is made more specific through the addition of message diagrams, inheritance

diagrams, and new notations that go with them. In addition, state charts, while never excluded, are now specifically included as a representation of sequential machines. These additions make definition of the system/software boundary even more straightforward, while retaining the clear separation of requirements and design at the system levels that is a hallmark of the H/H/P methods—not shared by most OO techniques. Once the transition to software is made, the developer is free to continue using the H/H/P methods, or to use the UML or any other software-specific technique.

Cima P2 Advanced Management Accounting Study Text

Solidification Processing

Foundations in Accountancy (FIA) awards are entry-level, core-skill focused qualifications from ACCA. They provide flexible options for students and employers, and as an ACCA Approved Content Provider, BPP Learning Media's suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

Hyperbolic Problems

BPP Learning Media is an ACCA approved content provider. Our suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

Comparative Linguistics in Southeast Asia

ACCA P1 Governance, Risk and Ethics

ACCA Approved and valid for exams from 01 Sept 2017 up to 31 August 2018 - Becker's F2 Management Accounting Study Text has been approved and quality assured by the ACCA's examining team.

The Economist

Foundations in Accountancy (FIA) awards are entry-level, core-skill focused qualifications from ACCA. They provide flexible options for students and employers, and as official ACCA Approved Learning Provider - Content, BPP Learning Media's study materials are tailored to the exams students will take.

Machine Learning in Business

ACCA.

This self-contained treatment covers all aspects of nonlinear dynamics, from fundamentals to recent developments, in a unified and comprehensive way. Numerous examples and exercises will help the student to assimilate and apply the techniques presented.

ACCA Advanced Performance Management

BPP Learning Media provides comprehensive materials that highlight the areas to focus on for your exams and complement the syllabus to increase your understanding.

The Encyclopaedia Britannica

BPP Learning Media provides comprehensive materials that highlight the areas to focus on for your exams and complement the syllabus to increase your understanding.

Process for System Architecture and Requirements

Engineering

Foundations in Accountancy (FIA) awards are entry-level, core-skill focused qualifications from ACCA. They provide flexible options for students and employers, and as official ACCA Approved Learning Provider - Content, BPP Learning Media's study materials are tailored to the exams students will take.

ACCA Advanced Audit and Assurance (UK)

This introduction to mathematical logic stresses the use of logical methods in attacking nontrivial problems. It covers the logic of classes, of propositions, of propositional functions, and the general syntax of language, with a brief introduction to so-called undecidability and incompleteness theorems; and much more. 1950 edition.

Critical Point Theory in Global Analysis and Differential Topology

First published in 2008. Routledge is an imprint of Taylor & Francis, an informa company.

FIA Managing Costs and Finances MA2

BPP Learning Media is an ACCA Approved Content Provider. Our partnership with ACCA means that our Study Texts, Practice & Revision Kits and iPass (for CBE papers only) are subject to a thorough ACCA examining team review. ICAEW Financial Accounting and Reporting

BPP Learning Media is an ACCA approved content provider. Our suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

CIMA P1 Management Accounting

This is the first genuine etymological dictionary of Old Chinese written in any language. As such, it constitutes a milestone in research on the evolution of the Sinitic language group. Whereas previous studies have emphasized the structure of the Chinese characters, this pathbreaking dictionary places primary emphasis on the sounds and meanings of Sinitic roots. Based on more than three decades of

intensive investigation in primary and secondary sources, this completely new dictionary places Old Chinese squarely within the Sino-Tibetan language family (including close consideration of numerous Tiberto-Burman languages), while paying due regard to other language families such as Austroasiatic, Miao-Yao (Hmong-Mien), and Kam-Tai. Designed for use by nonspecialists and specialists alike, the dictionary is highly accessible, being arranged in alphabetical order and possessed of numerous innovative lexicographical features. Each entry offers one or more possible etymologies as well as reconstructed pronunciations and other relevant data. Words that are morphologically related are grouped together into "word families" that attempt to make explicit the derivational or other etymological processes that relate them. The dictionary is preceded by a substantive and significant introduction that outlines the author's views on the linguistic position of Chinese within Asia and details the phonological and morphological properties, to the degree they are known, of the earliest stages of the Chinese language and its ancestor. This introduction, because it both summarizes and synthesizes earlier work and makes several original contributions, functions as a useful reference work all on its own.

They provide flexible options for students and employers, and as an ACCA Approved Content Provider, BPP Learning Media's suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

FIA Foundations in Management Accounting FMA (ACCA F2)

FIA Foundations in Financial Management FFM

Practicing Leadership

The standard university-level text for decades, this volume offers exercises in construction problems, harmonic division, circle and triangle geometry, and other

areas. 1952 edition, revised and enlarged by the author.

The Lawyers Reports Annotated

FIA Foundations of Accountant in Business FAB (ACCA F1)

This book is for business executives and students who want to learn about the tools used in machine learning. In creating the second edition, John Hull has continued to improve his material and added three new chapters. The book explains the most popular algorithms clearly and succinctly without using calculus or matrix/vector algebra. The focus is on business applications. There are many illustrative examples. These include assessing the risk of a country for international investment, predicting the value of real estate, and classifying retail loans as acceptable or unacceptable. Data, worksheets, and Python code for the examples is on the author's website. A complete set of PowerPoint slides that can be used by instructors is also on the website. The opening chapter reviews different types of machine learning models. It explains the role of the training data set, the validation data set, and the test data set. It also explains the issues involved in cleaning data and reviews Bayes' theorem. Chapter 2 is devoted to unsupervised learning. It explains the k-means algorithm and alternative approaches to clustering. It also

covers principal components analysis. Chapter 3 explains linear and logistic regression. It covers regularization using Ridge, Lasso, and Elastic Net. Chapter 4 covers decision trees. It includes a discussion of the naive Bayes classifier, random forests, and other ensemble methods. Chapter 5, explains how the SVM approach can be used for both linear and non-linear classification as well as for the prediction of a continuous variable. Chapter 6 is devoted to neural networks. It includes a discussion of the gradient descent algorithm, backpropagation, stopping rules, autoencoders, convolutional neural networks, and recurrent neural networks. Chapter 7 explains reinforcement learning using two games as examples. It covers Q-learning and deep Q-learning, and discusses applications. Chapter 8 covers natural language processing. It discusses how the algorithms introduced in the book can be used for sentiment analysis, language translation and information retrieval. Chapter 9 is concerned with model interpretability. It discusses the importance of making models understandable and the procedures that can be used for both white-box and black-box models. Chapter 10 explains two applications involving derivatives that the author has been involved in. The final chapter focuses on issues for society. The topics covered include data privacy, biases, ethical considerations, legal issues, and adversarial machine learning. At the ends of chapters there are short concept questions to test the readers understanding of the material and longer exercises. Answers are at the end of the book. The book includes a glossary of terms and an index.

ACCA F4 Corporate and Business Law (Global)

TAKE AN EXCITING JOURNEY THROUGH THE PARADIGMS OF LEADERSHIP With the Second Edition of PRACTICING LEADERSHIP you can get the skills and knowledge you need to become a highly effective leader. Featuring contributions from a variety of disciplines, including psychology, management, communications, military science, the quality movement, political science, and philosophy, the text takes you on a unique journey through the key paradigms that have helped shape some of today's most widely respected world leaders. Original essays by Stephen Covey, James Kouzes, Barry Posner, and John Pepper, along with profiles of such real-world leaders as Nelson Mandela, Mother Theresa, John Wooden, Sam Walton, and Colin Powell, will help you understand how to develop your own personal set of leadership skills. The Second Edition features: A new chapter on "Practicing Leadership in a Multicultural Society" New coverage of presidential leadership in Chapter 5 New profiles of Warren Buffet, Barry and Eliot, Oprah Winfrey, Martin Luther, Franklin D. Roosevelt, Lee Kuang Kew, King Hussein, Ceasar Chavez, Mohammed Ali, and others Original essays by Stephen Covey, James Kouzes, Barry Posner, and John Pepper Expanded chapters on Psychology, Management, Political Science, The Military, Communications, and Leadership Theory Summaries of recently published leadership texts, including Gardner, Bennis, and Covey, with links to text chapters

FIA Managing Costs and Finances MA2

ACCA F9 Financial Management

BPP Learning Media's unique Passcards make the best use of your revision time. They summarise key topics to jog your memory and are packed with exam and assessment targeted guidance. Their innovative card format helps you revise at a glance. They are part of a market leading suite of materials BPP Learning Media has produced to help support students.

Studies on the Legend of the Holy Grail

An accessible, comprehensive reference to modern quantum mechanics and field theory. In surveying available books on advanced quantum mechanics and field theory, Franz Gross determined that while established books were outdated, newer titles tended to focus on recent developments and disregard the basics. *Relativistic Quantum Mechanics and Field Theory* fills this striking gap in the field. With a strong emphasis on applications to practical problems as well as calculations, Dr. Gross provides complete, up-to-date coverage of both elementary and advanced topics essential for a well-rounded understanding of the field. Developing the

material at a level accessible even to newcomers to quantum mechanics, the book begins with topics that every physicist should know-quantization of the electromagnetic field, relativistic one body wave equations, and the theoretical explanation of atomic decay. Subsequent chapters prepare readers for advanced work, covering such major topics as gauge theories, path integral techniques, spontaneous symmetry breaking, and an introduction to QCD, chiral symmetry, and the Standard Model. A special chapter is devoted to relativistic bound state wave equations-an important topic that is often overlooked in other books. Clear and concise throughout, Relativistic Quantum Mechanics and Field Theory boasts examples from atomic and nuclear physics as well as particle physics, and includes appendices with background material. It is an essential reference for anyone working in quantum mechanics today.

The Elements of Mathematical Logic

College Geometry

BPP Learning Media is an ACCA Approved Content Provider. Our partnership with ACCA means that our Study Texts, Practice & Revision Kits and iPass (for CBE papers only) are subject to a thorough ACCA examining team review. Our suite of
