the book is ideal for any international manager who wants to better understand how to blend the best practices of Western leadership with traditional Chinese wisdom. The content comes from a combination of English and Chinese literature, interviews with practicing executives in China as well as the author's own experience as a leader in China. Dr. Frank Gallo, the Greater China Chief Leadership Consultant for Hewitt Associates, offers sage advice on effective leadership practices for the China market. His key areas of focus include: the unique challenge and complex issues of leading a firm or division in China major areas of cultural differences such as teamwork, decision-making and employee motivation, between Chinese and Western business practices common areas of misunderstanding such as truth versus courteousness; managing a hierarchy versus empowerment; and dealing with the role of the individual rather than the rule of law implementing effective leadership strategies and development with a Chinese company. This timely book will ensure a harmonious leadership style that draws out the best from both Western and Chinese business practices.

China's demand for timber has increased dramatically over the past 20 years; today more than 90% of Mozambican timber exports are destined for China. Demand for forest products present both opportunities and challenges for Mozambique. As the country's sixth largest export, timber represents one of the most important industries and sources of income, yet the intensified search for resources puts pressure on the sustainable management of the forests. In an attempt to generate greater domestic value-added and employment through local processing of roundwood an export ban on first-class timber in the form of logs has been put in place. The effect of this ban on processing activity is however debatable. The share of illegal activity in the timber industry is estimated to be large. Integrating these illegal activities into the formal economy could generate significant revenues for the government in the form of taxation, as well as greater control and oversight of logging activities than what is currently possible. Through the research project titled "Chinese Trade and Investment in Africa: Assessing and Governing Trade-Offs to National Economies, Local Livelihoods and Forest Ecosystems" CIFOR wishes to gain a better understanding of the impact increased

Basic Patterns of Chinese Grammar

Many Chinese learners find it difficult to learn English words: they are difficult to spell and say, change forms from noun to adjective to verb, have multiple meanings and are tricky to remember. This book suggests ways that teachers can help their students to learn English words. A problem frequently reported by Chinese learners is that they are unable to pronounce words that they have met in written contexts. They say their teachers have seldom taught them how to say the new words they find in their textbooks. Research has shown that if Chinese learners are taught the pronunciation of new words when they first meet them, the words are easier to learn. Another problem is knowing when and how to

use words accurately in the right context, with the appropriate level of formality. Harsh Words provides a theoretical background explaining how words are learned and then focuses on the Chinese learner in particular. It covers vocabulary learning strategies, learning words in isolation as well as in context, testing vocabulary, common Chinese errors with words, and vocabulary activities to use in class. One chapter deals with the use of IT in vocabulary development and suggests web sites and software that teachers may want to use with their students. Each chapter contains tasks and revision questions while an answer key is provided at the end. The book is written for teachers, whether training to be English teachers or taking refresher courses, postgraduate diplomas or Master's. While much of the content is applicable to all levels of learners, teachers in secondary schools and universities will find it most useful.

Interest in learning Chinese as an additional language has soared worldwide over the last ten years. Yet little is known about the learning process, and much less about what pedagogical strategies might facilitate or, otherwise, hinder it. This book thus aims to further understanding of the acquisition of Chinese as a foreign or second language. It brings together six independent studies which explore aspects of

Chinese Grammar at Work adopts a cognitive-functional approach and uses a corpus-based methodology to examine how Chinese syntax emerges from natural discourse context and what the evolving grammar at work looks like. In this volume the author weaves together an array of fresh perspectives on clause structure, constructions, interactional linguistics, cognitive science and complex dynamic systems to construct a grammar of spoken Chinese. The volume contains discussions of a large number of topics: contiguity relation, the roles of repair strategies in the shaping of constituent structure, non-canonical word order constructions, pragmatics of referring expressions, classifier constructions, noun-modifying constructions, verb complementation, ethnotheory of the person and constructions specific to the language of emotion, sequential sensitivity of linguistic materials, meaning potential in interaction, the nature of variability and stability in Chinese syntax from the perspective of
