This highly accessible and enjoyable guide is full of practical and fascinating information about how to

enjoy whisky. All whisky styles are covered, including (just whisper it) blends. Along the way a good few myths are exploded, including the idea that whisky has to be taken neat. In 'What to Drink', Dave Broom explores flavour camps - how to understand a style of whisky - and moves on to provide extensive tasting notes of the major brands, demonstrating whisky's extraordinary diversity. In 'How to Drink', he sets out how to enjoy whisky in myriad ways - using water and mixers, from soda to green tea; and in cocktails, from the Manhattan to the Rusty Nail. He even looks at pairing whisky and food. In this spirited, entertaining and no-nonsense guide, world-renowned expert Dave Broom dispels the mysteries of whisky and unlocks a whole host of exciting possibilities for this magical drink.

Deadly Choices

Over the past 50 years, rates of chronic illness, learning disabilities, and allergies in children have exploded--1 in 6 children has a diagnosed learning disorder, 1 in 50 has autism, and 1 in 13 has severe food allergies. Instead of blaming genetics or increased awareness and diagnosis, author Thomas Cowan, MD, attributes these rising numbers to our current vaccination policy. In *Vaccines, Auto-Immunity, and the Assault on Childhood*, Cowan combines his years of experience as a medical practitioner with his research into the history and science of vaccines to show how childhood illnesses, which help children to develop a robust immune system, are now eschewed by conventional medicine

in favor of an increasing array of vaccinations that do more harm than good. Invoking philosopher Rudolph Steiner's vision of vaccines as inspired by "spirits of darkness," Cowan brings to light the various ways in which scientists and government officials work to promote a vaccine program that only increases suffering. Along the way he questions commonly held views of cell biology, the role of water in the body, and the spatial and spiritual components of autism. Additionally, he provides hope of recovery in the form of a nontoxic course of treatment for those suffering chronic inflammation and other aversive immune responses to vaccines. Cowan's thoughtfully bold writing takes us on a journey into the history of illness, questioning the true origins of diseases such as polio, and asking important questions, such as: why did paralytic polio make a sudden appearance in the US in the years between 1916-1918? The answers lie far beyond what conventional medicine would have us believe. *Vaccines, Auto-Immunity, and the Assault on Childhood* asks that we re-examine not only our modern health system but our relationship with the spiritual world. Only then will we find true health.

In light of the discovery of Autoimmune Syndrome Induced by Adjuvants, or ASIA, *Vaccines and Autoimmunity* explores the role of adjuvants – specifically aluminum in different vaccines – and how they can induce diverse autoimmune clinical manifestations in genetically prone individuals. *Vaccines and Autoimmunity* is divided into three sections; the first contextualizes the role of adjuvants in the framework of autoimmunity, covering the mechanism of action of adjuvants, experimental models of adjuvant induced autoimmune diseases, infections as adjuvants, the Gulf War Syndrome, sick-building syndrome (SBS), safe vaccines, toll-like receptors, TLRs in vaccines, pesticides as adjuvants, oil as adjuvant, mercury, aluminum and autoimmunity. The following section reviews literature on vaccines that have induced autoimmune conditions such as MMR and HBV, among others. The final section covers diseases in which vaccines were known to be the solicitor – for instance, systemic lupus erythematosus – and whether it can be induced by vaccines for MMR, HBV, HCV, and others. Edited by leaders in the field, *Vaccines and Autoimmunity* is an invaluable resource for advanced students and researchers working in pathogenic and epidemiological studies.

The Young Einstein, The Advent of

Relativity

The idea of progress guided human expectations and actions for over two centuries. From the Enlightenment onwards, it was widely believed that the condition of humankind could be radically improved. History had embarked on an unstoppable forward trajectory, realizing the promise of freedom and reason. The scientific revolution, the industrial revolution, and the French Revolution, in some views also the socialist revolution, were milestones on this march of progress. But since the late twentieth century the idea of progress has largely disappeared from public debate. Sometimes it has been explicitly declared dead. The wide horizon of future possibilities has closed. The best we can hope for, some say, is to avoid regress. What happened to progress? Why did we stop believing in it, if indeed we did? This book offers answers to these questions. It reviews both the conceptual history of progress and the social and political experiences with progress over the past two centuries, and it comes to a surprising conclusion: The idea of progress was misconceived from its beginnings, and the failure of progress in practice was a result of this flawed conception. The experiences of the past half century, in turn, has allowed us to rethink progress in a more adequate way. Rather than the end of progress, they may herald the beginning of a new, reconstructed idea of progress.

Logic For Dummies

Sherrill Grace shows how Malcolm Lowry's theme of a cyclical pattern of initiation, repeated ordeals with failure and retreat, followed by success and development, which in turn gave way to fresh defeat, influenced the structure, narrative style, and the symbolic pattern in his writing. The author also includes an appendix in which she examines the elements of Conrad Aiken's fiction and prose that had a significant impact on Lowry's work.

ITALIAN DICT

The author with “a humanity worthy of Dickens or Hardy” delivers a novel of alternative currency and the price of wealth (Publishers Weekly). You can try to

escape from the mundane, or with the help of Paul Di Filippo, you can take a brief, meaningful break from it. In the vein of George Saunders or Michael Chabon, Di Filippo uses the tools of science fiction and the surreal to take a deep, richly felt look at humanity. His brand of funny, quirky, thoughtful, fast-moving, heart-warming, brain-bending stories exist across the entire spectrum of the fantastic from hard science fiction to satire to fantasy and on to horror, delivering a riotously entertaining string of modern fables and stories from tomorrow, now and anytime. After you read Paul Di Filippo, you'll no longer see everyday life quite the same. For most people, as they say, money makes the world go 'round. For Rory Honeyman, it's a different story. Having inadvertently and, almost without noticing, invented a new form of cash cow, money makes Rory's world go strangely pear-shaped and out-of-control. He has an endless supply of blank checks that never bounce but he's being guided by an albino, hustled by a saline-snorting sandwich-obsessed gourmet, manipulated by a devious banker and befuddled and bemused by a never-ending assortment of attractive and baffling women. And, for reasons unknown and unknowable, after racing from the Great Plains to Mexico City to Canada to Europe, he's stuck in Hoboken and there appears to be no way out. Originally published: 2004

Quadrivium

This collection of stories, first published in 1872, includes Green Tea, The Familiar, Mr. Justice Harbottle, The Room in the Dragon Volant, and Carmilla. The five stories are purported to be cases by Dr. Hesselius, a 'metaphysical' doctor, who is willing to consider the ghosts both as real and as hallucinatory obsessions. The reader's doubtful anxiety mimics that of the protagonist, and each story thus creates that atmosphere of mystery which is the supernatural experience. This new edition includes alternate versions of some stories and a brief biography of the author.

Hermann Klaus Hugo Weyl, a German mathematician, theoretical physicist, and philosopher. Although mostly working in Zürich, Switzerland and then Princeton, he is connected with the University of Göttingen tradition of mathematics. His research has had vital importance for theoretical physics and purely mathematical disciplines including number theory. One of the most distinguished mathematicians of the twentieth century, and an outstanding member of the Institute for Advanced Study. Weyl printed technical and some general works on logic, symmetry, space, time, matter, philosophy, and the history of mathematics. One of the first to conceive the combination of general relativity and the laws of electromagnetism.

The Changing Arctic

This is the first edition of *In Ballast to the White Sea*, the autobiographical novel by Malcolm Lowry, known to most only through the highly romanticized story of its loss in a fire. In fact, the typescript itself has probably been read by at most a dozen people since Lowry scholars learned that it was deposited at the New York Public Library.

Progress

Sir William Temple, diplomat, statesman, and writer, retired to his garden in the 1680s and wrote what has become one of the key texts, not only of gardening, but also of the English aesthetic. It was he who introduced the idea of the charm of irregularity, and who gave it the allegedly Chinese name *sharawadgi*. The English style of landscape gardening can be traced in a direct line to this essay, which has not been in print for over 95 years.

Over the last few years the Arctic has become a region of growing interest to the international community. Major environmental, economic, social, and security issues are all in evidence within its

borders today. Many feel that there is an urgent need to establish an effective governance structure for the area. The Arctic Council has offered a basic forum for circumpolar consultation and cooperation over the past two decades. However, it has not been an easy undertaking and the organization has had to wrestle with a series of internal and external impediments that have hindered its forward progress. This volume explores the efforts of Sweden, a recent Chair of the Arctic Council, to build an enhanced framework for consensus-building and governance within the circumpolar region. It examines its efforts to provide focused leadership for the Arctic Council and to advance the environmental protection and sustainable development missions of the organization. It considers the various means by which Sweden utilized its position as chair of the Arctic Council to promote its program for action in both these areas. It also explores how this leadership position enabled it to foster necessary organizational reform within the body. The book gives new insight into how both the formal and informal 'powers of the chair' can be utilized to facilitate institutional growth and change. It also provides new and useful understanding of how a small country like Sweden can harness key elements of 'soft power' to advance its foreign policy objectives in the Arctic. The author closely followed the undertakings of the Swedish Chairmanship team over its two years at the helm of this emerging Arctic international organization. He witnessed its several successes and a few of its disappointments. The volume offers a behind the scene view of the challenges and opportunities faced by contemporary diplomats as they pursue their

efforts at international organization.

This final volume of John Röhl's acclaimed biography of Kaiser Wilhelm II reveals the Kaiser's central role in the origins of the First World War. The book examines the Kaiser's part in the Boer War, the Russo-Japanese War, the naval arms race with Britain and Germany's rivalry with the United States as well as in the crises over Morocco, Bosnia and Agadir. It also sheds new light on the public scandals which accompanied his reign from the allegations of homosexuality made against his intimate friends to the Daily Telegraph Affair. Above all, John Röhl scrutinises the mounting tension between Germany and Britain and the increasing pressure the Kaiser exerted on his Austro-Hungarian ally from 1912 onwards to resolve the Serbian problem. Following Germany's defeat and Wilhelm's enforced abdication, he charts the Kaiser's bitter experience of exile in Holland and his frustrated hopes that Hitler would restore him to the throne.

Tales of horror have always been with us, from Biblical times to the Gothic novel to successful modern day authors and screenwriters. Though the genre is often maligned, it is huge in popularity and its resilience is undeniable. Marc Blake and Sara Bailey offer a detailed analysis of the horror genre, including its subgenres, tropes and the specific requirements of the horror screenplay. Tracing the development of the horror film from its beginnings in German Expressionism, the authors engage in a readable style that will appeal to anyone with a genuine interest in the form and the mechanics of the genre. This book examines the success of Universal Studio's franchises of the '30s to the Serial Killer, the Slasher film, Asian Horror, the Supernatural, Horror Vérité and current developments in the field, including 3D and remakes. It also includes step-by-step writing exercises, annotated extracts from horror screenplays and interviews with seasoned writers/directors/ producers discussing budget restrictions, screenplay form and formulas and how screenplays work during shooting.

Through a Glass Darkly

The quadrivium—the classical curriculum—comprises the four liberal arts of number, geometry, music, and cosmology. It was studied from antiquity to the Renaissance as a way of glimpsing the nature of reality. Geometry is number in space; music is number in time; and cosmology expresses number in space and time. Number, music, and geometry are metaphysical truths: life across the universe investigates them; they foreshadow the physical sciences. Quadrivium is the first volume to bring together these four subjects in many hundreds of years. Composed of six successful titles in the Wooden Books series—Sacred Geometry, Sacred Number, Harmonograph, The Elements of Music, Platonic & Archimedean Solids, and A Little Book of Coincidence—it makes ancient wisdom and its astonishing interconnectedness accessible to us today. Beautifully produced in six different colors of ink, Quadrivium will appeal to anyone interested in mathematics, music, astronomy, and how the universe works.

On a beautiful Greek island, myths, magic, and a colorful cast of characters come together in *When the Cypress Whispers*, Yvette Manassis Corporon's lushly atmospheric story about past and present, family and fate, love and dreams that poignantly captures the deep bond between an American woman and her Greek grandmother. The daughter of Greek

immigrants, Daphne aspires to the American Dream, yet feels as if she's been sleepwalking through life. Caught between her family's old-world traditions and the demands of a modern career, she cannot seem to find her place. Only her beloved grandmother on Erikousa, a magical island off the coast of Greece, knows her heart. Daphne's fondest memories are of times spent in the kitchen with Yia-yia, cooking and learning about the ancient myths. It was the thought of Yia-yia that consoled Daphne in the wake of her husband's unexpected death. After years of struggling to raise her child and pay the bills, Daphne now has a successful restaurant, a growing reputation as a chef, and a wealthy fiancé—everything she's ever wanted. But across the ocean, Yia-yia can see through the storybook perfection of Daphne's new life— and now she is calling her back to Erikousa. She has secrets about the past to share with her granddaughter— stories from the war, of loyalty and bravery in the face of death. She also has one last lesson to teach her: that security is not love, and that her life can be filled with meaning again.

Space Time Matter

Best known for directing the Impressionist classic *The Smiling Madame Beudet* and the first Surrealist film *The Seashell and the Clergyman*, Germaine Dulac, feminist and pioneer of 1920s French avant-garde cinema, made close to thirty fiction films as well as numerous documentaries and newsreels. Through her filmmaking, writing, and cine-club activism, Dulac's passionate defense of the cinema as a lyrical art and

social practice had a major influence on twentieth century film history and theory. In *Germaine Dulac: A Cinema of Sensations*, Tami Williams makes unprecedented use of the filmmaker's personal papers, production files, and archival film prints to produce the first full-length historical study and critical biography of Dulac. Williams's analysis explores the artistic and sociopolitical currents that shaped Dulac's approach to cinema while interrogating the ground breaking techniques and strategies she used to critique conservative notions of gender and sexuality. Moving beyond the director's work of the 1920s, Williams examines Dulac's largely ignored 1930s documentaries and newsreels establishing clear links with the more experimental impressionist and abstract works of her early period. This vivid portrait will be of interest to general readers, as well as to scholars of cinema and visual culture, performance, French history, women's studies, queer cinema, in addition to studies of narrative avant-garde, experimental, and documentary film history and theory.

A detailed account of Einstein's childhood and formative years focuses on the intellectual climate of Germany where, before 1919, his trailblazing work on the special and general theories of relativity received widest notice. The author explores the response to the theories by pure mathematicians, who did not

have to face the prospect of a fundamental revision of their basic principles, and by physicists and astronomers, who did. Of interest to physicists, academics and students interested in Einstein himself and in the wider history of science and ideas, or in the social and intellectual history of Germany.

Swinging the Maelstrom is the story of a musician enduring existence in the Bellevue psychiatric hospital in New York. Written during his happiest and most fruitful years, this novella reveals the deep healing influence that the idyllic retreat at Dollarton had on Lowry. This long-overdue scholarly edition will allow scholars to engage in a genetic study of the text and reconstruct, step by step, the creative process that developed from a rather pessimistic and misanthropic vision of the world as a madhouse (The Last Address, 1936), via the apocalyptic metaphors of a world on the brink of Armageddon (The Last Address, 1939), to a world that, in spite of all its troubles, leaves room for self-irony and humanistic concern (Swinging the Maelstrom, 1942-1944). - This book is published in English.
