Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. Take a trip to exotic South Florida with this dark, funny book that established Carl Hiaasen as one of the top mystery writers in the game. The first sign of trouble is a Shriner's fez washed up on a Miami beach. The next is a suitcase containing the almost-legless body of the local chamber of commerce president found floating in a canal. The locals are desperate to keep the murders under wraps and the tourist money flowing. But it will take a reporter-turned-private eye to make sense of a caper that mixes football players, politicians, and one very hungry crocodile in this classic mystery that GQ called "one of the top ten destination reads of all time."

Giacomo Girolamo Casanova was born in Venice in 1725 to actress Zanetta Farussi, wife of actor and dancer Gaetano Giuseppe Casanova. Giacomo was the first of six children, being followed by Francesco Giuseppe (1727-1803), Giovanni Battista (1730-1795), Faustina Maddalena (1731-1736), Maria Maddalena Antonia Stella (1732-1800), and Gaetano Alvisé (1734-1783). At the time of Casanova's birth, the Republic of Venice thrived as the pleasure capital of Europe, ruled by political and religious conservatives who tolerated social vices and encouraged tourism. It was a required stop on the Grand Tour, traveled by young men coming of age, especially Englishmen. The famed Carnival, gambling houses, and beautiful courtesans were powerful drawing cards. This was the milieu that bred Casanova and made him its most famous and representative citizen. -wikipedia

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The Grand Tour has become a subject of major interest to scholars and general readers interested in exploring the historic connections between nations and their intellectual and artistic production. Although traditionally associated with the eighteenth century, when wealthy Englishmen would complete their education on the continent, the Grand Tour is here investigated in a wider context, from the decline of the Roman Empire to recent times. Authors from Chaucer to Erasmus came to mock the custom but even the Reformation did not stop the urge to travel. From the mid-sixteenth century, northern Europeans justified travel to the south in terms of education. The English had previously travelled to Italy to study the classics; now they travelled to learn Italian and study medicine, diplomacy, dancing, riding, fencing, and, eventually, art and architecture. Famous men, and an increasing proportion of women, all contributed to establishing a convention which eventually came to dominate European culture. Documenting the lives and travels of these personalities, Professor Chaney's remarkable book provides a complete picture of one of the most fascinating phenomena in the history of western civilisation.

The facts and findings presented in this guide confirm that employment in tourism and the economic value of tourism in terms of employment remain inadequately measured and insufficiently studied. Employment in the tourism industries needs to be measured and described in a more consistent way supported by proper statistical instruments developed on international tools and enhanced through international cooperation. This guide provides some examples of best practices of measuring employment in the tourism industries from countries that have demonstrated capacity to develop a comprehensive set of employment indicators. This publication is a joint project by the International Labour Organization (ILO) and UNWTO.

Selling British Columbia is an entertaining examination of the development of the tourist industry in British Columbia between 1890 and 1970. Michael Dawson argues that in order to understand the roots of the fully-fledged consumer culture that emerged in Canada after the Second World War, it is necessary to understand the connections between the 1930s, 1940s, and the postwar era. Cultural producers such as tourism promoters and the state infrastructure played important roles in fostering consumer demand, particularly during the Depression, the Second World War, and throughout the postwar era. Dawson draws upon promotional pamphlets, newspapers, advertisements, and films, as well as archival sources regarding government, civic, and international tourism organizations. Central to his book is an examination of the representation of popular imagery and of how aboriginal and British cultures were commodified and marketed to potential tourists. He also looks at the gendered aspect of these promotional campaigns, particularly during the 1940s, and challenges earlier interpretations regarding the relationship between tourism and nature in Canada. Historians have tended to focus on either the first wave of consumerism from the 1880s to the 1920s, or else on the era of economic expansion that followed World War Two. As Dawson shows, the 1930-45 period in particular was an important and dynamic one in the creation of Canadian and British Columbian consumer culture. Michael Dawson's highly readable and engaging account of the development of the British Columbia tourist industry will be welcomed by British Columbian and Canadian historians, as well as other scholars of tourism and consumerism.

In this classic analysis of travel and sightseeing, author Dean MacCannell brings social scientific understandings to bear on tourism in the postindustrial age, during which the middle class has acquired leisure time for international travel. In *The Tourist*—now with a new introduction framing it as part of a broader contemporary social and cultural analysis—the author examines notions of authenticity, high and low culture, and the construction of social reality around tourism.
