Going Paleo

The groundbreaking discovery that shows why women need fat to lose fat. Why do women struggle so much with weight? Can women ever lose weight and keep it off? In this research-driven and counterintuitive book, an anthropologist and a public health doctor team up to answer those questions. Blending anecdotal evidence with hard science, they explain how women's weight is controlled by evolution-but more important- they reveal how a change in diet three decades ago may be the reason women today are bigger than their grandmothers were. Explaining why fat (both in our diet and in our body) is crucial to long-term health, the authors show not only why women tend (and need) to get heavier after having their first child, but also destroy cultural myths like "all fat is bad for you." Providing a plan that can help any woman achieve a natural, healthy weight- without dieting- *Why Women Need Fat* not only gives women the tools they need to shed weight, but also a better understanding of why those last five pounds seem impossible to lose.

Living the Healthy Life

We don't need to be instructed to eat apples instead of potato chips. What we need is someone to inspire us to eat well and to show us just how powerful eating that apple can be. This person must be a trusted voice, one that can calm the informational clutter instead of adding yet another discordant voice to the pile. Desiree Nielsen is a registered dietitian, one of the public's most trusted sources of nutrition information. In *Un-Junk Your Diet*, she teaches readers about anti-inflammatory dieting in a way that's engaging, funny, and approachable. This book begins with a call to action to help shake up perceptions of what food means to our bodies and illuminate all the ways that marketers co-opt healthy eating messages to coerce us into choosing food that is unworthy. In addition, an in-depth look at the fundamentals of nutrition—with a splash of myth busting—strengthens readers' abilities to resist the latest nutrition headline and continue making healthier choices. Because there is no one right way for every individual eater, Nielsen offers a brief exercise in self-discovery before providing four distinct plans for becoming healthier. They range from the gentle and gradual to the two-week kick start that appeals to both detox seekers and vacation slimmers.

Instant New York Times bestseller · Hilarious stories and advice about the ups and downs of growing up, from a popular YouTube artist and storyteller. Like any shy teen turned young adult, YouTube star James Rallison ("The Odd 1s Out") is used to being on the outside looking in. He wasn't partying in high school or winning football games like his older brother. Instead, he posted comics on the Internet. Now, he's ready to share his hard-earned advice from his 21 years of life in the funny, relatable voice his fans love. In this illustrated collection, Rallison tells his own stories of growing up as the "odd one out": in art class with his twin sister (she was more talented), in the middle school locker room, and up to one strange year of college (he dropped out). Each story is filled with the little lessons he picked up along the way, serious and otherwise, like: * How to be cool (in seventh grade) * Why it's OK to be second-best at

something, and * How to survive your first, confidence-killing job interviews Filled with fan-favorite comics and never-before-seen material, this tongue-in-cheek take on some of the weirdest, funniest parts of life is perfect for both avid followers and new converts.
