Then, you'll learn how to edit your images in Lightroom Mobile, using the same Basic panel features found in the desktop version of Lightroom—it's the same sliders that do the same thing, and it's even in the same order. You'll also learn how to easily crop images, as well as use the in-app camera. Welcome to a new era of business in which your brand is defined by those who experience it. Do you know how your customers experience your brand today? Do you know how they really feel? Do you know what they say when you're not around? In an always-on world where everyone is connected to information and also one another, customer experience is your brand. And, without defining experiences, brands become victim to whatever people feel and share. In his new book *X: The Experience When Business Meets Design* bestselling author Brian Solis shares why great products are no longer good enough to win with customers and why creative marketing and delightful customer service too are not enough to succeed. In *X*, he shares why the future of business is experiential and how to create and cultivate meaningful experiences. This isn't your ordinary business book. The idea of a book was re-imagined for a digital meets analog world to be a relevant and sensational experience. Its aesthetic was meant to evoke emotion while also giving new perspective and insights to help you win the hearts and minds of your customers. And, the design of this book, along with what fills its pages, was done using the principles shared within. Brian shares more than the importance of experience. You'll learn how to design a desired, meaningful and uniform experience in every moment of truth in a fun way including: How our own experience gets in the way of designing for people not like us Why empathy and new perspective unlock creativity and innovation The importance of User Experience (UX) in real life and in executive thinking The humanity of Human-Centered Design in all you do The art of Hollywood storytelling from marketing to product design to packaging Apple's holistic approach to experience architecture The value of different journey and experience mapping approaches The future of business lies in experience architecture and you are the architect. NX 12 For Beginners introduces you to the basics of NX 12 by using step-by-step instructions. You begin with brief introduction to NX 12 and the User Interface, ribbon, environments, commands, and various options. Within a short time, you will learn to create 2D sketches that form the basis for 3D models. You will learn to sketch on three different planes (Front, Top and Right planes). You will use various sketching tools such as line, rectangle, circle, and so on. You will also learn to modify sketches using tools such as trim, extend, fillets, and so on. Learn to use geometric constraints and dimensions to achieve a definite shape and size of the sketch. Sketches are converted into 3D features such as Extrude, Revolve, and so on. You combine or subtract features to achieve the final part. You can also add placed features (sketch less features) such as Fillets, and Holes to the 3D geometry. You explore mirroring and patterning commands to create repetitive features. You will learn to use some additional modeling tools and work with multi-body parts. Learn to modify part geometry by editing sketches and feature parameters. You explore Synchronous Modeling tools to modify the Part geometry by modifying its faces. You build assemblies after creating parts. There are two methods to build assemblies: Bottom-up and Top-down. In the Bottom-up method, you bring all the parts together and add constraints between them. In the Top-down method, you create parts in the assembly level. You explode assemblies to show the manner in which they were assembled. You create Drawings of the parts and assemblies. You insert part views and add dimensions and annotations to complete the drawing. In case of assembly drawings, you insert assembly views, add Bill of Materials, Balloons, and Revision table. The Sheet Metal design chapter covers various tools used to build sheet metal parts from scratch. You will also learn to convert an existing part geometry into sheet metal part. You also create flat patterns and 2D sheet metal drawings. The Surface design chapter covers the surface modeling tools that are used to create complex shapes. The NX Realize Shape chapter covers the freeform modeling tools. Table of Contents . Getting Started with NX 12 2. Sketch Techniques 3. Extrude and Revolve Features 4. Placed Features 5. In *Reading in the Wild*, reading expert Donalyn Miller continues the conversation that began in her bestselling book, *The Book Whisperer*. While *The Book Whisperer* revealed the secrets of getting students to love reading, *Reading in the Wild*, written with reading teacher Susan Kelley, describes how to truly instill lifelong "wild" reading habits in our students. Based, in part, on survey responses from adult readers as well as students, *Reading in the Wild* offers solid advice and strategies on how to develop, encourage, and assess five key reading habits that cultivate a lifelong love of reading. Also included are strategies, lesson plans, management tools, and comprehensive lists of recommended books. Copublished with Editorial Projects in Education, publisher of *Education Week* and *Teacher* magazine, *Reading in the Wild* is packed with ideas for helping students build capacity for a lifetime of "wild" reading. "When the thrill of choice reading starts to fade, it's time to grab *Reading in the Wild*. This treasure trove of resources and management techniques will enhance and improve existing classroom systems and structures." —Cris Tovani, secondary teacher, Cherry Creek School District, Colorado, consultant, and author of *Do I Really Have to Teach Reading?* "With *Reading in the Wild*, Donalyn Miller gives educators another important book. She reminds us that creating lifelong readers goes far beyond the first step of putting good books into kids' hands." —Franki Sibberson, third-grade teacher, Dublin City Schools, Dublin, Ohio, and author of *Beyond Leveled Books* "*Reading in the Wild*, along with the now legendary *The Book Whisperer*, constitutes the complete guide to creating a stimulating literature program that also gets students excited about pleasure reading, the kind of reading that best prepares students for understanding demanding academic texts. In other words, Donalyn Miller has solved one of the central problems in language education." —Stephen Krashen, professor emeritus, University of Southern California
