Vegan Cooking for Carnivores

This book presents, in an innovative and effective way, a detailed coverage of Greek history from the period of colonisation through to the death of Alexander the Great. A prologue introduces the reader to the various types of source material used by historians, and wherever possible the most relevant examples of this - both written and archaeological - have been provided or referred to, giving the benefit of firsthand contact with the sources. The text would be used most effectively in conjunction with the most recent publication of the written sources. The book contains many photographs, maps and diagrams, and includes time lines, summaries, mapping exercises and study questions through which the reader comes to grip with the major issues. This is not only an excellent preparation for examinations in Ancient History, but also a very readable and entertaining account of the main periods in the history of ancient Greece.

1983-84 Manual for Railway Engineering

OUT OF THE FLESH of our mothers come dreams and memories of the Gods. Of other kind than the normal inducement of interest and increasing skill, there exists a continual pressure upon the artist of which he is sometimes partially conscious but rarely entirely aware. He learns early or late in his career that power of literal reproduction (such as that of the photographic apparatus) is not more than slightly useful to him. He is compelled to find out from his artist predecessors the existence, in representation of real form, of super-sessions of immediate accuracies; he discovers within himself a selective conscience and he is satisfied, normally, in large measure by the extensive field afforded by this broadened and simplified beyond this is a region and that a much greater one, for exploration. The objective understanding, as we see, has to be attacked by the artist and a subconscious method, for correction of conscious visual accuracy, must be used. No amount of manual skill and consciousness of error will produce good drawing. A recent book on drawing by a well-known painter is a case in point; there the examples of masters of draughtsmanship may be compared with the painter-author's own, side by side, and the futility of mere skill and interest examined. Therefore to proceed further, it is necessary to dispose of the subject in art also (that is to say the subject in the illustrative or complex sense). Thus to clear the mind of inessentials permits through a clear and transparent medium, without prepossessions of any kind, the most definite and simple forms and ideas to attain expression.
