where to start, it provides a good base for records. This book makes an excellent gift to accompany anyone's first firearm. For the collector/investor. It serves as a log book, recording transactions and point of sale information from acquisition to sale of the weapon in one place. It allows freeform annotation of modifications made to the weapon to ensure the investment is properly catalogued. For the heirloom. It also provides a notes section for the owner to annotate heirloom items for future generations. For the Insurance company. This book is an excellent record for producing information about these valuable firearms when filing insurance claims after any disaster. Report of theft to authorities. This book records information necessary to properly identify the weapon in the event the authorities need to identify a stolen firearm. About this log book: The fields contained in this book were written in a manner to enable logical collection of information related to the firearm. Substantial effort was put into deciding what types of information most collectors were interested in retaining on their firearms, in addition to generic legal requirements for logging weapon information. There are specific fields for details of the firearm, receipt data, as well as disposition data for those instances when a firearm is sold or traded. In addition to a page dedicated to the owner's information, this publication gives space for 100 firearms (2 firearms per page, 50 pages of inventory). It also includes four pages for miscellaneous free-form notes.

based policy response. The Johns Hopkins University convened more than 20 of the world's leading experts on gun violence and policy to summarize relevant research and recommend policies that are both constitutional and have broad public support. Collected for the first time in one volume, this reliable, empirical research and legal analysis will help lawmakers, opinion leaders, and concerned citizens identify policy changes to address mass shootings, along with the less-publicized gun violence that takes an average of 80 lives every day. Selected recommendations include:

- **Background checks:** Establish a universal background check system for all persons purchasing a firearm from any seller.
- **High-risk individuals:** Expand the set of conditions that disqualify an individual from legally purchasing a firearm.
- **Mental health:** Focus federal restrictions on gun purchases by persons with serious mental illness on the dangerousness of the individual.
- **Trafficking and dealer licensing:** Appoint a permanent director to ATF and provide the agency with the authority to develop a range of sanctions for gun dealers who violate gun sales or other laws.
- **Personalized guns:** Provide financial incentives to states to mandate childproof or personalized guns.
- **Assault weapons and high-capacity magazines:** Ban the future sale of assault weapons and the future sale and possession of large-capacity ammunition magazines.
- **Research funds:** Provide adequate federal funds to the Centers for Disease Control and Prevention, National Institutes of Health, and National Institute of Justice for research into the causes and solutions of gun violence.

The book includes an analysis of the constitutionality of many recommended policies and data from a national

Ballistic Imaging assesses the state of computer-based imaging technology in forensic firearms identification. The book evaluates the current law enforcement database of images of crime-related cartridge cases and bullets and recommends ways to improve the usefulness of the technology for suggesting leads in criminal investigations. It also advises against the construction of a national reference database that would include images from test-fires of every newly manufactured or imported firearm in the United States. The book also suggests further research on an alternate method for generating an investigative lead to the location where a gun was first sold: "microstamping," the direct

The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) is responsible for enforcing certain criminal statutes related to firearms, and must balance its role in combatting the illegal use of firearms with protecting the privacy rights of law-abiding gun owners. As part of this balance, federal firearms licensees (FFLs) are required to maintain firearms transaction records, while ATF has the statutory authority to obtain these records under certain circumstances. ATF must also comply with an appropriations act provision that restricts the agency from using appropriated funds to consolidate or centralize FFL records. This report (1) identifies the ATF data systems that contain retail firearms purchaser data; and (2) determines whether selected ATF data systems comply with the appropriations act restriction and adhere to ATF policies. ### **Can Gun Control Work?**

This book describes the people, processes, and technologies needed to extract actionable intelligence from the inside, and outside, of crime guns.

### **Firearm Acquisition & Disposition Log**

Could a data-driven, problem-solving approach yield new interventions to disrupt local, illegal gun markets serving criminals, gang members, and juveniles in Los Angeles? Law enforcement can analyze patterns in crime-gun data to trace illicit firearm acquisition, use community-based interventions to stem the illegal flow, and use retail ammunition-purchase records in identifying prohibited firearm possessors.
