Legal Guide for Starting & Running a Small Business

Thurgood Marshall's extraordinary contribution to civil rights and overcoming racism is more topical than ever, as the national debate on race and the overturning of affirmative action policies make headlines nationwide. Howard Ball, author of eighteen books on the Supreme Court and the federal judiciary, has done copious research for this incisive biography to present an authoritative portrait of Marshall the jurist. Born to a middle-class black family in "Jim Crow" Baltimore at the turn of the century, Marshall's race informed his worldview from an early age. He was rejected by the University of Maryland Law School because of the color of his skin. He then attended Howard University's Law School, where his racial consciousness was awakened by the brilliant lawyer and activist Charlie Houston. Marshall suddenly knew what he wanted to be: a civil rights lawyer, one of Houston's "social engineers." As the chief attorney for the NAACP, he developed the strategy for the legal challenge to racial discrimination. His soaring achievements and his lasting impact on the nation's legal system--as the NAACP's advocate, as a federal appeals court judge, as President Lyndon Johnson's solicitor general, and finally as the first African American Supreme Court Justice--are symbolized by *Brown v. Board of Education*, the landmark case that ended legal segregation in public schools. Using race as the defining theme, Ball spotlights Marshall's genius in working within the legal system to further his lifelong commitment to racial equality. With the help of numerous, previously unpublished sources, Ball presents a lucid account of Marshall's illustrious career and his historic impact on

American civil rights.

Electronic commerce is here to stay. No matter how big the dot-com crisis was or how far the e-entrepreneurs' shares fell in the market, the fact remains that there is still confidence in electronic trading. At least it would appear that investors are confident in e-companies again. However, not only trust of venture capitalists is of importance -- consumers also have to have faith in on-line business. After all, without consumers there is no e-business. Interacting lawyers, technicians and economists are needed to create a trustworthy electronic commerce environment. To achieve this environment, thorough and inter-disciplinary research is required and that is exactly what this book is about. Researchers of the project Enabling Electronic Commerce from the Dutch universities of Tilburg and Eindhoven have chosen a number of e-topics to elaborate on trust from their point of view. This volume makes clear that the various disciplines can and will play a role in developing conditions for trust and thus contribute to a successful electronic market.

This volume (1) defines the specific-anticompetitive-intent, lessening-competition, distorting-competition, and exploitative-abuse tests of illegality promulgated by U.S. and/or E.U. antitrust law, (2) compares the efficiency defenses promulgated by U.S. and E.U. antitrust law, (3) compares the conduct-coverage of the various U.S. and E.U. antitrust laws, (4) defines price competition and quality-or-variety-increasing-investment (QV-investment) competition and explains why they should be analyzed separately, (5) defines the components of individualized-pricing and across-the-board-pricing sellers' price minus

marginal cost gaps and analyses each's determinants, (6) defines the determinants of the intensity of QV-investment competition and explains how they determine that intensity, (7) demonstrates that definitions of both classical and antitrust markets are inevitably arbitrary, not just at their periphery but comprehensively, (8) criticizes the various protocols for market definition recommended/used by scholars, the U.S. antitrust agencies, the European Commission, and U.S. and E.U. courts, (9) explains that a firm's economic (market) power or dominance depends on its power over both price and QV investment and demonstrates that, even if markets could be defined non-arbitrarily, a firm's economic power could not be predicted from its market share, (10) articulates a definition of "oligopolistic conduct" that some economists have implicitly used—conduct whose perpetrator-perceived ex ante profitability depended critically on the perpetrator's belief that its rivals' responses would be affected by their belief that it could react to their responses, distinguishes two types of such conduct—contrived and natural—by whether it entails anticompetitive threats and/or offers, explains why this distinction is critical under U.S. but not E.U. antitrust law, analyzes the profitability of each kind of oligopolistic conduct, examines these analyses' implications for each's antitrust legality, and criticizes related U.S. and E.U. case-law and doctrine and scholarly positions (e.g., on the evidence that establishes the illegal oligopolistic character of pricing), and (11) executes parallel analyses of predatory conduct—e.g., criticizes various arguments for the inevitable unprofitability of predatory pricing, the various tests that economists/U.S. courts advocate using/use to determine whether pricing is predatory, and two analyses by economists of the conditions under which QV investment and systems rivalry are predatory and examines the conditions under which production-process research, plant-modernization, and long-term full-requirements contracts are predatory.

To study the settlement process of undocumented migrants, Jacqueline Hagan examines one of Houston's Maya communities, the approximately 900 Maya from a township in the Department of Totonicapan, Guatemala. She traces this Maya community from its genesis in 1978, when a few men left the township in search of economic opportunity, to the complex effects of the 1986 Immigration Reform and Control Act (IRCA). Based on several years of living and participating in the Totonicapan Maya community in Houston and a visit to the Guatemalan home community, Hagan's research combines interviews, community participation, and observation to evaluate immigration policy. Hagan shows that these immigrants do not passively accept U.S. immigration policy, but instead interpret it and base their actions on their own agenda within the context of their local community. The results, often quite unexpected by national policy makers, question

popular myths about the settlement of immigrant communities. The author discusses the different settlement experiences of men and women and the effects of IRCA on family and community structure. Analyzing how legal status influences settlement behavior and international networks, she finds that strong community-based networks and social ties with a home community lead to successful adaptation. Author note: Jacqueline Maria Hagan is Assistant Professor of Sociology at the University of Houston.

Furthermore, there is the globalisation of the economy, the increase of international corporate mergers and the unfolding of the network society, which goes hand in hand with technological innovations. These developments not only multiplied the needs for information and the flow of data in employment relations, but also improved techniques of data processing revealing sensitive data of employees. This book deals with employment privacy law, a field of knowledge that increasingly gains influence in legal theory and daily practice. It concentrates on the legal regulation of general human resources data as well as sensitive data in the employment context. The book is developed within a comparative perspective, providing an overview and analysis of the Law of each Member State of the European Union in the field of study. It is completed by a comparative summary. Information and insights in this book will be of great value for practicing lawyers, human resources managers, academics, interest groups and policy makers. Managing Your Legal Career

Why is the law failing to protect pregnant workers and parents from detrimental treatment in the workplace? This theoretically informed book, which draws on the findings of a large scale, Nuffield Foundation funded, study of pregnancy-related workplace disputes, explores the legal regulation of pregnancy and parenting in the labour market. Using an epistemology that draws primarily on critical feminist debates, theories and critiques, the book adopts a necessarily female standpoint and seeks to answer why, despite positive policy ambitions and ample legislation, law is failing to protect pregnant workers and parents. Whilst sensitive to the limits of law's ability to bring about social change, the book asks whether it is the direction of current policies that need attention, or the substance of the legislation that is flawed. Is it the application of the law in courts and tribunals that fails working families or the mechanics of the employment dispute resolution and tribunal system that needs adjusting? This book will interest academics, students and practitioners of law and social policy interested in employment law and discrimination.

Priests of Our Democracy tells of the teachers and professors who battled the anti-communist witch hunt of the 1950s. It traces the political fortunes of academic freedom beginning in the late 19th century, both on campus and in the courts. Combining political and legal history with wrenching personal stories, the book details how the anti-communist excesses of

the 1950s inspired the Supreme Court to recognize the vital role of teachers and professors in American democracy. The crushing of dissent in the 1950s impoverished political discourse in ways that are still being felt, and First Amendment academic freedom, a product of that period, is in peril today. In compelling terms, this book shows why the issue should matter to everyone.
