Project Management Case Studies

This book blends classroom training with actual practice. It provides case studies for the students of Management, Commerce, Chartered Accountancy, and Cost and Work Accountancy. It contains case studies pertaining to Indian conditions and their suggestions.

Case Studies for Corporate Finance

A discussion-based learning approach to corporate finance fundamentals. Lessons in Corporate Finance explains the fundamentals of the field in an intuitive way, using a unique Socratic question and answer approach. Written by award-winning professors at M.I.T. and Tufts, this book draws on years of research and teaching to deliver a truly interactive learning experience. Each case study is designed to facilitate class discussion, based on a series of increasingly detailed questions and answers that reinforce conceptual insights with numerical examples. Complete coverage of all areas of corporate finance includes capital structure and financing needs along with project and company valuation, with specific

guidance on vital topics such as ratios and pro formas, dividends, debt maturity, asymmetric information, and more. Corporate finance is a complex field composed of a broad variety of sub-disciplines, each involving a specific skill set and nuanced body of knowledge. This text is designed to give you an intuitive understanding of the fundamentals to provide a solid foundation for more advanced study. Identify sources of funding and corporate capital structure Learn how managers increase the firm's value to shareholders Understand the tools and analysis methods used for allocation Explore the five methods of valuation with free cash flow to firm and equity Navigating the intricate operations of corporate finance requires a deep and instinctual understanding of the broad concepts and practical methods used every day. Interactive, discussion-based learning forces you to go beyond memorization and actually apply what you know, simultaneously developing your knowledge, skills, and instincts. Lessons in Corporate Finance provides a unique opportunity to go beyond traditional textbook study and gain skills that are useful in the field.

Corporate Finance for Business

Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

Case Studies in Infrastructure Delivery

The global movement toward universal health coverage (UHC) is accompanied by requests for large increases in government health spending in some countries. This combined with the global economic situation and stagnant economic growth across many low- and middle-income countries make it more critical than ever to place health financing discussions firmly in the context of macroeconomic and fiscal realities. Unfortunately, there is often a disconnect in decision making, with key fiscal decisions made in the absence of a clear understanding on the one hand of the potential consequences for the health sector, and on the other, the consequences for the country's macroeconomic and fiscal position of increasing or reallocating government spending. Constructive health financing policy dialogue aims to reach a common understanding between health sector leaders and central budget authorities about policy objectives for the health sector and the resources needed to achieve those objectives, how much priority will be given to health in the government budget, and how the health sector will be held accountable for using funds effectively. This common understanding should be built on a realistic picture of the country's macroeconomic and fiscal context, the constraints and competing priorities in the budget-

setting process. When ministries of health and ministries of finance have a common understanding of macroeconomic and fiscal constraints, discussions can focus productively on using funds within the potential health resource envelope in the most effective way to achieve health system objectives. This guidance note outlines the key components of the macroeconomic, fiscal, and public financial management context that need to be considered for an informed health financing discussion at the country level. The guidance note is organized around four sets of questions that are key to placing the health financing dialogue in the context of a country's macroeconomic and fiscal context. Each section points to measures, resources, and analytical tools that are available to assist in answering these questions for a specific country. The guidance note draws on case studies from 11 countries moving toward or sustaining universal health coverage conducted as part of the Japan†World Bank Partnership Program on UHC as well as from other country examples.

Applied Corporate Finance, 4th Edition

Financial Management

Explaining the real-world of mergers, acquisitions, and restructuring based on his own academic knowledge and experience, Donald DePamphilis shows how deals are done, rather than just explaining the theory behind them.

The Art of Company Valuation and Financial Statement Analysis

In the nonprofit sector, money drives mission. Well-managed budgets and investments can spur long-term growth and achievement, while financial mismanagement can damage or destroy an organization. Lynne A. Weikart, Greg G. Chen, and Ed Sermier—in their exciting new text geared wholly to nonprofits—provide the financial tools nonprofit managers need to thrive in pursuit of mission success. Given the wide array of nonprofit managers' backgrounds and a common fear of "the financials," the authors explain financial concepts without leaning unnecessarily on intimidating jargon. The result is a practical, accessible resource the prepares the next generation of nonprofit managers in financial planning and analysis as well as conventional and entrepreneurial financial management. Grounded in real-world cases and offering plenty of opportunity for application and practice, Budgeting and Financial Management for Nonprofit Organizations helps readers develop a stable fiscal foundation and sound financial strategies for their organizations to prosper in times of economic

expansion and contraction.

Financial Accounting, Reporting, and Analysis

This best-selling textbook addresses the need for an introduction to econometrics specifically written for finance students. Key features:

- Thoroughly revised and updated, including two new chapters on panel data and limited dependent variable models
- Problem-solving approach assumes no prior knowledge of econometrics emphasising intuition rather than formulae, giving students the skills and confidence to estimate and interpret models
- Detailed examples and case studies from finance show students how techniques are applied in real research
- Sample instructions and output from the popular computer package EViews enable students to implement models themselves and understand how to interpret results
- Gives advice on planning and executing a project in empirical finance, preparing students for using econometrics in practice
- Covers important modern topics such as time-series forecasting, volatility modelling, switching models and simulation methods
- Thoroughly class-tested in leading finance schools. Bundle with EViews student version 6 available. Please contact us for more details.

Corporate Finance

Examiners, lecturers and students know that practice is vital to exam success, so why not test your knowledge with these useful books? CIMA Q&A series Management Accounting: Case Study Final Level (FLCS) question papers and suggested answers from November 2002 Will provide a helpful guide to both students and lecturers in preparing for examinations Allows students to practice answering exam questions plus gives invaluable help in exam technique

Case Studies in Islamic Banking and Finance

Case method teaching immerses students in realistic business situations--which include incomplete information, time constraints, and conflicting goals. The class discussion inherent in case teaching is well known for stimulating the development of students' critical thinking skills, yet instructors often need guidance on managing that class discussion to maximize learning. Teaching with Cases focuses on practical advice for instructors that can be easily implemented. It covers how to plan a course, how to teach it, and how to evaluate it. The book is organized by the three elements required for a great case-based course: 1) advance planning by the instructor, including implementation of a student contract; 2) how to make leading a vibrant case discussion easier and more systematic; and 3) planning for student evaluation after the course is complete. Teaching with Cases is ideal for anyone interested in case teaching, whether basing an entire course on cases, using cases as a supplement, or simply using discussion facilitation techniques. To learn more about the book, and to

Case Studies in Finance

Case Problems in Finance is a Harvard case course presenting real business situations that pose debatable alternative courses of action. The cases contain problems that can be narrowed but not always settled by the usual techniques of financial analysis. It will teach students to discover ways of thinking that are productive in handling different types of managerial problems intelligently. The cases are grouped by major topics: financial analysis and forecasting, cost of capital, working capital management, capital budgeting, dividend policy, debt policy, financial execution, and mergers and restructuring.

Cases in Financial Planning

Includes case studies for assignments and classroom discussion Covers NP practice financial management Comprehensive instructor's manual available including presentation slides, chapter guides, and grading rubrics This textbook is designed for students preparing as advanced practice clinicians, including APRNs, DNPs, DPTs, DOTs, and physician assistants. The book covers both health policy issues and practice financial management issues. It is organized into seven sections in two parts. The first part is focused on macro issues in healthcare finance, and the second part is focused on healthcare financing management in professional practice. This approach provides the context necessary for the clinician to understand how to manage reimbursement requirements and preferred provider contracting as health care financial policy drives these payment and contracting strategies. Each section features a case study to facilitate classroom discussion on key points. This book is suitable for healthcare finance courses in the curriculum for MSN and DNP programs and also for schools of social work, medicine, occupational, and physical therapy.

Mergers, Acquisitions, and Other Restructuring Activities

50 Case Studies for Management & Supervisory Training

Many students want an introduction to finance. Those who are quantitatively-oriented learners can benefit in particular from an introduction that puts more emphasis on mathematics and graphical presentations than on verbal descriptions. By illustrating core finance facts and concepts through equations and graphical material, Finance: A Quantitative Introduction can help people studying business management, marketing, accounting, and other subjects. By using few lengthy verbal

explanations and many illustrations, it can teach readers quickly and efficiently. Chapter-concluding questions (with answers) and case studies enhance its utility as a textbook and a reference. Mixture of theory and problem-solving contains enough mathematical tools to help readers assess facts and evaluate real data in practical tasks. Short, simple presentation is perfect for non-native English speakers.

The Case Study Handbook, Revised Edition

Finance is a notoriously difficult core subject for business undergraduates, which many find difficult to understand. The area has been dominated by large and complex introductory texts - often from the US - which many lecturers find too detailed and unwieldy. This carefully developed and researched text will fill this gap by providing a succinct, modular, UK-focused introduction to the subject of financial management. Quality controlled by an academic review panel, the content and approach has been rigorously developed to answer the needs of non-finance students. The user-friendly features and design will be of great appeal to the many undergraduates who find finance a difficult subject. Examples, models, formulas, and exercises are lucidly and clearly presented, supported by strong pedagogical features - learning objectives, worked examples, key learning points, further reading, practical assignments, references, case studies and teacher's guide. This ensures that Financial Management will prove the most accessible text for business and finance students.

Management Accounting Case Study

Are you looking for an engaging, decision-focussed approach to financial reporting that encourages students to develop their interpretative skills? Building on the success of the first edition, this textbook takes a 'how, why, what' approach to financial accounting, interwoven in each chapter. From chapter one, students understand how financial information is prepared and presented, why it is prepared and presented in this way, and what the resulting financial information means for users. Designed for students taking a step beyond their introductory financial accounting training, the textbook equips them with all the key tools they will require when they enter professional practice. Reflective of the latest International Financial Reporting Standards (IFRS) and International Accounting Standards (IAS), this textbook delivers concise, clear explanations of all the key issues in accounting standards that students need to know. Content maps to professional accounting body syllabi, making this the perfect choice for accounting courses which offer exemptions. Chapters are rich with 3 types of examples to enhance understanding: - Illustrative examples of real-world situations; - Worked examples demonstrating the calculation of figures required for financial statements; - Extracts from company annual reports demonstrate how the theory relates to financial reporting in practice. More engaging, more balanced, and more applied than other offerings, this is exactly the textbook your financial reporting students need! An extensive Online Resource Centre accompanies the textbook and includes: For students: DT Solutions to all the end-of-chapter questions in the book

including walkthroughs of solutions to key questions; DT Additional graded questions including professional body questions; DT Additional interpretative case studies based on real-life companies; DT A guided tour through a company report DT Specific study skills tips for accounting students For lecturers: DT Customisable PowerPoint slides DT Solutions to all the additional online questions DT Outline solutions to the interpretative case studies DT Group discussion questions

Financial Accounting Cases

Strategic Financial Management Casebook strategically uses integrative case studies—cases that do not emphasize specific subjects such as capital budgeting or value based management—to provide a framework for understanding strategic financial management. By featuring holistic presentations, the book puts readers into the shoes of those responsible for the world's largest wealth creators. It covers strategies of growth, mergers and acquisitions, financial performance analysis over the past decade, wealth created in terms of stock returns since its listing in stock market, investment and financial decisions, cost of capital, and corporate valuation. In addition, the casebook also discusses corporate restructuring activities undertaken by each company. Each chapter follows a template to facilitate learning, and each features an Excel-based case analysis worksheet that includes a complete data set for financial analysis and valuation. Introduces a conceptual framework for integrating strategy and finance for value creation Emphasizes the roles of corporate governance, corporate social responsibility, and risk management in value creation Encourages an analysis of investment, financing, and dividend decisions Examines non-financial factors that contribute to value

Case Study Solutions - Financial Management

A unique, international approach to optimal real estate financing Property Finance is an authoritative guide to both the financial and legal issues surrounding real estate financing. Unique in its exclusive focus on the topic, this book builds from a solid theoretical foundation to provide practical tools and real-world solutions. Beginning with a discussion of the general issues encountered in real estate finance from an international perspective, the authors delve into country-specific information and set out the legal peculiarities of eight important countries (Germany, France, Italy, Spain, China, India, England and Wales) by asking questions of relevance to the leading local law firms specializing in real estate financing. The reader may thus consider in greater depth the problems relating to any given country and compare and contrast the positions under different legal systems. Examples with numerical calculations and contract excerpts enhance the explanations presented, and are immediately followed by practical case studies that illustrate the mechanisms at work. The companion website features downloadable spreadsheets used in the examples, power point presentations, as well as real estate news and more. Property financing entails many sources of capital, including both debt and equity resources as well as hybrid forms like preferred equity and mezzanine debt. Knowing how to work with these avenues is important to

ensuring financial sustainability in real estate assets. Property Finance covers the most common issues encountered, helping readers prepare for and find a way around possible roadblocks. Consider the issues surrounding real estate lending at an international level Compare and contrast the positions under different legal systems Develop an international perspective on cash flows and financing agreements Use powerful tools to structure financing and gauge its effects on property financing The success of a real estate investment is dependent upon optimal financing, and a mere bird's eye view of the topic does not fully prepare investors for issues ahead: Property Finance provides a knowledge-based approach to real estate investment, detailed information and powerful tools.

Budgeting and Financial Management for Nonprofit Organizations

Case Studies in Finance links managerial decisions to capital markets and the expectations of investors. At the core of almost all of the cases is a valuation task that requires students to look to financial markets for guidance in resolving the case problem. The focus on value helps managers understand the impact of the firm on the world around it. These cases also invite students to apply modern information technology to the analysis of managerial decisions. The cases may be taught in many different combinations. The eight-part sequence indicated by the table of contents relates to course designs used at the authors' schools. Each part of the casebook suggests a concept module, with a particular orientation.

Finance

"Professional accountants continue to be recognized for their strong technical knowledge. A strong technical background is still a foundational trait for professional accountants in protecting the public interest. Professional accounting bodies across the globe are recognizing the increased importance of higher-order cognitive skills such as critical thinking, problem solving, and analytical ability. Many accounting professors continue to struggle to find ways to focus on the development of higher-order skills in undergraduate programs. Case analysis is an important tool for developing these higher-order skills for financial reporting"--

Shake Shack IPO

Case Studies for Corporate Finance: From A (Anheuser) to Z (Zyys) (In 2 Volumes) provides a distinctive collection of 51 real business cases dealing with corporate finance issues over the period of 1985–2014. Written by Harold Bierman Jr, world-renowned author in the field of corporate finance, the book spans over different areas of finance which range from capital structures to leveraged buy-outs to restructuring. While the primary focus of the case studies is the economy of the United States, other parts of the world are also represented. Notable to this comprehensive case studies book are questions to

which unique solutions are offered in Volume 2, all of which aim to provide the reader with simulated experience of real business situations involving corporate financial decision-making. Case studies covered include that of Time Warner (1989–1991), The Walt Disney Company (1995), Exxon–Mobil (1998), Mitsubishi's Zero Coupon Convertible Bond (2000), and Apple (2014). Business Studies Latest Edition

Every CEO in the world, if questioned, will always complain that there are a lot of ideas to implement, but, unfortunately, insufficient resources to accomplish them. This book provides a solution to this dilemma by supplying techniques to assess the value of projects, prioritize projects, and decide which projects to implement and which to postpone. In addition, it describes various methods of balancing project portfolios and different strategic alignment models. The book provides thirty real-life project portfolio management case studies from pharmaceutical, product development, financial, energy, telecommunications, not-for-profit and professional services industries.

Case Studies in Finance

The first case study based guide to Islamic banking and finance. Based around 13 individual cases, the book stimulates discussion and develops the reader's understanding of Islamic finance by contrasting the existing theoretical knowledge against practical examples. Each chapter concludes with a set of questions designed to test the readers understanding of each case, with suggested solutions at the end of the book.

Introductory Econometrics for Finance

The guide all MBAs and executive students need. If you're enrolled in an MBA or executive education program, you've probably encountered a powerful learning tool: the business case. But if you're like many people, you may find interpreting and writing about cases mystifying and time-consuming. In *The Case Study Handbook, Revised Edition*, William Ellet presents a potent new approach for efficiently analyzing, discussing, and writing about cases. Early chapters show how to classify cases according to the analytical task they require (making a decision, performing an evaluation, or diagnosing a problem) and quickly establish a base of knowledge about a case. Strategies and templates, in addition to several sample Harvard Business School cases, help you apply the author's framework. Later in the book, Ellet shows how to write persuasive case-analytical essays based on the process laid out earlier. Examples of effective writing further reinforce the methods. The book also includes a chapter on how to talk about cases more effectively in class. Any current or prospective MBA or executive education student needs this guide.

Solving Modern Crime in Financial Markets

This pedagogically innovative and interactive corporate finance textbook not only introduces and develops core corporate finance material, but does so in a way that will capture the imagination of UK and international business and management students at undergraduate, postgraduate and professional level. As well as offering an in-depth examination of the key areas of the corporate finance syllabus, this text incorporates interesting and topical examples, cases and illustrations, bringing real life to bear on the concepts presented, and creating a lively, engaging learning tool. An activity-based approach and a unique, approachable writing style make this textbook the perfect companion for students on introductory corporate finance modules. Online Resource Centre For students * Key learning points for each chapter * Two further mini-cases for each chapter with questions and answers * Critical Thinking / review questions * Ten self test quantitative questions with answers * Pod cast introduction to chapters * Web-based simulation game * MP3 transcripts of interviews with finance specialists For lecturers * Instructor's manual to include PowerPoint Slides with a facility to customise into a course pack * Short answer questions / answers * Suggestions for discursive questions * Tutorial solutions and case study answer outlines * Testbank of questions on different levels (to follow the case study categories - theoretical, practical, strategic, investor, reflective)

Cases in Financial Management

The McGraw-Hill 36-Hour Course: Finance for Non-Financial Managers 3/E

Make simple sense of complex financial information! The high-profile accounting scandals of recent years have made one thing clear: You can't know too much about the company for which you work. What are the numbers? Where do you find them? How do they affect you and your staff? This fully revised and updated third edition of The McGraw-Hill 36-Hour Course: Finance for Nonfinancial Managers provides a firm grasp on what all the numbers really mean. Designed to let you learn at your own pace, it walks you through: The essential concepts of finance, so you can ask intelligent questions and understand the answers Vital statements and reports, with sections on pro forma financial statements and expensing of stock options The auditing process--what is measured, how it's measured, and how you can help ensure accuracy and completeness With chapter-ending quizzes and an online final exam, The McGraw-Hill 36-Hour Course: Finance for Nonfinancial Managers serves as a virtual professor, providing the curriculum you need to crunch the numbers like a pro!

Case Studies in Islamic Banking and Finance

This text is designed for courses in financial management, intermediate finance, or financial problems, and includes approximately 50 cases at three levels of difficulty. This provides the instructor with a variety of assignments but also provides students with a range of problem-solving practice materials. Each case is accompanied by questions to help guide student analysis, and organization of the text reflects coverage of all fundamental financial management concepts.

Health Financing Policy

The Art of Company Valuation and Financial Statement Analysis: A value investor's guide with real-life case studies covers all quantitative and qualitative approaches needed to evaluate the past and forecast the future performance of a company in a practical manner. Is a given stock over or undervalued? How can the future prospects of a company be evaluated? How can complex valuation methods be applied in practice? The Art of Company Valuation and Financial Statement Analysis answers each of these questions and conveys the principles of company valuation in an accessible and applicable way. Valuation theory is linked to the practice of investing through financial statement analysis and interpretation, analysis of business models, company valuation, stock analysis, portfolio management and value Investing. The book's unique approach is to illustrate each valuation method with a case study of actual company performance. More than 100 real case studies are included, supplementing the sound theoretical framework and offering potential investors a methodology that can easily be applied in practice. Written for asset managers, investment professionals and private investors who require a reliable, current and comprehensive guide to company valuation, the book aims to encourage readers to think like an entrepreneur, rather than a speculator, when it comes to investing in the stock markets. It is an approach that has led many to long term success and consistent returns that regularly outperform more opportunistic approaches to investment.

Healthcare Finance and Financial Management

Strategic Financial Management Casebook

This book of case studies is the companion to the author's text, Principles of Public and Private Infrastructure Delivery, published by Kluwer Academic Publishers. Together, the books are intended to provide an in-depth look at how project evaluation, procurement, and packaging are revolutionizing the role of civil engineers in managing collections of infrastructure assets. The case studies provide real-world implementations of the problems presented in the text. Each fascinating case study provides a hands-on learning experience, including discussion questions following the narrative. The book contains over 45 tables, 20 figures, and 100 exhibits.

Case Study in Finance

When famed fine-dining restaurateur Danny Meyer opened a hot dog cart in New York City's Madison Square Park in 2001, the venture drew legions of customers curious to experience Meyer's take on all-American street food. The curious became the committed and Meyer's little experiment acquired a permanent structure in the park - the Shake Shack. The Shack regularly drew long lines, leading Meyer to build a company around the concept. In a few years, Shake Shack expanded to a chain of burger restaurants in the United States and licensed outlets internationally. Meyer sought to differentiate Shake Shack from the long tradition of burger joints and chains that dotted the American landscape. First, Shake Shack was committed to high quality ingredients and efficient operations in each of its eateries. Secondly, the company selected high traffic locations and designed each outlet to fit into its chosen locale. Finally, Meyer wanted Shake Shack employees to create culture of hospitality that welcomed each customer as if Shake Shack was a fine-dining establishment, rather than a burger joint.

Raising Entrepreneurial Capital

Managers and supervisors will sharpen their analytical and decision-making skills with this new collection of fully reproducible case studies. Based on actual, real-life situations, these exercises prepare supervisors and team leaders for the challenging problems they face in today's complex workplace. Property Finance

Merging theory and practice into a comprehensive, highly-anticipated text Corporate Finance continues its legacy as one of the most popular financial textbooks, with well-established content from a diverse and highly respected author team. Unique in its features, this valuable text blends theory and practice with a direct, succinct style and commonsense presentation. Readers will be introduced to concepts in a situational framework, followed by a detailed discussion of techniques and tools. This latest edition includes new information on venture finance and debt structuring, and has been updated throughout with the most recent statistical tables. The companion website provides statistics, graphs, charts, articles, computer models, and classroom tools, and the free monthly newsletter keeps readers up to date on the latest happenings in the field. The authors have generously made themselves available for questions, promising an answer in seventy-two hours. Emphasizing how key concepts relate to real-world situations is what makes Corporate Finance a valuable reference with real relevance to the professional and student alike. Readers will gain insight into the methods and tools that shape the industry, allowing them to: Analyze investments with regard to hurdle rates, cash flows, side costs, and more Delve into the financing process and learn the tools and techniques of valuation Understand cash dividends and buybacks, spinoffs, and divestitures Explore the link between valuation and corporate finance As the global economy begins to recover, access to the most current information and statistics will be required. To remain relevant in the evolving financial environment, practitioners will need a deep understanding of the mechanisms at work. Corporate Finance provides the expert guidance and detailed explanations for those requiring a strong foundational knowledge, as well as more advanced corporate finance professionals.

Case Problems in Finance

Case Studies in Islamic Banking and Finance is a pioneering resource that provides practical insights into the real world of Islamic financial transactions, and illustrates the complexities of this rapidly growing mode of modern finance. Based around 12 individual cases, the book stimulates discussion and develops the reader's understanding of Islamic finance by contrasting the theoretical concepts discussed in the author's companion text Introduction to Islamic Banking and Finance with practical real world situations. The cases cover core Islamic banking and finance topics including the Ijara, Mudaraba and Musharaka contracts; Islamic mortgages for home finance; leverage; and issues involved in opening an Islamic bank. Financial statement analysis for Islamic banks, the implications for fund management for equity investing and the impact of loan defaults on Islamic and conventional banks are also included. Each chapter concludes with a set of questions designed to test the reader's understanding of each case, with suggested solutions at the end of the book. This book is a must have

resource for those wishing to apply their understanding of this complex subject and is an essential read for anyone seeking practical examples of how to apply the concepts in a real world environment.

Project Portfolio Management in Theory and Practice

Cases in Finance

This comprehensive source of information about financial fraud delivers a mature approach to fraud detection and prevention. It brings together all important aspect of analytics used in investigating modern crime in financial markets and uses R for its statistical examples. It focuses on crime in financial markets as opposed to the financial industry, and it highlights technical aspects of crime detection and prevention as opposed to their qualitative aspects. For those with strong analytic skills, this book unleashes the usefulness of powerful predictive and prescriptive analytics in predicting and preventing modern crime in financial markets. Interviews and case studies provide context and depth to examples Case studies use R, the powerful statistical freeware tool Useful in classroom and professional contexts

Teaching with Cases

Raising Entrepreneurial Capital begins where entrepreneurship books leave off. This book provides a broad, high-level

discussion of the financing decisions that companies must make to achieve success. With a focus on classic capital raising, the text covers the debt vs. equity decision, as well as the options available to smaller businesses. It also describes the factors that lead to rapid growth, including venture capital, IPOs, angels, incubators, and much more. Combining solid theory with practitioner's experience and insights, this book should increase student understanding of how to raise entrepreneurial capital. It explains how your company should position itself to attract private equity investment, and what steps you can take to improve your company's marketability. It includes several chapters on worldwide regional variations on forms and availability of pre-seed capital, incubators, and the business plans they create, with case-studies from Europe, Latin America, and the Pacific Rim. It also effectively differentiates between venture capital and entrepreneurial capital. This book will appeal to entrepreneurs and to students in Entrepreneurship programs, particularly entrepreneurial finance courses. * Combines solid theory with practitioner's experience and insights * Case studies illustrate theory throughout the book * Describes worldwide and regional variations in capital raising strategies
