Teaching English by Design is two books in one: a primer for teaching secondary English and a comprehensive guide to creating and using four to six-week instructional units. Peter Smagorinsky shares insight about students, how they learn, and what kinds of classrooms support their achievement in reading and writing. Then he uses those findings to open up the key ideas of unit design to every teacher. Learning to Teach English

The importance of integrating the teaching and learning of language and culture has been widely recognised and emphasized. However, how to teach English as an International Language (EIL) and cultures in an integrative way in non-native English speaking countries remains problematic and has largely failed to enable language learners to meet local and global communication demands. Developing students' intercultural competence is one of the key missions of teaching cultures. This book examines a range of well-established models and paradigms from both English-speaking and non-English speaking countries. Exploring questions of why, what, and how to best teach cultures, the authors propose an integrated model to suit non-native English contexts in the Asia Pacific. The chapters deal with other critical issues such as the relationship between language and power, the importance of power relations in communication, the relationship between teaching cultures and national interests, and balancing tradition and change in the era of globalisation. The book will be valuable to academics and students of foreign language education, particularly those teaching English as an international language in non-native English countries.
