*** THOUSANDS OF READERS HAVE FOUND A HOME WITH THE PARANORMAL POLICE DEPARTMENT. GET YOUR BADGE TODAY! *** In the Badlands, you keep your enemies close and the monsters closer.

Welcome to the Badlands Paranormal Police Department, where Chief Ezekias 'Zeke' Phoenix, a dragon who believes rules are meant to be followed, has accepted his new post. His job is simple: keep the fragile peace between dragons, hellions, and the denizens of hell. The rules in Infernal City are even simpler: mind your business, watch your back, shoot first, and don't bother asking questions. When a dead hellion crashes into his life, Zeke and the Badlands PPD will break all the rules of the City. To find the killer, he's going to make some powerful enemies who would prefer to see the new dragon chief of the PPD retired permanently. If Zeke fails, the Badlands will plunge into a civil war. If he succeeds, he places a target on his back, and his enemies rarely miss. Will Zeke risk setting off the powder keg of Infernal City? Will he find the killer and bring him to justice before the Badlands becomes a wasteland? Or will they give him an early retirement packagesudden death? If you

Department. Questions for John P. Logsdon Q: What do you enjoy most about writing the Paranormal Police Department with other authors? A: It's flippin' fun as hell. We work out characters, plots, locations, and so on as a team. Then, the words hit the page and we roll along at breakneck speed because it's just a blast working together in this world! Q: Why should readers want to jump into the world of the Paranormal Police Department? A: A few reasons, actually. It's high-action, often hilarious, and just plain fun. On top of that, there are multiple precincts in the PPD for readers to enjoy. So, while this series of books covers Zeke Phoenix and the Badlands PPD, there are different lead characters running the PPD precincts in New York, Las Vegas, the Netherworld, Seattle, Shadow, and Southeast Asia. That means that readers who crave action and adventure are going to have tons of action-packed, laugh-out-loud stories to consume with a vengeance. We're already over twenty books in and there's a new book releasing every 2-3 weeks in 2018-2019. Q: Anything else you'd like to leave readers with? A: If you're into naughty humor and high-octane adventures, you need to give the Paranormal Police Department a shot. That's what all the authors in the PPD love to read, which means it's also what we love to write. Dusty beasts. An angry pixie. A relationship on the edge. Las Vegas paranormal police chief and horndog Ian Dex struggles with his feelings toward Rachel Cress as the Vegas Strip gets thrown into a maelstrom of beasts who are bent on destruction. But soon they find themselves in the limelight because tourists think it's one of the best and most realistic shows they've ever seen. It gets even worse when they find out that some of the creatures being created are made from normals. To stop the uber pixie from taking over the town with his dusty creations, Ian's crew must find a way to track the guy and bring him to his knees. Failure means the Vegas Strip will fall under the rule of a flippin' pixie, and that'd just be embarrassing. *Swarm of Fire: An Ian Dex Supernatural Novel* is the fun-filled fifth book in the Las Vegas Paranormal Police Department series, a set of urban

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping
- The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service

In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology,

and other fields to shed new light on how we can effect transformative change. Switch shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

Complete Scoundrel

Thirteen passengers are stranded at an airport. Tokyo, their destination, is covered in snow and all flights are cancelled. To pass the night they form a huddle by the silent baggage carousels and tell one another stories. Thus begins Rana Dasgupta's Canterbury Tales for our times. In the spirit of Borges and Calvino, Dasgupta's writing combines an energetically modern landscape with a timeless, beguiling fairy-tale ethos, while bringing to life a cast of extraordinary individuals-some lost, some confused, some happy-in a world that remains ineffable, inexplicable, and wonderful. A Ukrainian merchant is led by a wingless bird back to a lost lover; Robert De Niro's son masters the transubstantiation of matter and turns it against his enemies; a man who manipulates other people's memories has to confront his own past; a Japanese entrepreneur risks losing everything in his obsession with a doll; a mute Turkish girl is left alone in the house of a German man who is mapping the world. Told by people on a journey, these are stories about lives in transit, stories that grow into an epic cycle about the hopes and dreams and disappointments that connect people everywhere.

Ever have one of those nights where a necromancer unleashes a zombie army and you get stuck having to deal with it? That's the kind of night Ian Dex is having. Cemeteries are coming undone and the crew of the Las Vegas Paranormal Police Department has to figure out who the hell is causing it. Fast.

Unfortunately, the necromancer who is responsible keeps slipping through their fingers. Even more fun is that every time the guy brings up a fresh batch of zombies, they're altered in a fashion to improve their chances at defeating the PPD. This means he's learning with each new release of his reanimated corpses. On top of that, it turns out that he's been building a massive army of zombies via graves way out in the desert. With the sheer number of zombies headed their way, Ian and his crew understand they're going to need help. But involving normals is not exactly something the PPD gets all warm and fuzzy about. So they need to figure out a sneaky way to get it done. The only silver lining that Ian can find in this mess is when a succubus breaks into his condo and does her best to seduce him.

Continental philosophy has entered a new period of ferment. The long deconstructionist era was followed with a period dominated by Deleuze, which has in turn evolved into a new situation still difficult to define. However, one common thread running through the new brand of continental positions is a

renewed attention to materialist and realist options in philosophy. Among the leaders of the established generation, this new focus takes numerous forms. It might be hard to find many shared positions in the writings of Badiou, DeLanda, Laruelle, Latour, Stengers, and i ek, but what is missing from their positions is an obsession with the critique of written texts. All of them elaborate a positive ontology, despite the incompatibility of their results. Meanwhile, the new generation of continental thinkers is pushing these trends still further, as seen in currents ranging from transcendental materialism to the London-based speculative realism movement to new revivals of Derrida. As indicated by the title *The Speculative Turn*, the new currents of continental philosophy depart from the text-centered hermeneutic models of the past and engage in daring speculations about the nature of reality itself. This anthology assembles authors, of several generations and numerous nationalities, who will be at the centre of debate in continental philosophy for decades to come."

H.P. Lovecraft, the American master of horror, understood with horrible clarity that all things must die. After summer is winter, and life inevitably gives way to frozen sterility. In our modern world, we live cushioned existences, and congratulate ourselves on our supposed escape from the old dangers. We think ourselves caught out of nature's reach by our technological wizardry. Safely cocooned. This foolishness blinds us to the truth that our elder

forebears could not avoid. Engulfed by the rhythms of the world, they understood Autumn means death. There are far worse fates than mere death, of course. As blight spreads, the leaves wither and fall - as do the most important foundations of life. There is nothing more horrible than watching the sources of meaning in your world unravel before you. But these things we cherish are just pretty lies. In autumn's cold grasp, the bright petals of our reality shrivel and die. Beneath them, there is nothing but the insanity of the howling void. Faced with inevitable, agonizing corruption, death is a gentle blessing. The stories collected in Autumn Cthulhu reflect the darkest, most ancient truths of the season. Inside, you'll find nineteen beautiful, terrifying glimpses of decay and loss inspired by Lovecraft's work. Be sure that you want the burden of understanding before venturing further, though. The dissolving strands of mind, of love, of legacy within leave no room for merciful doubt. The true meaning of life is that there is no meaning. "From Nadia Bulkin's sharp, politically savvy creeper to John Langan's stunning epic novella, Mike Davis's anthology is a compelling, eclectic collection of stories from some of today's best and brightest. "Autumn Cthulhu" does more than find its place within the Lovecraftian/weird fiction universe, it expands it." -- Paul Tremblay, author of "A Head Full of Ghosts" and "Disappearance at Devil's Rock" (NOTE: The print edition of "Autumn Cthulhu" contains four story illustrations that were used for promotional purposes. "A major contribution to the study of global events in times of global media. Owning the Olympics tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover." —Guobin Yang, Associate Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the "New China"---a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, Owning the Olympics reveals how multiple entities---including the Chinese

Eclipses have long been seen as important celestial phenomena, whether as omens affecting the future of kingdoms, or as useful astronomical events to help in deriving essential parameters for theories of the motion of the moon and sun. This is the first book to collect together all presently known records of timed eclipse observations and predictions from antiquity to the time of the invention of the telescope. In addition to cataloguing and assessing the accuracy of the various records, which come from regions as diverse as Ancient Mesopotamia, China, and Europe, the sources in which they are found are described in detail. Related questions such as what type of clocks were used to time the observations, how the eclipse predictions were made, and how these prediction

The results of this investigation have important consequences for how we understand the relationship between observation and theory in early science and the role of astronomy in early cultures, and will be of interest to historians of science, astronomers, and ancient and medieval historians.

The Netherworld Paranormal Police Department's toughest Retriever, Piper Shaw, is sent to track down an escaped prisoner. When it comes out that the escapee, Gallien Cross, is the guy who was originally involved in turning normals into vampire zombies, Piper finds herself in a battle that will put her immortality to the test. But in order to capture Cross, she must first figure out a way to track the man and take him down before he gets too powerful. To make matters worse, she has to bring a rookie by the name of Reaper Payne along for the ride. The duo has to battle through tough goons, vampire zombies, and Cross himself. But things aren't always what they seem, and when she finally learns the full story, it may just be too late for everyone.

Why sell your soul when you can rent it? Mark Vedis is an average cop. Average for a mage in the Paranormal Police Department (PPD), anyway. After years of doing the jobs nobody else wanted, his career, and life, seemed to be on hold. Then he met a foul-mouthed demon who filled him with power, turned him into a warlock, and dumped him into a world of wealth and debauchery that was disturbing at best. When an enemy strikes who is far beyond what the cops in the PPD have ever seen, Mark is forced to travel to Thailand and face threats from all sides. But he soon learns that the chief of the Bangkok PPD is on the take, the local mafia is stirring up trouble, two of his team members have already been killed, and his new partners have trouble keeping their clothes on in public. "Fundamentals of Tissue Engineering and Regenerative Medicine" provides a complete overview of the state of the art in tissue engineering and regenerative medicine. Tissue engineering has grown tremendously during the past decade. Advances in genetic medicine and stem cell technology have significantly improved the potential to influence cell and tissue performance, and have recently expanded the field towards regenerative medicine. In recent years a number of approaches have been used routinely in daily clinical practice, others have been introduced in clinical studies, and multitudes are in the preclinical testing phase. Because of these developments, there is a need to provide comprehensive and detailed information for researchers and clinicians on this rapidly expanding field. This book offers, in a single volume, the prerequisites of a comprehensive understanding of tissue engineering and regenerative medicine. The book is conceptualized according to a didactic approach (general aspects: social, economic, and ethical considerations; basic biological aspects of

regenerative medicine: stem cell medicine, biomolecules, genetic engineering; classic methods of tissue engineering: cell, tissue, organ culture; biotechnological issues: scaffolds; bioreactors, laboratory work; and an extended medical discipline oriented approach: review of clinical use in the various medical specialties). The content of the book, written in 68 chapters by the world's leading research and clinical specialists in their discipline, represents therefore the recent intellect, experience, and state of this bio-medical field.

One of the outstanding problems of the biologist, whether he be beginning student or specialists, is that of understanding technical terms. The best way to understand and remember technical terms is to understand first their component parts, or roots. This dictionary has been designed primarily to meet the needs of the beginning student, the medical student, and the taxonomist, but it should be of value to all biologists.

Lucinda Cole's *Imperfect Creatures* offers the first full-length study of the shifting, unstable, but foundational status of "vermin" as creatures and category in the early modern literary, scientific, and political imagination. In the space between theology and an emergent empiricism, Cole's argument engages a wide historical swath of canonical early modern literary texts—William Shakespeare's *Macbeth*, Christopher Marlowe's *The Jew of Malta*, Abraham Cowley's *The Plagues of Egypt*, Thomas Shadwell's *The Virtuoso*, the Earl of Rochester's "A Ramble in St. James's Park," and Daniel Defoe's *Robinson Crusoe* and *Journal of the Plague Year*—alongside other nonliterary primary sources and under-examined archival materials from the period, including treatises on animal trials, grain shortages, rabies, and comparative neuroanatomy. As Cole illustrates, human health and demographic problems—notably those of feeding populations periodically stricken by hunger, disease, and famine—were tied to larger questions about food supplies, property laws, national identity, and the theological imperatives that underwrote humankind's claim to dominion over the animal kingdom. In this context, Cole's study indicates, so-called "vermin" occupied liminal spaces between subject and object, nature and animal, animal and the devil, the devil and disease—even reason and madness. This verminous discourse formed a foundational category used to carve out humankind's relationship to an unpredictable, irrational natural world, but it evolved into a form for thinking about not merely animals but anything that threatened the health of the body

politic—humans, animals, and even thoughts.

of older children, adults, and the family unit as a whole. These moral evaluations are, in turn, influenced by such external contingencies as population demography, social and economic factors, subsistence strategies, house hold composition, and by cultural ideas concerning the nature of infancy and childhood, definitions of personhood, and beliefs about the soul and its immortality. MOTHER LOVE AND CHILD DEATH Of all the many factors that endanger the lives of young children, by far the most difficult to examine with any degree of dispassionate objectivity is the quality of parenting. Historians and social scientists, no less than the public at large, are influenced by old cultural myths about childhood innocence and mother love as well as their opposites. The terrible power and significance attributed to maternal behavior (in particular) is a commonsense perception based on the observation that the human infant (specialized as it is for prematurity and prolonged dependency) simply cannot survive for very long without considerable maternal love and care. The infant's life depends, to a very great extent, on the good will of others, but most especially, of course, that of the mother. Consequently, it has been the fate of mothers throughout history to appear in strange and distorted forms. They may appear as larger than life or as invisible; as all-powerful and destructive; or as helpless and angelic. Myths of the maternal instinct compete, historically, with myths of a universal

differential diagnosis. Practical overviews for procedures such as blood transfusion, abdominal paracentesis, and ECG give you reliable support for some of the most common procedures in bovine care. Body systems organization makes diagnosis easier and more effective by isolating system-specific diseases and conditions. Full-color design and over 200 new photographs depict disease processes in realistic clarity and ensure the most accurate diagnosis and treatment. Emphasis on herd health addresses the dairy industry's increased concern over population medicine. Expanded coverage of lameness highlights key problem areas in bovine feet. Revised drug usage recommendations and legal considerations present the most current information in these critical areas to help you prevent dangerous or costly errors. Additional public health/safety considerations identify diseases that pose a substantial public threat and detail special measures for related care of dairy cattle. New, innovative DVD features real-time videos of neurologic case studies, ultrasound and endoscopy procedures, and imaging techniques that familiarize you with the latest technological equipment and protocols. Features coverage of the latest treatment innovations including antibiotic residue testing, care of individual metabolic disease, troubleshooting, and much more.

written in a mythic/fantasy style and is associated with his Dream Cycle. It was first published in The Scot, a Scottish amateur fiction magazine, in June 1920. According to the tale, more than 10,000 years ago, a race of shepherd people colonized the banks of the river Ai, in a land called Mnar, forming the cities of Thraa, Ilarneq, and Kadatheron (not to be confused with Kadath), which rose to great intellectual and mercantile prowess. Craving more land, a group of these hardy people migrated to the shores of a lonely and vast lake at the heart of Mnar, founding the city of Sarnath.

A set of naughty ubernaturals, a demon-powered mage, and a wealthy amalgamite playboy who is far more than he seems. Ian Dex is a genetically engineered man who has abilities from all classes in the spectrum. He's also the chief of the Las Vegas Paranormal Police Department (PPD). His job is to monitor all supernaturals and their involvement in the world of normals. It's been a mostly boring gig, until now. A new breed of supernaturals has turned up and they're a lot tougher to deal with than your run-of-the-mill vampires and werewolves. These are larger, tougher, and stronger and they laugh at wood and silver bullets. But fighting these ubernaturals only gets worse when the mage who created them arrives on the scene. He is bent on world domination, inflicting as much pain as possible, and walking around with his shirt open because he looks like a Chippendale's model. And to make things even more fun, he's using demons to give him an inexhaustible supply of power. Join Ian and his crew as they fight werewolves, vampires, fae, demons, a succubus, and a mage while trying to stop Vegas from getting flipped on its head!
