The Floating World, rev. ed.

Hiroshige

Hiroshige is one of the most important artists of the Japanese woodblock print and is considered a master of ukiyo-e, the "pictures of the floating world." His evocative illustrations show mainly landscapes and scenes from the capital Edo, today's Tokyo. About 200 images immerse the viewer in the world of nineteenth-century Japan.

One Hundred Famous Views of Edo

L'art de l'Ukiyo-e reflète l'expression artistique d'une civilisation qui influença nombre d'artistes européens. Les trois maîtres de l'Ukiyo-e, Hokusai, Utamaro et Hiroshige, sont réunis pour créer un ouvrage de référence de l'art japonais et de l'art de l'estampe.

Hiroshige's Views of Tokyo

Utagawa Hiroshige Ukiyoe JOURNAL

Japan Encyclopedia

The art of the Ukiyo-e reflected the artistic expression of an isolated civilisation which, when it became accessible to the West, significantly influenced a number of European artists. The three masters of Ukiyo-e, Hokusai, Utamaro and Hiroshige, are united here for the first time to create a true reference on Japanese art. The three masters rank highly among the most famous Japanese artistic productions of all time. This new title of the Prestige of Art collection will be a reference for art students and Japanese art lovers.

Hiroshige in Tokyo

"Knowing Japan and the Japanese better," Louis Frédéric states in the introduction to this encyclopedia, "is one of the necessities of modern life." The Japanese have a profound knowledge of every aspect and detail of Western societies. Unfortunately, we in the West cannot say the same about our knowledge of Japan. We tend to see Japan through a veil of exoticism, as a land of ancient customs and exquisite arts; or we view it as a powerful contributor to the global economy, the source of cutting-edge electronics and innovative management techniques. To go beyond these clichés, we must begin to see how apparently contradictory aspects of modern Japanese culture spring from the

country's evolution through more than two millennia of history. This richly detailed yet concise encyclopedia is a guide to the full range of Japanese history and civilization, from the dawn of its prehistory to today, providing clear and accessible information on society and institutions, commerce and industry, sciences, sports, and politics, with particular emphasis on religion, material culture, and the arts. The volume is enhanced by maps and illustrations, along with a detailed chronology of more than 2,000 years of Japanese history and a comprehensive bibliography. Cross-references and an index help the reader trace themes from one article to the next. Japan Encyclopedia will be an indispensable one-volume reference for students, scholars, travelers, journalists, and anyone who wishes to learn more about the past and present of this great world civilization.

Utagawa Hiroshige's two Thirty-six Views of Mount Fuji series, 1852 and 1858 are both a copy copy act and in themselves innovative artistic endeavors. Katsushika Hokusai published his famous series Thirty-six Views of Mount Fuji in 1830-1832 and it influenced Hiroshige tremendously to his own series Thirty-six Views of Mount Fuji series 1852 which we deal with here. It is in the same horizontal format for landscapes that Hokusai used. In a subsequent series Thirty-six Views of Mount Fuji published in 1858 Hiroshige shifted to the vertical portrait format with novel and interesting results. We will deal with that in a

separate volume. It is possible to travel to see the same sites today and enjoy the views of Mt Fuji, which are still very important to the Japanese.

Forget the Ryder Cup, forget Rory McIlroy, forget keeping your head still and correcting your putting stance. Forget eagles and albatrosses and definitely forget holes-in-one. David Godwin has a dream, the same dream held by millions of amateur golfers. He's not aiming to break on to the pro circuit, he's not aiming to break par. David Godwin is going to break 80. Or it's going to break him. Written with humour and charm, *Breaking 80* is a book for those who recognise all too well the pleasure of a sweetly struck seven iron to within a few feet of the pin, followed by

the agonizing fury of a three-putt back and forth across the cup.

Hiroshige: Landscape, Cityscape

Utagawa Hiroshige (1797-1858) designed a series of seventy landscapes depicting the provinces of Japan between 1854 and 1856. It was the first in a number of sets from the highly productive years of his later life. The designs comprising "Famous Places in the 60-Odd Provinces (Rokuju yoshu meisho zue) are taken from all corners of Japan, thus representing an enormous innovation in the choice of subject matter. Large sets published before this had depicted the famous routes between Edo and Kyoto, the Tokaido and the Kisokaido, but Hiroshige had never before ventured beyond these well-known themes/ The Japanese countryside was already depicted in graphic art, but mostly in travelers' guidebooks and not as full color prints. With this set, Hiroshige brought the Japanese countryside closer to the urban population. It evidently met with high acclaim: the publisher Koshimuraya Heisuke produced a large number of impressions. In this study, the author Marije Jansen briefly discusses Hiroshige's life and the formal aspects of this series. Jansen takes as her point of departure the set in possession of the German collector Gerhard Pulverer, which is generally acknowledged to be a superb example of a first edition, and compares this series to a number of other sets in public and private collections. The detectable printing variations in each design are carefully analyzed, making this an indispensable tool for

collectors.

Hiroshige's Edo: Master of Japanese ukiyo-e woodblock prints "Some of the greatest prints in the history of art." -The Wall Street Journal, New York

Utagawa Hiroshige (1797-1858) was one of the last great artists in the ukiyo-e tradition. Literally meaning "pictures of the floating world", ukiyo-e refers to the famous Japanese woodblock print genre that originated in the 17th century and is practically synonymous with the Western world's visual characterization of Japan. Though Hiroshige captured a variety of subjects, his greatest talent was in creating landscapes of his native Edo (modern-day Tokyo) and his most famous work was a series known as "100 Famous Views of Edo" (1856-1858). This book provides an introduction to his work and an overview of his career. About the Series: Each book in TASCHEN's Basic Art series features: a detailed chronological summary of the life and oeuvre of the artist, covering his or her cultural and historical importance a concise biography approximately 100 illustrations with explanatory captions

Hiroshige and Japanese Landscapes

Hiroshige. Shaping the Image of Japan is a comprehensive overview of Utagawa Hiroshige's work as a woodblock print artist. Hiroshige (1797-1858) is one of the great masters in the history of Japanese printmaking and has worked in virtually every genre of ukiyo-e or 'images of the floating world'. He achieved his greatest fame through his depictions of the Japanese landscape, which were not only popular in Japan, but also found favor with European artists at the turn of the 19th century.

This book shows the 10 Famous Views Of Naniwa (Osaka) by Hiroshige published in 1834. They are unusual in that they show markets with merchants negotiating. The 8 Views is a Chinese artistic and literary theme developed already in the 10th century and then transposed into Japanese culture, where it developed its own independent expression. Print artist Utagawa Hiroshige as many other Japanese artists took up the issue of 8 Views of Ōmi and again as other Japanese artists he expanded the theme into 8 Views of Kanazawa, 8 Views of Edo Environs and other locations. To give some background there are many other prints especially about rice but also fishing and transportation, and cultural activities afforded by the wealth accumulated by the merchants. It is possible to travel to see the same sites today.

Mandarin Ducks - Utagawa Hiroshige - Notebook/Journal

With Hokusai, Utamaro and Kuniyoshi, Utagawa Hiroshige (1797-1858) is one of the great protagonists of ukiyo-e . With respect to Hokusai, whom he constantly compared himself to, since he was around thirty years younger, Hiroshige made landscape and nature the focus of his work by instilling in the viewer a sense of harmony, serenity and peace that, still today, is universally admired. In fact, thanks to these qualities he is one of the most praised artists and is considered the "master of nature". Hiroshige renders the human figure with quick, direct lines that at times call to mind manga and anime sketches, though simplified and essential. This monograph presents a

selection of around 230 works from the most important series by Hiroshige, including views of famous places in the capital of Edo as well as in the farthest provinces, but also a body of work with the most admirable images portraying animals, flowers and insects plus original drawings and print plates that are still intact. This publication, which covers the Japanese master's entire career, is divided into eight themed sections that discuss the most important series in a thorough and illustrative way: Early Works; Travel Images; Flowers, Birds and the Moon; Views of Distant Places; View of the Oriental Capital; Hiroshige: Life and Work; Hiroshige and His Print Work; Contemporaries and the West.

The Heritage of Hiroshige

This highly regarded survey of the works of a master of Japanese printmaking is now available in a convenient and attractively priced flexi edition. Utagawa Hiroshige holds an assured place in the history of art as one of the greatest and best-loved masters of the woodblock print. His immensely popular works capture the beauty and delicacy of Japan's landscape.
