Design has always been largely about systems, and how to create products in a scalable and repeatable way. From Pantone colors to Philips screws, these systems enable us to manage the chaos and create better products. Digital products are perhaps the most fertile ground for implementing these systems and yet it's not often considered a priority.

Grid - Wikipedia

In the digital world, the grid system acts similarly to the print layout in organizing the elements on the page. Additionally, it provides a guide for designers to create multiple layouts that support responsive themes for different screen sizes.
