The Republic of India

In this groundbreaking work, Kamal Sadiq reveals that most of the world's illegal immigrants are not migrating directly to the US, but to countries in the vast developing world, where they are able to obtain citizenship papers fairly easily. Sadiq introduces "documentary citizenship" to explain how paperwork--often falsely obtained--confers citizenship on illegal immigrants. Across the globe, there are literally tens of millions of such illegal immigrants who have assumed the guise of "citizens." Who, then, is really a citizen? And what does citizenship mean for most of the world's peoples? Rendered in vivid detail, Paper Citizens not only shows how illegal immigrants acquire false papers, but also sheds light on the consequences this will have for global security in the post 9/11 world.

Shivya Nath quit her corporate job at age twenty-three to travel the world. She gave up her home and the need for a permanent address, sold most of her possessions and embarked on a nomadic journey that has taken her everywhere from remote Himalayan villages to the Amazon rainforests of Ecuador. Along the way, she lived with an indigenous Mayan community in Guatemala, hiked alone in the Ecuadorian Andes, got mugged in Costa Rica, swam across the border from Costa Rica to Panama, slept under a meteor shower in the cracked salt desert of Gujarat and learnt to conquer her deepest fears. With its vivid descriptions, cinematic landscapes, moving encounters and uplifting adventures, *The Shooting Star* is a travel memoir that maps not just the world but the human spirit.

Nation-states often shape the boundaries of historical enquiry, and thus silence the very histories that have sutured nations to territorial states. "India" and "Pakistan" were drawn onto maps in the midst of Partition's genocidal violence and one of the largest displacements of people in the twentieth century. Yet this historical specificity of decolonization on the very making of a nationalized cartography of modern South Asia has largely gone unexamined. In this remarkable study based on more than two years of ethnographic and archival research, Vazira Fazila-Yacoobali Zamindar argues that the combined interventions of the two postcolonial states were enormously important in shaping these massive displacements. She examines the long, contentious, and ambivalent process of drawing political boundaries and making distinct nation-states in the midst of this historic chaos. Zamindar crosses political and conceptual boundaries to bring together oral histories with north Indian Muslim families divided between the two cities of Delhi and Karachi with extensive archival research in previously unexamined Urdu newspapers and government records of India and Pakistan. She juxtaposes the experiences of ordinary people against the bureaucratic interventions of both postcolonial states to manage and control refugees and administer refugee property. As a result, she reveals the surprising history of the making of the western Indo-Pak border, one of the most highly surveillanced in the world, which came to be instituted in response to this refugee crisis, in order to construct national difference where it was the most blurred. In particular, Zamindar examines the "Muslim question" at the

heart of Partition. From the margins and silences of national histories, she draws out the resistance, bewilderment, and marginalization of north Indian Muslims as they came to be pushed out and divided by both emergent nation-states. It is here that Zamindar asks us to stretch our understanding of "Partition violence" to include this long, and in some sense ongoing, bureaucratic violence of postcolonial nationhood, and to place Partition at the heart of a twentieth century of border-making and nation-state formation.

A Globe and Mail Best Books of the Year 2011 Title Siddhartha Deb grew up in a remote town in the northeastern hills of India and made his way to the United States via a fellowship at Columbia. Six years after leaving home, he returned as an undercover reporter for The Guardian, working at a call center in Delhi in 2004, a time when globalization was fast proceeding and Thomas L. Friedman declared the world flat. Deb's experience interviewing the call-center staff led him to undertake this book and travel throughout the subcontinent. The Beautiful and the Damned examines India's many contradictions through various individual and extraordinary perspectives. With lyrical and commanding prose, Deb introduces the reader to an unforgettable group of Indians, including a Gatsby-like mogul in Delhi whose hobby is producing big-budget gangster films that no one sees; a wiry, dusty farmer named Gopeti whose village is plagued by suicides and was the epicenter of a riot; and a sad-eyed waitress named Esther who has set aside her dual degrees in biochemistry and botany to serve Coca-Cola to arms dealers at an upscale hotel called Shangri La. Like no other writer, Deb humanizes the post-globalization experience—its advantages, failures, and absurdities. India is a country where you take a nap and someone has stolen your job, where you buy a BMW but still have to idle for cows crossing your path. A personal, narrative work of journalism and cultural analysis in the same vein as Adrian Nicole LeBlanc's Random Family and V. S. Naipaul's India series, The Beautiful and the Damned is an important and incisive new work. The Beautiful and the Damned is a Publishers Weekly Best Nonfiction title for 2011.

This book is the first comprehensive examination of the citizenship regimes of the new states that emerged out of the break up of Yugoslavia. It covers both the states that emerged out of the initial disintegration across 1991 and 1992 (Slovenia, Croatia, Bosnia-Herzegovina, the Federal Republic of Yugoslavia and Macedonia), as well as those that have been formed recently through subsequent partitions (Serbia, Montenegro and Kosovo). While citizenship has often been used as a tool of ethnic engineering to reinforce the position of the titular majority in many states, in other cases citizenship laws and practices have been liberalised as part of a wider political settlement intended to include minority communities more effectively in the political process. Meanwhile, frequent (re)definitions of these increasingly overlapping regimes still provoke conflicts among post-Yugoslav states. This volume shows how important it is for the field of citizenship studies to take into account the main changes in and varieties of citizenship regimes in the post-Yugoslav states, as a particular case of new state citizenship. At the same time, it seeks to show scholars of (post) Yugoslavia and the wider Balkans that the Yugoslav crisis, disintegration and wars as well as the current functioning of the new and old Balkan states, together with the process of their integration into the EU, cannot be fully understood without a deeper understanding of their citizenship regimes. This book was originally published as a special issue of Citizenship Studies.

Analysis of big data is becoming a hot stuff for engineers, researchers and business enterprises now a days. It refers to the process of collecting, organizing and analyzing large sets of data to discover hidden patterns and other useful information. Not solely can massive information analytics assist to know the knowledge contained inside the information, however it will additionally facilitate to determine the information that is most significant to the business and future business choices. Cloud computing is the type of computing that relies on sharing computing resources rather than having local servers or personal devices to handle applications. Cloud computing aims at applying traditional supercomputing, or high-performance

computing power to perform tens of trillions of computations per second, in consumer-oriented applications such as financial portfolios, to deliver personalized information, to provide data storage etc. Since big data places on networks, storage and servers, requirements arise to analyse this huge amount data on the cloud. Even cloud providers also welcome this new business opportunity of supporting big data analysis in the cloud. But in the same time they are facing various, architectural and technical hurdles. Therefore, big data analysis in cloud attracting many researchers now a days. The National Conference on Communication, Cloud and Big Data (CCB) 2014 organized by Department of Information Technology, SMIT has received keen response from researchers across the country. Each paper went through reviews process and finally, 30 papers were selected for presentation. The papers are an even mix of research topics from the fields of Communication, Cloud and Big Data and its applications in various fields of engineering and science.
