Curriculum Review

Pennsylvania School Journal

Saturday, 23 June 1990-Sunday, 24 June 1990

Private Independent Schools

Technology Century

Presents information on 4-year colleges and universities and 2-year community colleges and technical schools.

Darwin Day in America

Report

Exceptional Child Education Abstracts

Winds of Change

Historical Outlook

Ohio Public Employee Reporter

Architectural Program Report, June 1997

Des Moines Public Schools General Science Course of Study June, 1933

CTA Journal

Guides students on the path to a career working with animals by helping them take a proactive, hands-on approach to career exploration. Job profiles include animal shelter workers, park workers, and veterinarians.

The College Blue Book

Oakland Public Schools; Superintendent's Bulletin

Childcraft

Science in China

Journal

Peterson's Private Secondary Schools: Special Needs Schools provides the help parents need to find the right therapeutic or special needs school for their child. Readers will find dozens of school profiles plus links to informative two-page in-depth descriptions written by some of the schools. Helpful information includes the school's area of specialization, setting, affiliation, accreditation, subjects offered, special academic programs, tuition, financial aid, student profile, faculty, academic programs, student life, admission information, contacts, and much more.

Research in Education

Includes "Official program of the meeting of the Pennsylvania State Educational Association (sometimes separately paged).

Education Manitoba

Library Journal

Directory of Canadian Universities

The College Handbook

International Aerospace Abstracts

South Africa Yearbook

Index to the Periodicals of 1890-1902

Introduces careers in the science fields, including career opportunities, ways of preparing for finding a job, and related activities such as volunteering, internship, and summer study programs.

Private Secondary Schools: Special Needs Schools

Annual Report for the Year Ended June 30

Comprehensive Assessment Report

At the dawn of the last century, leading scientists and politicians giddily predicted that science—especially Darwinian biology—would supply solutions to all the intractable problems of American society, from crime to poverty to sexual maladjustment. Instead, politics and culture were dehumanized as scientific experts began treating human beings as little more than animals or machines. In criminal justice, these experts denied the existence of free will and proposed replacing punishment with invasive “cures” such as the lobotomy. In welfare, they proposed eliminating the poor by sterilizing those deemed biologically unfit. In business, they urged the selection of workers based on racist theories of human evolution and the development of advertising methods to more effectively manipulate consumer behavior. In sex education, they advocated creating a new sexual morality based on “normal mammalian behavior” without regard to longstanding ethical and religious imperatives. Based on extensive research with primary sources and archival materials, John G. West’s captivating *Darwin Day in America* tells the story of how American public policy has been corrupted by scientific ideology. Marshaling fascinating anecdotes and damning quotations, West’s narrative explores the far-reaching consequences for society when scientists and politicians deny the essential differences between human beings and the rest of nature. It also exposes the disastrous results that ensue when experts claiming to speak for science turn out to be wrong. West concludes with a powerful plea for the restoration of democratic accountability in an age of experts.

Dictionary Catalog of Official Publications of the State of New York

Summer on Campus

Pennsylvania Crops

Describes more than 400 academic pre-college summer programs for high school students in colleges across the United States
