Review your notes each day. Note: There are 2 versions of each powerpoint lecture. The "9e" goes with Campbell Biology (9th Edition). Chapter 2 (9e) Intro to Chemistry Forensic Science. Longmont High School. CU Succeed Program.

Forensic photography - Wikipedia

Toxicology is a scientific discipline, overlapping with biology, chemistry, pharmacology, and medicine, that involves the study of the adverse effects of chemical substances on living organisms and the practice of diagnosing and treating exposures to toxins and toxicants. The relationship between dose and its effects on the exposed organism is of high significance in toxicology.

In the United States, there are two main tests for admissibility of scientific information from experts. One is the Frye test, enunciated in Frye v. United States.¹ The other is a "helpfulness" standard found in the Federal Rules of Evidence and many of its state counterparts. In addition, several states have recently enacted laws that essentially mandate the admission of DNA typing evidence.
